

P. W. C. Students Who Graduate Today

Top row, left to right: Cameron Anear, Lower Montague; Anna Bennett, Charlottetown; Dorothy Bentley, Charlottetown; Niall Burnett, Charlottetown; Lorne Callbeck, Charlottetown; Bernice Cullen, Sherwood; Dorothy Cullen, Sherwood; Owen Curtis, Charlottetown; Marjorie Fraser, Charlottetown; Flora Gordon, St. Stephen, N. B. 2nd row: Harold Hughes, Emerald; Frederick Large, Charlottetown; Aiden Leard, Bedeque; Alfred Linkletter, Northam; Horace MacEwen, Charlottetown; Jean MacEwen, Morell; Helen MacKie, Charlottetown; Anna MacLaren, Georgetown; Richard McQuarrie, Victoria; John Matthews, Elmsdale. 3rd row: Lois Miller, Charlottetown; Maitland Owen, Charlottetown; Penelope Pray, Charlottetown; Doris Prowse, Charlottetown; Lemuel Prowse, Charlottetown; Allison Rogers, Charlottetown; Marjorie Shaw, Charlottetown; Evelyn Simmons, Charlottetown; Olga Toombs, Charlottetown; Rosella Williams, Charlottetown.

COLLEGE CLOSING EXERCISES

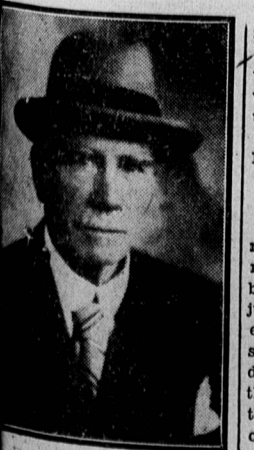

The annual Convocation of Prince of Wales College will be held at 9:30 this morning in the College Assembly Hall. The speakers will be Hon. Dr. W. J. P. MacMillan, Minister of Health and Education, who will preside, Hon. F. McPhee, a member of the Board of Education, Mr. H. H. Shaw, Chief Superintendent of Education, Dr. S. N. Robertson, Principal of Prince of Wales College, who will give his annual report on the work of the year. Medals, prizes, diplomas and certificates will be distributed to the successful students. Mr. Alfred Linkletter will read the valedictory on behalf of the graduates.

HON. W. J. P. MACMILLAN, M. D. Provincial Minister of Education.

ORIGINAL P. W. C. CHARTER
The original Charter of the Prince of Wales College dated May 1834, which was sent to Mr. C. H. B. Longworth, President of the Alumni Society, by Mr. W. H. Jarvis, of Canton, Ontario, whose grandfather was Chief Justice Jarvis of Prince Edward Island at the time the Charter was granted by King William Fourth, has been suitably framed by the Society and hung in the library in the new building.

The Alumni Society has offered prizes to the third year student attaining the highest standing in science subjects in the present examinations.
The Alumni Society is increasing its membership daily and the membership now numbers well over one hundred—among the names of the recent new members who were past students of Prince of Wales College and who hold high positions are: Mr. Justice J. D. Hyndman, of Ottawa, of the Pension Appeal Court of Canada; His Excellency Archbishop J. C. McGuigan, of Regina; Mr. W. A. Found, Ottawa.

MR. H. H. SHAW, B.Sc. Chief Superintendent of Education

Deputy Minister of Fisheries; Mr. George McPhee, M. P., of Saskatoon; Dr. David MacKenzie, Montreal; Mr. Colin C. Ferguson, Winnipeg General Manager Great West Life Assurance Company; Mr. Justice Hazard, City; Mr. N. M. Campbell, Ottawa, who has recently been appointed to the new Tariff Commission; Professor D. C. Harvey, F.R.S.C., Halifax Archivist for the Province of Nova Scotia, D. J. Willis, Deputy Minister of Education, British Columbia.
It is hoped that many former students whose names are difficult to obtain will join the Society. Mr. J. P. Gordon is the Treasurer.

McGill Contracts Are Awarded

MONTREAL, May 24—(C.P.)—Contracts calling for the completion in 10 months of a new Neurological Institute of McGill University made possible by a grant of \$1,232,652 by the Rockefeller last year, have been awarded, according to an announcement by Sir Arthur Currie, principal of the University.
In addition to the Rockefeller Foundation gift many contributions have been made by prominent citizens as well as the Provincial and Civic Governments. They include: The Province of Quebec \$20,000 annually; City of Montreal, \$15,000 annually; Sir Herbert Holt, \$100,000; J. W. McConnell, \$100,000; Walter Stewart, \$25,000; anonymously \$25,000.

MODEL MACHINE SHOP FOR SAFETY CONFERENCE

MONTREAL, May 24—(C.P.)—A model machine shop will be the main feature in an exhibition to be held here this month in conjunction with the fifth annual Safety Conference of the Quebec Association for the prevention of Industrial Accidents. Equipped with the most modern machinery and all the latest devices, the shop will be operated by a special group of students from the Montreal Technical School. In addition the shop will have a modern first aid room.

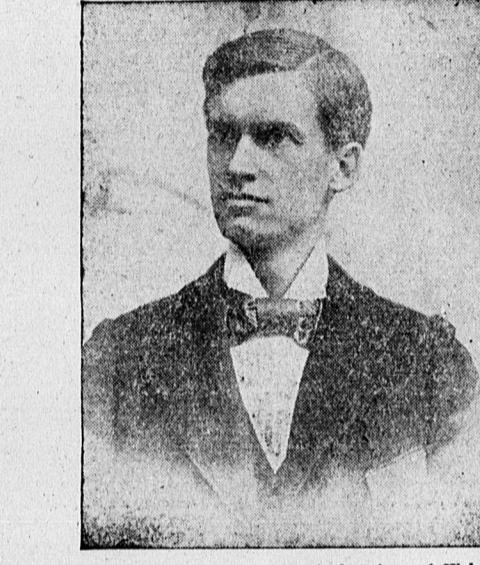

Pulp Shipment Reaches Mt'l.

MONTREAL, Que., May 24—Large quantities of Scandinavian pulp reached Montreal Saturday for trans shipment here by inland water way carriers to United States cities. The shipment arrived by the steamer Drammensford, of the Norwegian American line for which the Canadian National Steamships are agents in Canada.
Apart from the pulp the Norwegian craft brought a large cargo of other commodities and merchandise, also for shipment to U. S. centres. She left Gottenburg, in Sweden, April 29, and will sail for Scandinavian countries from Montreal about May 27.
Gottenburg is famed for its Gottenburg system, a plan for distributing hard liquors in such a way that profits over a certain amount are applied to public benefits.

TYPIST SCULPTURES IN HER SPARE TIME

A twenty-four year old London typist, Miss Valerie Clarebout, who has been studying sculpture in her spare time, mingled with famous painters and sculpturers at Burlington House on "varnishing day"—the day for exhibitors only, for she is one of the exhibitors.
A bronze bust of a man, which she submitted for this year's Royal Academy, has been accepted. It was the first time she had sent anything to Burlington House.
Miss Clarebout, a shy blonde, has been earning her own living since she was seventeen. Every evening she goes straight from the office to the Polytechnic to attend sculpture classes.

"Two years ago I began modelling in clay for amusement," Miss Clarebout said. "I found it easy, and started attending modelling classes at the Polytechnic.
"Last month I finished a bust of a man and greatly daring, sent it to the Royal Academy for this year's exhibition. To my utter amazement and delight it was accepted."
Miss Clarebout's was one among 12,000 works sent in—and it remains among the 1,100 accepted.

PROF. S. N. ROBERTSON, L.L.D. Principal, Prince of Wales College.

problem was emphasized by Dr. W. T. B. Mitchell, director of the Mental Hygiene Institute, Inc., at the annual meeting here.
"Probably there is today no social problem which rivals it for seriousness and importance. Any organized medical or social work effort which is failing to provide satisfactory leadership or guidance in the sphere of mental health is seriously inadequate," Dr. Mitchell said. "Some degree of mental illness is one of the most frequent cause of individual social failures. Attempts to rehabilitate such individual social failures, except through an intelligent plan for treating the underlying conditions, are bound to be costly, wasteful and disappointing," he said.

HEALTHY CONDITION A NECESSITY

MONTREAL, May 24—(C.P.)—Prevention of mental disorder and delinquent and criminal behaviour lies not in finding a new drug or serum but in providing satisfactory conditions for healthy mental growth and development—in recognizing and dealing with significant behaviour deviations as they occur in the developmental period and in the recognition and correct approach to adult individuals who are showing slight or serious personality or mental disturbances. That this is a fundamental social

It is not every calamity that is a curse, and early adversity is often a blessing. Surmounted difficulties not only teach, but harden us in our future struggles.—Sharpe.

Migrating Birds Get Rest Places

MANCHESTER, England, May 25—(C.P.)—The feathered "seasonal invasion" of the United Kingdom began in April and thousands of birds have arrived for their annual sojourn in this country. Special hostels built on lighthouses for migrant birds are at present packed to capacity nightly by voyagers bound for these shores. These consist of rows of perches above and below the lanterns, and they have been erected on various lighthouses.
Before these resting-places were built thousands of birds perished annually around the lighthouses and lightships during their passage to these shores. Attracted at dusk and in bad weather by those beacon lights, the birds fluttered around them in a vain search for perches until they fell exhausted into the sea. Hundreds of birds flung themselves again the glass panes of the lamps. The Royal Society for the Protection of Birds has therefore provided perches around the lighthouses, and so saved several species of birds from becoming lost to the British Isles.

BLIND COMPOSER GIVEN DEGREE

LEEDS, May 25—(C. P.)—The Court of Leeds University has decided to confer the honorary degree of Doctor of Letters on Frederick Dellus, the blind composer, a native of Bradford, England, now living in retirement near Paris. Mr. Dellus, owing to ill-health, will be unable to travel to this country, and the degree will be conferred in his absence.

Little Sophie—Father, what is executive ability?
Professor Broadhead—The faculty of earning your bread by the work of other people.

PROF. G. D. STEEL, L.L.D. Vice-Prin., Prince of Wales College

Science Aid Malaria Fight

(By Tacs. T. Champion, Canadian Press Staff Writer.)
LONDON, May 24—Far-reaching advances in the conquest of malaria—from which it is estimated that 2,000,000 people die yearly, and which it is said causes "more misery, sickness and death than any other disease in the world"—are recorded in the Ross Institute Report for 1932.
Anti-malaria measures described by the Northern Rhodesia Government as "comparable with the history-making anti-mosquito measures carried out under General Gorgas during the construction of the Panama Canal," were carried out by the Institute between 1929 and 1932 at the Roan Antelope and Mufulla copper mines.
The European death rate since June 1931, has been practically as low as that of England, and the native death rate has fallen from 34 per 1,000 in 1930 to under 10 in 1932, and there has been a notable reduction in the incidence of pneumonia.

"The foresight and wisdom of the directors of the copper mines in using to the full scientific knowledge in the prevention of malaria has far-reaching consequences in the whole of Africa south of the Equator," the report states. "Four years ago little practical anti-mosquito work had been carried out, but in the last two years the attitude of Government medical officers and laymen has been greatly altered as a direct result of the success of the malaria control measures on the mines."
Investigations on petroleum oils for malaria control have been made both in India and Burma, and research has shown that the poisonous effect of an oil on larvae is due to certain chemical constituents. A reliable anti-malaria mixture has been placed on the market as a result of these investigations.
"Some tribes are highly immune to malaria," states Dr. G. C. Ramsay, principal of the India branch of the Institute, "while others are highly susceptible—importing non-immunes or 'unsalted' labor into

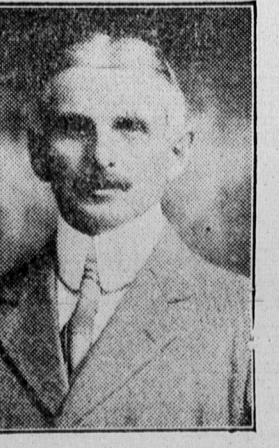

ALUMNI PRES. ENTERTAINED GRADUATES

Mr. and Mrs. C. H. B. Longworth Entertained the Graduates of Prince of Wales At Tea Yesterday.

Mr. C. H. B. Longworth, President of the Prince of Wales College Alumni Society, and Mrs. Longworth, entertained at tea at Hillhurst yesterday afternoon for the Third Year Class of the College.
Mr. and Mrs. Longworth were assisted in receiving by Mr. Niall Burnett, President of the Third Year, and Miss Dorothy Bentley, Vice President. Among the guests were the Minister of Education, Hon. Dr. MacMillan, and Mrs. MacMillan, His Worship the Mayor and Mrs. Stewart, the Superintendent of Education and Mrs. Shaw, Dr. S. N. Robertson and Mrs. Robertson, Dr. G. D. Steel and Mrs. Steele and the officers of the Alumni Society. Mrs. W. M. Brahaut and Mrs. H. E. Miller ushered the guests. The tea table was presided over by Mrs. Stewart, who poured coffee and Miss Lorna Weeks, who cut the loaves, assisted by the following: Mrs. G. H. Buntain, Miss Marjorie Fraser, Miss Doris Prowse, Miss Effie Brehaut, Miss Lols Miller and Miss Norah Longworth.

An actor had been guilty of dangerous driving. A policeman approached, tugging his notebook and pencil from his pocket.
The actor smiled.
"Well, my man," he said, pleasantly, "I make it a rule never to sign autograph albums, but in your case I'll make an exception."

a highly malarious area is fraught with the gravest consequences unless measures are taken to protect these people."

MR. C. H. B. LONGWORTH, B.Sc. President, P. W. C. Alumni Assn.

New Prince Of Wales College
