Recollections of a Private Secretary

(Continued From Page 9)

in a body pushed McLennan to the foot of the platform. If a blow had been struck, I never doubted that the place would have been turned into a butcher's shop; for that section of Nova Scotia has a bad name for its sanguinary fights.

THE WORST THAT HAPPENED, HOWEVER, WAS THAT THE MEETING WAS TAKEN COMPLETELY OUT OF THE HANDS OF THE CONSERVATIVES AND THEIR AMBASSADORS WERE COMPELLED TO RESIGN.

SECRETARY A BUFFER I treaded the buffers, because of my relations to Sir Charles as a secretary for whatever happened of an adverse nature. Like being kicked down stairs, it was possible to get used to it; but impossible to grow fond of it.

cannot be established. Nevertheless, the large number of analyses of Canadian soils made in these laboratories during the past thirty years permit us to make the following statements in respect to the essential plant food percentages.

Phosphoric Acid: The phosphoric acid in Canadian soils of average fertility usually lies between 15 and 25 per cent. Some very good loams contain from 25 to 3 per cent and a few exceed the latter figure.
