A large audience greeted Harvey Mitchell and F. T. Morrow in Afton Hall on Monday night, 14th of March, 7.30 p. m. George Wilson was called to the chair and after a few remarks introduced the lecturer, who gave the people good, sound advice on dairying and how to improve their herd in order to get profitable results, by testing the milk of each cow in the herd, and also the care of milk by cooling whenever taken from the cow and cover down tightly so that no air can get into the milk. If this be done, less milk would be returned on Monday mornings from the factories. His lecture was interspersed with lantern slides and charts, which made everything plain to all who had the pleasure of hearing Mr. Mitchell. Several questions were asked regarding the taking of milk at factory. Mr. Mitchell advised the straight test as the fair way, as the minority of factories were receiving milk by the straight test method. After some remarks by Mr. Morrow the meeting closed. A hearty vote of thanks was tendered the lecturer for the very able manner in which he delivered his learned lecture.
