Tree Belts Aid To Prairie Gardens

In the ordinary sequence of events in the general protection of prairie farms, the establishment of tree belts is a first consideration...

It has been fully demonstrated that fruit of some kind can be grown anywhere on the prairies where conditions are suitable...

Fractors in selecting the site are convenience to building, taking advantage of natural contours so as to utilize as far as possible the natural spring run-off from melting snow collected by the shelter belts...

CANADA'S TALK MAKE BILLIONS OTTAWA, April 8—(CP)—Canada has no less than 3,200 different telephone systems according to latest telephone statistics issued by the Dominion Statistician.

Bristol And Vicinity

Friends of Mrs. Catherine Alyward will regret to learn she fell on the stairs of her home last week. The extent of her injuries has not been learned but she is unable to leave her bed.

Miss Mary McDonald, daughter of William McDonald, section man C. N. R. here spent a few days in the city last week with her friend Mrs. Hammond Godkin.

Mrs. James A. O'Brien, wife of James A. O'Brien, retired section-man O. N. R., Morell, was in the city last week.

Quite a number from this district were in the city Friday and Saturday including Mrs. Ernest Baker, Mary McDonald, Alice Drake, Irvin Drake, and Mrs. Charles Mosher.

Mrs. Arthur Blackland, Morell, was in the city over the week-end.

Friends of Raymond Jay, Morell will be pleased to learn his condition is very satisfactory at time of writing.

Mr. Barney McDonald left last week for Halifax, where he expects to be employed.

Miss Eunice McDonald clerk in the Bristol Post Office, was in the city a few days last week on business.

Miss Mary McVarish, who has been home for sometime taking a well earned rest, was in the city over the week-end.

The boat building course at Morell came to a close on Saturday last owing to army calling and others leaving for employment elsewhere. The students were changed several times only a few of the opening class followed the course through. The class as last year was under the direction of Mr. Frank McEwen, well known boat builder.

Mr. Bernard McDonald has returned to his home in Morell, after spending the winter in Halifax, Mr. McDonald was called home to help his father during the fishing season.

Mr. Lloyd Cox well known lobster packer, will carry on packing at Morell this season. In other years he used the old stand at St. Peter's Harbor. The co-operative factory at St. Peter's Harbor will be in operation it is understood again this season and your writer is informed that Mr. Raymond Peters St. Charles will be foreman. Mr. Peters is well known around this old Harbor having worked here many years.

Pte. Eldon Drake has arrived from the main and for a short stay. The last time Pte. Drake visited his home here it was on a sad mission being called to attend the funeral of his last brother Pte. Earl Drake who was killed in a car accident in Charlottetown.

Several teachers from this vicinity are attending the Teachers Federation in Charlottetown which will be followed by their Easter holidays. At present there is a calling for teachers as many have gone to Ottawa.

Many friends of the late Vernon McDonald, were sorry to hear of his sudden passing last week from the dreaded spinal meningitis at his home here in Hillboro a few miles from here. Mr. McDonald was only ill about three days. He leaves a wife, formerly Nellie Keefe Morell and three children.

Mr. Joseph Lapierre, who served his thirty days training a short time ago has been re-called to the service and returned to the City on Thursday and will go to some part of Canada this week.

Young men from here have almost all gone into the army or other work in the defence of Liberty and only a very few remain to carry on home duties.

Car drivers were sorry to learn 31 611 439 were Long Distance calls. The average number of conversations per telephone in 1939 was 1-986 or 245 per capita. These telephone talks travelled over a network of voice highways comprising 5,818,320 miles of wire. The pole line mileage was 212,603-25.96 miles of wire per mile of pole line. The cost of property and equipment for this vast talk-track was \$35,160,208. It required 17,636 men and women to extend, operate and maintain this plant and they received in salaries and wages \$26,526,374.

Plants In The Home And How To Grow Them

If new clay pots are used for growing plants in the home, they should be soaked in water for a time and dried before using, states Isabella Preston, Horticultural Division, Dominion Experimental Farms Service. Old pots should be thoroughly scrubbed inside and out. Before filling the pots with soil, a few broken crocks should be placed over the drainage hole. Pots should not be larger than is necessary to hold the roots. It is better to start a plant in a small pot and then re-pot it into a larger one when the roots have filled the small one. When plants are in active growth fertilizer may be given. The tablets sold under various trade names are the easiest to use on potted plants in the home.

The soil used in the pots should be fairly rich and porous so that water drains out of it easily. A compost made up of three parts good loam, 2 parts leaf mould, and one part sand with about a tablespoonful of bone meal to a quart of mixed soil, will suit most plants. All should be thoroughly mixed and slightly moistened.

The chief difficulty encountered in growing plants in the home is the hot, dry atmosphere. This can be controlled to some extent by keeping dishes of water on the radiators and spraying the plants with a mist-like spray of water. The spraying helps to destroy insects and, by keeping the foliage of the plants free from dust, encourages good growth. Light in another necessary element. This can be obtained for several hours is required for most flowering plants, but ferns and other plants grown for their leaves will do well without sun. Fresh air is essential but draughts and sudden changes of temperature must be avoided. Further information may be obtained from the Horticultural Division or from Notes on the Culture of House Plants issued by Publicity and Extension of the Horticultural Division or, of Agriculture, Ottawa.

Sanctuary System In James Bay Completed

Established by the Department of Mines and Resources of the Akimiski Island Bird Sanctuary, in the western part of James Bay, Northwest Territories, complete system of four sanctuaries for the protection of the great flocks of wild geese and wild ducks, as well as other kinds of wild life, has been completed. In addition to Akimiski Island Bird Sanctuary the system includes the Hamnan Bay Sanctuary, and the Twin Islands Game Sanctuary. The Hamnan Bay Sanctuaries were established through the complementary action of the Ontario and Dominion Governments and Quebec and the Dominion co-operated to set up the Bostwain Bay Sanctuary. The Twin Islands in the Northwest Territories were made a complete game sanctuary by the Dominion Government, affording protection to many nesting geese and also to a considerable population of polar bears. Beavers in the area are being conserved not only by trapping regulations, but also by several extensive beaver reserves on the mainland and on the two largest islands in it.

Although the region around James Bay has been visited and inhabited by white men since the time of Radisson and Groselliers in the seventeenth century, the white population has never been dense. Consequently, the conservation of wild life did not become an acute question until about 1931, when the completion of a railway from Mooseport, on the west end of James Bay, and growing use of the aeroplane made the region more readily accessible.

Outside the sanctuary areas a vast expanse of country around James Bay is still available for lawful hunting in open season. The sanctuaries were established with a view to protecting the requirements of the native population, and maintaining the stock of wild life intact. The wild life of the area comprises vast flocks of snow geese, Canada geese, and wild ducks, and many beaver and other fur beavers that are the principal support of the local population. It is of great potential value to Canada as a whole. The waterfowl, being highly migratory, are of interest to hunters along their routes of travel from the Arctic regions to the Gulf of Mexico.

that no effort will be made to open the paved roads unless the weather takes a sudden change. Owing to freezing at night and no warm winds the snow has settled very little, if any, in the country.

Mr. August Lapierre, head chef at one of the Government buildings in the City spent the week-end at his home here.

The opening of the Starch Factory at St. Peter's Harbor has good news for farmers who have a lot of spuds they were unable to sell last fall. Owing to the great rush at the factory and the early winter weather thousands of bushels were refused.

On Palm Sunday at the Little Flower Church Morell, palm was given out after the early mass. This year sprigs of the palm will be sent to friends in all parts of Canada and to England as a remembrance of the home town they have left behind.

Mrs. John J. Perry was a visitor to the City last week.

The great snow banks leads one to believe this will be a late spring, an old timer says that some forty years ago farmers were seen working on the land April 2th and people had been travelling on wheels from February 10th when the early snow disappeared that year.

Mr. Patrick Baker, arrived from Halifax last week, where he was employed during the winter. Mr. Baker is now preparing for the fishing season.

Mr. Gordon Coffin was in the City Saturday.

Miss Catherine Sanderson, Charlottetown spent the week-end in Bristol and Morell, visiting her many friends. Miss Sanderson was employed in Bristol, for ten years before moving to the city and her many friends here are always pleased to see her around again.

Plans are underway to stage an Easter Dance in Morell, hall.
