TAKE CARE OF Your Eyes

Few people have any idea of the complex and delicate construction of the human eye.

As a result very few persons give to their eyes anything like the care that their importance calls for.

Many persons continue to suffer from pains in the region of the eyes, from headaches, blurring of vision and other symptoms of serious eye-sickness in ignorance of the fact that such foolish treatment may cause these symptoms to develop into dangerous and incurable eye-sickness.

If you have any reason to suspect the presence of eye-sickness, or any other ailment of the eye, consult with the expert who has been the last rest of your eyes.
