NEWSY FARM NOTES

By Agricola

EYES AN NO EYES

Early in the nineteenth century there flourished a coterie of writers, principally women, who depicted rural life in Great Britain with great fidelity, and no inconsiderable sense of humor.

WEEDS ON LAWNS

Townfolk are justly proud of their lawns, but some like myself are troubled with three principal weeds, the dandelion, the plantain, and the July-flower.

Maritime Air Pageant

MONCTON, June 8.—Eastern Canada's first air pageant, known as "the Maritime air pageant," inaugurating the new Moncton government licensed airport, on July 1 and July 2, promises to attract a score or more aircraft of various types from all over eastern Canada and the United States.

Early Hay Making

John M. F. MacKenzie, Dominion Experimental Station, Fredericton, N. B.

When forage is cut early the hay is more digestible, contains a higher percentage of proteins and is more palatable than if it is allowed to ripen before cutting.

This is especially true of legumes because the leaves which are not only the most digestible but are also the part of the plant which has the highest percentage of protein either drop or become so brittle when the plants are mature that it is practically impossible to prevent their breaking off when the hay is being cut.

At the Fredericton Experimental Station it has been found difficult to save the leaves of red clover when more than one-third of the heads were brown at the time of cutting.

At the Fredericton Experimental Station a fifteen year average shows 0.79 inches less rain and 15 hours more sunshine in July than a better hay making month than August and when hay making is started early it is often possible to avoid the severe weathering which has always such a deleterious effect on mature forage.

Weeds and Weeding

Weeds cause great loss every year by reducing the yield, increasing the cost of production of farm crops and also reducing the sale value of farm lands.

Canada Welcomes Church Delegates

ON BOARD THE S. S. DORIC, ST. LAWRENCE RIVER, June 8.—Canada tonight extended her first welcome to the greatest religious pilgrimage to leave the shore of England since Richard Coeur De Lion led his glittering hosts in the crusades, when representatives of the United Church of Canada, the railroads and the press boarded the White Star liner Doric at Rimouski, Que., to welcome the 1,055 pilgrims from the British Free Church, who will spend a week in the Dominion studying the results of church union in this country and in sightseeing.

MRS. MARY O. FLAIGER

PICTOU, June 10.—The death of Mrs. Mary O. Flaiger, widow of the late Henry W. Flaiger, of Pictou, occurred at the home of her daughter, Mrs. H. B. Harper, New Germany, on Thursday, June 6. Mr. Flaiger, who was sixty-seven years of age, had been ill for only a week. Death was due to pneumonia.

Before her marriage she was Miss Mary O. Mason, of Merigomish and, with her husband and family came to Pictou about thirty years ago from Charlottetown, P. E. I. During the years of her residence here she made many friends. She had enjoyed good health and being an exceedingly active woman news of her death came as a shock here, few of whom had known that she was ill.

She leaves a family of eight: Mrs. Fred Hartz, Mrs. Dan Talbot and Mrs. E. R. Crowe, of Pictou; Mrs. H. B. Harper, of New Glasgow; Mrs. Lottie Rollins, of Allston, Mass.; Mrs. Herman A. Lawson of Providence, R. I.; Harry Flaiger of Boston, Mass., and John Flaiger in New Zealand. She is also survived by one sister, Mrs. Kenneth Forbes, of New Glasgow, and a large number of grandchildren and great grandchildren.

The body was brought to Pictou yesterday and the funeral will be held on Sunday afternoon from the home of her daughter, Mrs. E. R. Crowe, Denoon Street, to Haliburton cemetery, the service commencing at 1.

Watch For The Cucumber Beetle

Director of Publicity, Dominion Department of Agriculture, Ottawa.

One of the earliest of garden crop enemies is the striped cucumber beetle, a small insect 1/4 of an inch in length, which feeds on such plants as cucumber, squash, pumpkins, melons, etc. It is yellow in color, with a black head and three longitudinal black stripes down the back.

These insects have already been seen in this district, and growers with large patches of any of these plants would be well advised to watch them closely for the first appearance of the cucumber beetle. If any appreciable damage is being done control measures should be taken at once.

An effective treatment is the dusting of the plants with a mixture of calcium arsenate and gypsum (sand plaster) using one part of the former to 20 parts (by weight) of the latter. The young plants should be thoroughly covered, both the upper and lower surfaces of the leaves as the insects feed in both situations.

To be successful dusting should be commenced at the first appearance of the beetles as they work very fast and much damage is often done before the grower, who is not on the look out for them, is aware of their presence. Three or four applications a few days apart, depending upon the severity of the attack, are usually sufficient to hold the beetles in check.

If further information is required apply to the Publications Branch, Department of Agriculture, Ottawa, or to Entomologist in Charge of Vegetable Insect Investigations, Dept. of Agriculture, Ottawa.

BEDEQUE AND VICINITY

Miss Annie Enman, teacher of Sherbrook school, spent the week end with friends in Chelton.

Among the many who were in Summerside on Monday, June 3rd, were the following: Mrs. Cyril MacFarlane, Mrs. Walter Yould, Miss Minnie Anderson, Fernwood, and Miss S. La Calet, Bedeque. Mrs. William Craig, Lower Bedeque.

God cows sold up to \$12, with just medium kinds up to \$11, good cows sold for \$9.50 and common to medium qualities cows from \$6.50 to \$8.50. Bulls were from \$6 to \$10 and canners and cutters from \$3.50 to \$5.

Quotations; butcher steers. Good \$11 to \$12, medium \$10.50 to \$11, common \$9 to \$10.50; butcher heifers, medium \$9.25 to \$10, common \$8 to \$9.25; butcher cows good \$9 to \$9.50, medium \$6 to \$8.50; canners \$3.50 to \$4; cutters \$4.50 to \$5; butcher bulls good \$9 to \$10, common \$6 to \$8.

Calves receipts 3918, the calf market was steady to a shade easier on common quality calves. Good calves weighing 130 pounds and over brought from \$11.50 to \$13, with lighter veals from \$10 to \$11. Common to medium calves were sold for \$7 to \$9.75 with a few lots as low as \$5. The bulk of the common calves brought from \$7 to \$7.75. Quotations: Good veal \$10 to \$13, medium \$8.50 to \$10, common \$6.50 to \$8.25.

Sheep receipts 4541 lambs were steady and were sold for \$16 to \$18 with a few good lambs at \$20. Sheep were from \$6 to \$6.50. Lambs, good \$18 to \$20. Commons \$16 to \$18.

Hog Receipts 2353—Hogs were steady at \$13.75 for those of good quality and \$13 to \$13.50 for mixed lots. On one market where less than 200 hogs were on sale the price was \$13.75 with 25 hogs at \$14. Sows from \$10 to \$10.75.

Jolly Good Fellow" Mr. and Mrs. Craig thanked their friends very kindly for remembering them. Ice cream and cake were then served by the ladies, and the remainder of the evening was spent in music and dancing after which all dispersed to their homes feeling that they had spent a very enjoyable time.

VERNON SCHOOL

The following is the standing of Vernon School for the month of May. Grade X—1 Harold Fraser, 2 Mary Henry, 3 Carmena Fraser. Grade VIII—1 Louis Sullivan.

Beautifying Farm Homes

In order to encourage the beautifying of Farm Homes in the Province His Honor Lieutenant Governor Hartz has donated three silver cups one for each county, to be awarded to the person showing the greatest improvement in the appearance of the home

In awarding the cup, the judges will consider improvement in painting, whitewashing, fencing, planting of trees and flowers, care of front grounds and entrance driveways

Any person wishing to enter the competition may do so by making application to this office not later than June 30th in order that the initial examination may be made as early as possible. The final examination will be made in September. If possible arrange to have photos of grounds before and after improvements are made

DEPARTMENT OF AGRICULTURE

Grade VII—1 Mary Gorman, 2 Joseph McCormack. Grade VI—1 Jackie Sullivan, 2 Willard Murray. Grade V—1 Irene MacDonald, 2 Gladys Huntley, 3 Margaret Sullivan. Grade IV—1 Florence Fraser, 2 Lona Fraser, 3 William Martin. Grade III—1 Felicity Doherty, 2 Vincent Larkin, 3 Jay Sullivan. Grade II—1 Mae Martin, 2 Willard Larkin, 2 Alphonous Larkin.

Watch Your Foxes Summer Diet

The summer diet is a most important one, great care should be exercised in selecting the proper foods. Meat feeds should be reduced to a minimum and supplemented by cereals and vegetables. IMPERIAL FOX BISCUITS fed dry and IMPERIAL PUPPY FOOD with milk added make the ideal summer cereal ration for both adults and pups. These two highly nourishing foods ensure a balanced ration together with an abundance of minerals and most valuable Vitamines. IMPERIAL FOODS keep the foxes in good flesh and make them generally healthy and active. IMPERIAL eliminates premature shedding generally caused by excessive meat feeding or an unbalanced diet, and make for better pelts when prime.

Always keep a good supply of IMPERIALS on hand, feed them liberally and you will reap results in highest class foxes with highest-priced pelts.

For sale by leading dealers in all business centres or direct from factory.
