DOWN THE BACK STRETCH

There arrived in this city a few days ago a colt that should make a name for himself in the future, if breeding, size, conformation and soundness are requisites. We refer to Doctor Britton registered number 70959, purchased by Mr. Hooper from the estate of the late Dr. J. O. Calkin, Sackville, N. B.

Dr. Britton is sired by Great Britton 2.02 1-4, one of the greatest trotters that ever went down the Grand Circuit, and the sire of Throna Britton 2.00 1-2, world's champion racing mare the season of 1931; also the sire of four in 2.05 and ten in 2.10. Great Britton was purchased by the Nova Scotia Government, made one season in the stud and died early in the spring of 1932.

The sire of Great Britton was Peter Chenault 2.04 3-4, sire of four in 2.05. He was a son of Peter the Great, the world's greatest speed sire. Several years ago Peter Chenault was sold to New Zealand where he is making good. The dam of Great Britton was Fanfarin by Tommy Britton.

Now that we have looked into Doctor Britton's dad's history, let us see what the other side gives us. Allisonia, his dam, is a sister to Johnny Miles 2.11 1-4 trotting. She was sired by Captain Aubrey 2.07 1-4, sire of five in 2.10, who in turn was sired by Peter the Great, dam The Mayern 2.11 1-2, also the dam of that great Australian sire Lord Revelstoke (3) 2.12-3-4.

The dam of Allisonia, that is to say the granddam of Doctor Britton, was Marjorie Keith 2.11 3-4, also the dam of Johnny Miles 2.11 1-4. She was sired by Todd 2-11 1-4. She was sired by Todd 2-11 3-4, sire of four in 2.05 and her dam was Belgrade B. 2.16 1-4.

Todd was sired by Bingen 2.06 1-4, dam Fanella 2.13 by Arion, also the dam of Sadie Mac 2.06 1-4. Belgrade B. was sired by Bow Bells 1.19 1-4, by Beautiful Bells and her dam was Glenora by Belmont 64.

We have gone to some length in tracing the pedigree of this colt, which will not be a year old until the 27th of May, because in our opinion he is one of the best bred colts in the world today. A strong statement, you may say, but one that we can prove; and our reasons are that his sire Great Britton was undoubtedly one of the great race horses of his day; one of the best bred, and for his opportunities

produced a big percentage of high class race horses including three champions at their respective grades and ages at one time or another. The dam of Doctor Britton has breeding equal to the best, being by Captain Aubrey, who was for his limited opportunities a good sire, while her dam Marjorie Keith's brood almost exactly like Emily Ellen by Todd, recognized as one of the greatest, if not the greatest of brood mares.

It will be interesting to recall some of the history of the forebears of this colt. Years ago there was a millionaire near Boston, named J. Malcolm Forbes and he became interested in horses and their breeding. He purchased a colt called Bingen, who as a four year old took a trotting record of 2.06 1-4. He established a farm at Ponkapog near Boston, and spent a fortune in fitting it up with race track breeding barns, etc. He also purchased Arion for \$125,000, then a record price for a trotting horse. Arion had just established a new world's record of 2.10 3-4 to high wheels, which he subsequently lowered to 2.07 3-4 for four years to bike suky. Arion was extensively bred, but was not a successful sire of dams. He produced Fanella 2.13 and she was subsequently bred to Bingen producing Todd 2.14 3-4.

Todd was bred by J. M. Johnston of Calais, Maine, who was well known in Prince Edward Island, being a particular friend of the late Hammond Kelly. He purchased immense quantities of wood in this province and all over Canada. As a three year old Todd was sold by Johnston and George Leavitt for \$30,000, and soon became one of the most outstanding sires of speed, but died at the early age of nine.

Under the ownership of Mr. Forbes, Bingen received wonderful opportunities and his get made good, and became the talk of the harness horse world. They came to their speed quickly and had plenty of it. The result was that many trainers used that speed before they were ready to carry it and eventually the Bingen were considered a bit "soft" although Bingen produced some of the world's greatest trotters including Uhlun 1.58, in his day a world's champion. Bingen was also the sire of the dam of Lee Axworthy 1.58 1-2, a world's champion.

Just about the time that Mr. (Continued on page 13)

REPORTS ON RESEARCH LABORATORIES

A meeting of the directors of the Canadian National Silver Fox Breeders Association was held on Wednesday evening at their head office at Summerside. The president, Mr. George Callbeck presided. Directors from outside points attending the meeting were, Messrs. Charles Fremont, K. C., Quebec City; L. D. McKenzie, Truro; F. H. Copp, Port Elgin; Hon. G. Shelton Sharp, Charlottetown; Capt. John L. Read, Borden; Major Robertson, Charlottetown; C. C. Baker and Dr. A. A. Lockhart, Kensington.

After routine matters had been discussed, Mr. Callbeck who had just returned from England gave an interesting report of the work of the Welcome Research Laboratories of London, England in connection with the experiments on silver foxes for distemper.

His report read as follows:—"On March 28th I visited the Welcome Research Laboratories and met Dr. O'Brien and Dr. Dalling. We had a very free discussion regarding the work they were doing and what is being done in Canada at the Research Station in Ottawa. They thought distemper was occurring each season among the puppies after they were weaned as it does in almost every dog kennel once they have had it. When informed that last season there was not a single outbreak on any ranch in P. E. Island that we knew of, they were amazed and more so when told there was similar trouble in the Spring of 1921 in the same district, and then no further outbreak until the spring of 1930.

"Dr. O'Brien and Dr. Dalling, considered a visit to Canada now would not be of any great assistance to them on account of distemper not occurring each season among the weaned puppies, as they are anxious to study it on the ranches among the young animals. "They are of the opinion that it might be advisable to have the remaining living foxes now in their possession or part of them, returned to Canada in case of an outbreak of disease; they could then be put into diseased ranches to prove whether it is canine distemper, as the animals they have living now have been inoculated with canine distemper virus. Dr. O'Brien is sending to Ottawa and our Association a memorandum of work, which they consider advisable to carry out at Ottawa, and also field work if there is any outbreak of distemper in any part of Canada.

the doctors think are immune. They have been placed in separate breeding quarters and the puppies will be tested out. The Welcome Laboratories are constantly exchanging ideas with the Canadian Government research laboratories in Ottawa.

The report was received with much interest. A report was submitted by Mr. Morrell of Amherst, official auditor for the Association, that he had gone over the books for the past three months and had found everything in order.

The meeting closed in the early hours of Thursday morning.

CENTRAL GUARDIAN

CAVENDISH PASTORAL CHARGE—Church service for April 16th: 11 a. m., North Rustico, 3 p. m., Stanley Bridge, 7.30, Cavendish. Communion service in North Rustico. Special musical service in Cavendish.

BAPTIST CHURCH SERVICES—Rev. A. G. Crowe, Pastor, Sunday, April 16, 1933: 10.45 a. m., Morning Worship at Bedouque; 11.45 a. m., Sunday School; 7.15 p. m., Evening service at Freetown. Eastern messages at both services.

ISLAND LADY PASSES—Many friends in this city and her home town of Summerside will learn with regret of the death of Mrs. Fred Gates, of Anacoda, Montana, formerly Miss Ida Crabbe, which occurred at her home yesterday following a short illness. Deepest sympathy will go out to Mr. Gates, who is a brother of the late Mr. Arthur Wright, of Westmount, P.Q., was with her sister when she passed away.

SOUNDING MACHINE—In connection with the repairing of the C. G. S. Cartier at the Marine Wharf it is of interest to note that a Recording Echo Sounding Machine is being installed. This equipment is similar to that used in the C. G. S. Acadia which called in this port last fall. By utilizing high frequency transmission and a delicate timing device it is possible, by recording the length of time occupied by sound travelling to the ocean bottom and the echo returning to the surface, to determine with great exactitude the depth of water immediately below the ship.

PERSONALS
Rev. Ewen MacDougall, Charlottetown, left Thursday morning for Cambridge, Mass.

Mrs. Peter MacDougall, Bangor, leaves this morning for Boston, Mass., for a short visit with relatives.

Rev. Dr. R. Moorhead Legate, Minister of St. James Church, who last week received his degree of D. D. at the convocation of the Presbyterian College, McGill University, is expected to arrive home this evening.

Penalties Prove Costly As Rangers Beat Leafs 1-0

New York Team Wins Stanley Cup As Defending Champions Drop Crucial Tilt In Overtime.

MAPLE LEAF GARDENS, Toronto, Ont., April 13.—The Stanley Cup went back to Broadway tonight on the strength of a double-penalty Toronto Maple Leafs and Bill Cook's last and most important scoring shot of the 1933 campaign.

The biggest gun of the New York Ranger firing squad, leader of all National League marksmen, Cook belted a drive past Goalie Lorne Chabot after seven minutes and 34 seconds of overtime that gave Rangers a 1-0 triumph over Leafs and won hockey's classic series for New York at three wins in four starts.

Alex Levinsky, bumping defence-man and Young Bill Thoms, rookie centre star, languished in the penalty box as Butch Keeling grabbed the puck down from a face-off just outside the Toronto blue line, stepped over it and handed the elder of the Saskatchewan farming brothers his big chance.

Through 60 minutes of sensational hockey, that boosted the hopes of 13,600 fans who came out to see Leafs win and send the series into a fifth and deciding game Saturday night, Leafs had a wide margin over Lester Patrick's squad, conquerors of Canadiens and Detroit to reach this series.

LEAFS FORCED TERRIFIC PACE

Led again by Ken Doraty and with Charlie Conacher, Thoms, Harold Cotton and King Clancy racing alongside the little fellow, the Stanley Cup defenders forced a terrific pace in every period. They outshot Rangers, and checked more effectively at mid-ice.

And they started as though they would win in overtime when 48 shots had failed to get one past Andy Aitkenhead in the regulation time. One sensational splash, another—then disaster set in.

TWO LEAFS BANISHED

Levinsky sent Ossie Osmundson, Ranger forward, sprawling with a too-heavy bodycheck and was banished. Hardly had he got seated and Lester Patrick arranged a five-man attacking charge when Thoms followed him for holding Art Somers in a face-off.

For a few seconds Leafs fought desperately against the handicap, Joe Primeau and Murray Murdoch

got tangled up in another face-off and suddenly Keeling spurted up to the scramble, poked the puck clear and started away.

The crowd rose to a man to watch the final thrill of the gruelling series. The former Owen Sound junior star raced over the Toronto blue line, pulled Clancy over his way and tossed a pass on Cook's stick. One of the greatest marksmen in hockey history, Cook promptly fired it into a corner of the net.

THIS IS A RANGER YEAR

A year ago Leafs dumped Rangers in three-straight to win the most famous bit of ice jewellery in existence. But this was a Ranger year. After finishing third in their section, the Blue Shirts eliminated Canadiens and Red Wings to get to the final, then won two in a row from Leafs. They lost the third here Tuesday night—and for a long time it looked as though they would lose the fourth, too.

Doraty, tiny wingman who led Toronto to triumph Tuesday, stood out among the forwards. He paved the way for half-a-dozen scoring chances from close quarters, but Aitkenhead played the short shots sensationally.

Officials—Odie Cleghorn and A. G. Smith.

Running and trotting racing are on the same program the same day at Japanese race tracks. The program for an afternoon usually consists of eleven dashes or events, three or four trotting events and the remainder divided among runners, steeplechasers and jumpers. It is not uncommon to see 40,000 spectators in the stands. Parimutuel system of betting is extensively used.

Max Baer who is to fight Max Schmeling of Germany on the 8th of June at the Yankee Stadium, New York, received an injury to his neck a few days ago when a sandbag which he was punching slipped from its pulleys and struck him on the back and neck. It is expected that it will not interfere much with his training.

The talk of the Moncton Hawks breaking up and their members distributing to professional and amateur teams has no basis in fact as yet. The rumor is prevalent that the entire team will be kept together with the object of competing in the next Olympics and winning the world's championship.

George Allison writing in the London, England, Daily Express, says: "There are hosts of people firmly convinced they could manage a football club," and he goes on to tell of the hundreds of one-sided letters that flood the sports desk and manager's office when a favorite team goes wrong. He says further: "Writers will never stop to consider whether the players suggested are available or whether there is money in the bank to secure them." Isn't the world the same all over in every branch of sport? Echo answers, YES!

Allison says that some of the most brilliant players have failed as managers. Others who receive fewer honors in the playing field have succeeded. The manager who trusts to luck is riding for a fall. Judgment in picking out the player, the judgment of handling him right, that is what tells. It is

an infinitely more specialized job than people imagine.

It is said that Nels Stewart of the Boston Bruins lost eight pounds in that long overtime game with the Maple Leafs of Toronto, which was finally won by the Maple Leafs. That may seem a lot to lose, but we know of cases where men have lost six pounds and more in running a quarter of a mile.

That occurred in the quarter mile championships of 1897 when Tommy Burke of the New York A. C. lost that number of pounds when he won the quarter mile in 49 seconds.
