

THAW IS STILL AT COATICOOK

(Canadian Press) Coaticook, Sept. 4.—Thaw was not railroaded across the border by the immigration authorities today as his counsel expected. The special board of enquiry sat all day and was adjourned till tomorrow. Thaw was on the stand most of the day and made a good witness. Toward the end of the investigation the inquisitors gradually worked into the question of sanity though the counsel objected, without avail. Though staying off deportation for a day or so Thaw lost two participants; his lawyers were refused a writ of prohibition by Superior Judge Hutchinson and he failed to establish before the board of contention that as he entered Canada on a tourist visit like Jack Johnson he should be allowed to go to his destination. If found insane it is within the power of the board to deport Thaw direct to New York State. Thaw's lawyer, desponding of defeating the deputation have at last begun to make plans to arrest his extradition to Vermont. Unless Thaw is kidnapped to New York State line the lawyers hope to fight on in the States.

MORE SUCCESSES FOR P.E.I. HORSES

D. DOROTHY WINS 2.17

(Special to The Guardian) HALIFAX, Sept. 4.—Two races were run off to-day at the Halifax Exhibition—the 2.17 trot and free for all. Devilish Dorothy, owned by Dr. J. T. Jenkins, of Charlottetown; Vesta Boy, owned by Leonard McNeill, Summerside, and Baby Logan were the island entries. The free for all was won by Frank Patch in easy style. He seemed to be fully equal to his previous best. Vesta Boy raced well in the second and third heats, electrifying the spectators with his fast finishes. In the 2.17 trot Dr. Sharper, of Sydney, was the contending horse, the finishes were being very close. Various rumors are afloat about him and he will probably have to be identified. He seemed to be able to step very fast. Dorothy trotted beautifully, never making the slightest skip or break. The third heat she lost to Dr. Sharper by a nose. Fred Cameron got quite an ovation when he won the fourth heat and race with Dorothy. SUMMARY.

POSITION OF FORESTERS BECOMES IMPREGNABLE

TORONTO, Sept. 4. (Special)—The Supreme Court of the Independent Order of Foresters, has been meeting all week. This session of the Supreme body has been the most important that has ever held in the history of the society. The adoption of the I. O. F. bill and the acceptance of Plan No. 1 of that bill, which provides for the extinguishing of the actuarial deficiency, now places the Foresters in the position of being the largest fraternal insurance organization that is conducting fraternal insurance on adequate rates. Plan No. 1 was adopted by practically unanimous vote. While the question of actuarial solvency and financial affairs of the order have occupied the attention of the Supreme body for the first two days of this session, the fraternal portion of the work has engrossed the balance of their time. The Orphans' Home Sanatorium, Purple Cross Nurses, and a number of other benevolent features of the society have been under review. During the discussion yesterday many interesting facts were elicited. In one jurisdiction it was reported that some \$32,000 had been spent in relief and hospital work, a large portion of this money being entirely voluntary. In another large city it was pointed out that the Subordinate Court employed two nurses permanently to care for and nurse sick and disabled members of the order, and in another jurisdiction over eight hundred statements had been procured for various members. Another report was

(Continued on page two) solute decree, dispensing with parliament and abolishing the freedom of the press. The discontent under Carlos was not lessened when Manuel came to the throne. Students of Portuguese affairs predicted that the monarchy would soon be overthrown, and the revolution of October, 1910, which ended in the flight of Manuel from Portugal, was not a great surprise. When he was king, it was believed that Manuel would take an English bride. At the time of his trip to England, in 1909, it was said that he would ask the hand of Princess Patricia of Connaught or of Alexandra of Fife. The possibility that he might marry the daughter of Emperor William was also rumored while he was on the throne. But all of those rumors died away after he was deposed. Princess Augustine of Hohenzollern, the bride of his choice, brings Manuel a plump dowry, which may be useful to the former king in the event that he attempts to stir up affairs in Portugal with a view to regaining his throne.

RATHER BUY THAN RAISE POTATOES

MONTGOMERY, ALA., Sept. 4.—Despite the fact that central Alabama has a soil splendidly adapted to the growing of Irish potatoes, the late crop which is now being gathered is so small that it is not sufficient to supply the demand of the State for two weeks. Much disappointment is expressed at the State agricultural department, where the principal effort of the past year has been the preaching of the "doctrine of diversification." Instead of planting a variety of crops the farmers generally have placed their entire reliance in cotton. Fortunately the cotton crop this year is good and no great inconvenience will be felt, as money will be plentiful and the farmer can afford to pay the price asked for northern potatoes. More general diversification is expected next year, however, as even the most sanguine cotton farmer does not hope for four big cotton years in succession.

NECESSITY FOR PROPER SEWERAGE FLIES AND DISEASE.

There is hardly any necessity to state that the fly nuisance in Charlottetown is just now almost unbearable. Citizens know that only too well. In spite of screen doors and windows, it is impossible to keep the pesky creatures out; and in spite of fly paper, "tangle-foot" and the like, it is nearly as impossible to exterminate those that invade the house. Flies are the greatest carriers of filth; it is their staple food. They are therefore the greatest germ carriers. According to Dr. Johnston, the Health Officer of the City, the presence of so many flies is not far to seek. "Wherever there are water closets it is a very difficult matter to keep the fly nuisance down," was the significant statement he made yesterday to a Guardian representative. "Flies," Dr. Johnston proceeded to say, "are great germ carriers. They carry the germs of typhoid, scarlet fever, tuberculosis, diphtheria. These diseases are getting very prevalent in Canada." "Moreover," he said, "flies are the carrying agents of celebr spinal disease of which just now there is an alarming prevalence in Montreal. It is a contagious disease, and has not to such a stage that it has practically been put on the list of notifiable diseases."
