

**Thousands of Nursing Mothers
Sound the Praises of
Malt Breakfast Food**

Malt Breakfast Food has brought more health and comfort to the homes of Canada than any other food preparation. Mothers find it an invaluable food during the period of nursing, as it provides the most ample nutrition for keeping up health and strength; it promotes to a marvellous degree the secretion of milk. Malt Breakfast Food is recommended every day by physicians to nursing mothers, because of its many advantages as a concentrated nourishment. No other food is so easily and so rapidly digested and assimilated, and no other contributes so much to general health building. If the mother's stomach is weak and capricious, let her try Malt Breakfast Food for a week; it will soon establish perfect digestion, healthful circulation and a well regulated nervous system.
