The road centre bore the resemblance of a veritable battleground after a fray. —FIRE AT KILDARE—Fire at Kildare Central the evening of the 8th inst., destroyed the barns and outbuildings of Mr. Patrick Foley. It is stated that the fire started in the boiler room of the pig-house, spreading thence to the barns and other buildings. The wind was blowing towards the residence, and a telephone message was sent in to Alberton. Fire Chief Leavitt got in touch with Engineer McKendrick and the chemical was rushed to the scene. The situation was bad on the arrival of the Alberton firemen, but they at once set to work and, by strenuous efforts, confined the blaze to the out-buildings. The residence caught fire several times, but this was always checked by the firemen and neighbors, although not without damage to the building. The furni-

damaged was in safety. The efficacy of the chemical was amply demonstrated and the directing orders and personal work of the Alberton Fire Chief and his men showed coolness and clearheadedness, which are vital factors in fighting fire. There was some insurance, but the amount is relatively small and will not cover more than a trifle of the loss.

Yesterday evening Major F. L. C. Bond, D. S. O., general superintendent of the Canadian National Railways for the Montreal District, arrived in the city. His private car came in on the 6:30 train. Major Bond, who is manager of the Montreal exhibition, is naturally much interested in exhibition work, and intends visiting the Provincial fair and is staying in this province until the end of next week. Major Bond visited P. E. Island before the war and has many friends and acquaintances in the Province. He served in France with the 10th Battalion Railways Troops and has had a distinguished engineering career.

The death occurred at Bristol, of Roderick McDonald, at the home of his son William on Saturday, June 15th, 1928, at the ripe age of 85 years. He was in fairly good health within two weeks of his death and despite medical and tender care he peacefully passed away on the above mentioned date. He was frequently visited in his illness by his beloved pastor, Rev. Father Rooney, who administered to him the last rights of the Catholic Church of which he was a devoted member. He leaves to mourn their loss, two sons and one daughter, James, William and Florence, all of Bristol, his wife having predeceased him four years ago; also one daughter who predeceased him eighteen years ago. He also leaves to mourn two brothers and one sister, John, of Charlottetown; Wallace of Pictou and Mrs. James McIntyre, Grand River, P. E. I.

The pall bearers were: Alex. R. McDonald, Angus R. McDonald, Hamilton McEwen, Albert McEwen, Donald McDonald and Joseph McDonald.

The Prince Edward Island Ayrshire Breeders' Assn. have sponsored a futurity class for Ayrshire calves at the Provincial Exhibition next week. The nominations for this event were made last June and the following breeders entered, named their cows, and paid their nominations: Several others made entries but did not make the second payment.

Fred McRae nominated (Pleasant Grove, Cora Grove.)

Athol Roberts nominated "Avonlea Lucky Bessie."

Earle McRae nominated "Christina Blanche."

Vernon McMillan nominated "Glenholm Daisy," "Greendale Primrose."

Bert R. Brown nominated "Brightside Helena," "Brightside Ida."

The Association now asks all Ayrshire breeders on the Island to enter a cow according to the rules for the 1930 Exhibition. The promoters of this futurity have been promised by a Maritime Exhibition Assn. the sum of \$50 provided they can secure 15 calves to be an exhibit at their fair.

This is the first time a venture of this kind has been attempted and we hope the Breeders and Ayrshire fans will be at hand on the day of judging this class and to see who gets the red ribbon for the calf and ask to see the "Bonnie Coo" who produced it.

Of exceptional interest to local fishermen and packers is the tour now being made of the codfish packing plants of the Province by Mr. G. R. Earl, of the department of Marine and Fisheries, Ottawa. Mr. Earl, who has been on the Island for the past month, has already interested quite a number of packers and dealers in improved methods of preparing cod for the markets. His survey, which has especially to do with the curing and boning of the fish, is meeting with a gratifying reception and already plants have been started at Naufrage and Souris, with another one shortly to be started at Rustico. The product already out has met with the hearty approval of wholesalers, who have expressed their desire of co-operating in every way.

The new process, which begins with bleeding the fish at the boat side, involves different methods of ripping and spreading, and has effected a saving in quantity as well as an improvement in quality. Mr. Earl states that the Fast Hornby of this city,

Head and French Village the fishermen are going into the business cooperatively and are quite enthusiastic over the advantage in quality product already secured through the new method. He has also received encouragement from Dominion fishery officials, who are following the experiment with much interest.

Local dealers have already assured Mr. Earl that the extra care in putting up a quality product is deserving of an advance in price to the fishermen and in every case, where the new product has been offered, they have voluntarily advanced the price. A difficulty hitherto experienced has been to secure the proper boxes for shipping. This problem has been met, and soon a sufficient number of boxes, manufactured on the Island, will be available and the trade will be supplied regularly with superior quality Island product in any quantities, desired, put up in standard 30 pound boxes.

Mr. Earl states that his great desire is to see the Maritime Provinces selling their fish on the English markets. He believes that this will be done within a few years. Brine freezing will play an important part in this connection, as it is already proving itself very successful. At present, in this Province, we are concentrating on the salt-curing process, but within a year he believes a brine freezing plant for hal will be established and will be of great assistance to the industry.

A number of friends and neighbors gathered at the home of Mr. and Mrs. John A. MacKenzie, of Ocean View on Friday evening June 28th, for the purpose of giving a house warming. The evening was spent in dancing and music, the violin music was furnished by Mr. Angus L. MacLean of Garfield. Dainty refreshments were served all present at the close of the evening. An address was read by Miss Marjorie MacLean, of Lewis and Mrs. MacKenzie with a sum of money. The recipients thanked the donors for their kindness. The address is as follows:—To Mr. and Mrs. MacKenzie—

This is the second occasion in a comparatively short space of time upon which we have made, what we consider to be a surprise visit to this house. On the last occasion, as you know our object was to bid farewell to the late occupants of this home. Tonight our object is of a different nature, that of extending to you a hearty welcome as neighbors. We hope that you will participate in and enjoy the various activities of the social side of our community life. We trust that everything pertaining to the welfare of our district will have your hearty support and co-operation. The number of vacant homes in our midst bears mute testimony to the fact that many of our people have left us to seek their fortunes in other parts of our broad Dominion and in the land of the Stars and Stripes. Hence it is a source of pleasure to us to welcome new residents who like their native country well enough to settle in it and contribute of their energy to its advancement and development. In concluding our address we ask you to accept, as a token of our friendship, this gift together with our best wishes for your health, happiness and prosperity.

Signed on behalf of your friends: Mrs. John W. MacKenzie, Mrs. Hector Gillis, Mrs. Wilfred MacWilliams.—O.
