Kryptok Double Vision Lenses

If one is wearing glasses for distance vision.

When the ages of forty to forty-five years is reached one needs another pair of glasses—a pair for reading and a pair for distance vision. Kryptok combine these two pairs into one, the upper half of the lens for distance vision and the lower half for reading. Kryptoks are not two lenses cemented together—they are two strengths of glass fused into one.

They have no seam or uneven surface to catch the dirt or confuse the vision, and in appearance you cannot tell them from an ordinary single vision lens.

We specialize in "Kryptoks".

RHEUMATISM A MYSTERY

Some diseases give immunity from another attack, but rheumatism works just the other way. Every attack of rheumatism invites another; worse than that, it reduces the body's power so that each attack is worse than the one before.

If any disease needs curing early it is rheumatism, but there is scarcely any disease that physicians find more difficult to treat successfully. When a medicine does cure rheumatism therefore it is worthy of special notice. Medical authorities agree that the blood becomes thin with alarming rapidity as rheumatism develops. Maintaining the quality of the blood is therefore a reasonable way of preventing and combatting rheumatism. That it works out in fact is shown by the beneficial effects which follow the treatment of rheumatism, acute, muscular and articular, with that great blood tonic, Dr. Williams' Pink Pills.

That thousands of people who have taken Dr. Williams' Pink Pills for their rheumatism have been cured is a fact beyond dispute. That rheumatism does not return as long as the blood is kept rich and red is equally true. If therefore, you are suffering from rheumatism in any form you should lose no time in giving Dr. Williams' Pink Pills a fair trial. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

PARTIALLY ROASTED BY GERMAN GUARDS

LONDON, June 2.—In an interview C. J. Seitz, a South African infantryman from Kimberley, who has just escaped from Germany describes the diabolical cruelty of the German guards. Because he refused to work on munitions he was knocked unconscious with a belt buckle, then kicked mercilessly and tied to a furnace door and partially roasted, the skin on his arms, body and face coming off in ribbons. Next he was placed in a cold chamber where he suffered agony. Subsequently he was placed in a coal mine where he collapsed through lack of nourishment.

The Germans turned the fire hose on him while prostrate, buffeting him about until he was nearly killed. He was then left lying in the open, the cold wind piercing his saturated and scanty clothing. Seitz asserts he was at death's door on six occasions from semi-starvation and hard labor. His bones are still almost protruding through his skin. He was made a prisoner in July, 1916.

APPEAL FOR THRIFT BY SIR GEO. E. FOSTER

Have your Old Clothes Patched and Darned, Says Minister

OTTAWA, June 2.—Sir George Foster, acting premier and minister of trade and commerce, delivered a striking sermon on thrift to members of the Methodist conference of Montreal and Ottawa. Said Sir George, "How many of you are eating one white less? How many of us are wearing one white less? How many of us are using one white less of gasoline? How many of us are wearing clothes that we ought to be ashamed of in war time. While we are more than clothed millions have not enough clothing to protect them. It gets my goat to see women in the middle of July flaunting costly furs on their necks, and they are no more to blame than many of you men. You do not realize what obligations Canada has to fulfil to pay for her share in this war. You cannot, you must not spend a nickel foolishly. The worst is yet to come, and we must pay the bill out of what we earn and save. Wear the clothes that you used to wear one year for three. Get them patched and darned. No one, not the child of three can afford to spend one unnecessary nickel."

I. O. D. E. CHAPTERS COLLECT \$1,044,205

TORONTO, June 2.—Unless the National Council of Women of Canada repudiates their connection with the enemy countries, there is an end to the federation of that body with the Imperial Order of Daughters of the Empire, according to a resolution unanimously adopted by the I. O. D. E. convention this morning.

The secretary's report stated that no less than 575 men had been practically restored to health at the I. O. D. E. hospital, Hyde Park. The annexes to the Maple Leaf Club in London had accommodated with beds an average of 250 men per night. Up to March 23, 1918, 47,837 beds were provided, and 691,366 meals served to men recently arrived from Canada "on landing leave." The order had now 700 chapters, and a membership of 45,000.

PURE RICH BLOOD PREVENTS DISEASE

Bad blood is responsible for more ailments than anything else. It causes catarrh, dyspepsia, rheumatism, weak, tired, languid feelings and worse troubles. Blood's Sarsaparilla has been wonderfully successful in purifying and enriching the blood, removing serofula and other humors, and building up the whole system. Take it—give it to all the family so as to avoid illness. Get it today.

FIRE AT THE RECONSTRUCTION PLANT

Big Paint Shop and Several Smaller Buildings Were Burned

HALIFAX, May 31.—The paint shop at the Nova Scotia Car Works, now used by the Reconstruction people, was burned to the ground, and the main building damaged by fire, which broke out after two o'clock yesterday morning. At that hour the police on duty at the works noticed fire through a window of the paint shop. They immediately telephoned to the police station, and an alarm was rung in.

The fire evidently had a good start, or a few minutes after it was discovered the entire paint shop was in flames, and within half an hour the building was burned to the ground. The main building, which is situated to the southeast of the paint shop, also caught, but the firemen kept the fire there under control. A small office, used by workmen which is built on the side of the main building, and is within a hundred yards of the plant, was also burned.

In the paint shop was stored a quantity of paint, oils, putty, etc., and this is likely responsible for the headway the fire gained. The building was one hundred feet long, and thirty or forty feet wide, was of one storey with a pitch roof. The main building is quite a large one, and there is stored there large quantities of building materials, etc. None of the material is damaged by the water, except a quantity of lime.

An inventor, who is said to have once won a large prize from the Belgian Government for inventing a non-phosphorous safety match, has recently developed a match which, he claims, is waterproof, windproof, and also foolproof. After tests made by United States authorities, orders have been placed for a quantity of these matches, which will be especially serviceable in lighting signal rockets, certain types of bombs, and on shipboard in bad weather. Water does not harm them and in the face of a strong wind they will burn for five seconds at least. As soon as a blaze is extinguished the ash is cool, and the burned match can be thrown anywhere without danger of starting a fire. Because of this feature the new article is called foolproof.—Popular Mechanics.
