KEEPS TEETH SPARKLING

Will Cut Off 70 Per Cent Of Italy's Exports, Is Belief

(Continued from Page 1)

Dr. Vasconcelos of Portugal chairman of the committee of 52, said he would undertake to determine the attitude of non-League states on the question of the trade embargo with Italy.

He will endeavor to learn if these countries will export to Italy various key products, especially raw materials such as gasoline, coal or copper.

The committee of 52 also adopted a resolution authorizing the president to send this communication tomorrow to non-member states.

"The President of the committee of coordination on measures to be taken under Article XVII of the Covenant has the honor to transmit herewith to states which are non-members of the League, in accordance with the decision of the coordination committee appointed by the assembly Oct. 10, the principal recent document in the Italo-Ethi-

opian dispute, including minutes of the assembly Oct. 9 to 11, and recommendations of the coordination committee.

He is instructed to add that the governments represented on the coordination committee would welcome any communication which any non-member state may deem it proper to make or notification of any action which it may be taking in the circumstances."

The general committee also voted to extend assistance to members which are hurt by the blockade against Italy, notably nearby countries such as Rumania and Turkey.

A committee recommendation to shut off the Passat kingdom from "key products" for manufacture of war materials also was approved by the League.

Additional sanctions probably will not be considered seriously until Oct. 31.

campaign.

The talks with London were said to be "restricted solely to the Mediterranean problem."

The assurance given to Mussolini Friday by Sir Eric Drummond, the British Ambassador, that Britain intended only collective action through the League of Nations, quieted somewhat the fears of a blockade.

foreign trade. The government passed a decree forcing the exportation of silk, by ordering a requisition at 10 percent under the world's price. This is to encourage the holders of silk stocks to market them abroad.

The decree applies only to 1934 production. Italy exports about half of her 7,000,000 pounds of silk annually.

Italians Sail For Homeland

NEW YORK, Oct. 20.—More than 100 native Italians from the United States and Canada are on the Atlantic tonight, bound for their homeland and the African wars.

The group, a cheering, singing body of young men sailed yesterday on the Italian liner Rex to join Mussolini's volunteer legions.

As hands played the Italian national anthem and a crowd estimated at 4,000 cheered wildly from the pier. Gaetano Vecchiotti, Italian Consul in New York, officially bade farewell to the contingent.

Of the thousands of Americans of Italian descent who offered their services, he said, none was accepted. Those who sailed were all bachelors and Italian citizens.

A federal statute passed in 1918 provides a three year jail sentence or \$1,000 fine for U. S. citizens who enlist in a foreign army.

A check of the liner's passenger list showed that a few were from Canada. The Consulate here said that volunteers from cities other than New York had paid their own rail fare. Their ocean passage was paid by the Italian government, and they will be reimbursed for other transportation costs upon their arrival in Italy.
