TRINITY Y. P. U. - Rev. Dr. Hugh Miller spoke briefly to the Y.P.U. of Trinity Church at their regular weekly meeting held in Hertz Hall last night.

Whiskey is not Medicine
"Put whiskey on trial tonight. Consider it under three heads. First, whiskey as a drug; Second, whiskey as a food; Third, whiskey as a poison."

"The greatest medical authorities in the world have passed in their verdict and their verdict is unambiguous. Whiskey is a stimulant but a stimulant of absolutely no medical value. The nerves, the stomach, the circulation - whiskey is not a medicine."

"And when a man is not able to take care of his own head or his own body, whiskey can do him no good. It is a drug and a poison. It has absolutely no value as a medicine."

"The greatest medical authorities in the world have passed in their verdict and their verdict is unambiguous. Whiskey is a stimulant but a stimulant of absolutely no medical value. The nerves, the stomach, the circulation - whiskey is not a medicine."

"And when a man is not able to take care of his own head or his own body, whiskey can do him no good. It is a drug and a poison. It has absolutely no value as a medicine."

"The greatest medical authorities in the world have passed in their verdict and their verdict is unambiguous. Whiskey is a stimulant but a stimulant of absolutely no medical value. The nerves, the stomach, the circulation - whiskey is not a medicine."

Prohibition

Act A Force Says Preacher

"One of the greatest dangers of our country is the possible loss of our freedom of speech."

"And the highest form in freedom of speech is when men and women can discuss principles without personalities, issues without abuse, and highly debatable subjects without anger and malice."

"When we can handle the liquor question without fear or favor, without mob psychology, we shall clean up the plague spots of the island. Fear is paid by a New Brand of Whiskey."

"The speaker went on to say: 'There is one question before us tonight, and our answer to that question will determine what road we shall travel in the days to come. What question is that? It is whiskey. It is not a medicine. It is a drug and a poison. It has absolutely no value as a medicine.'

"Let us define medicine - 'Medicine is any drug or remedy for the treatment and cure of disease.' That is a fair definition, isn't it?"

"Whiskey is not Medicine
'Put whiskey on trial tonight. Consider it under three heads. First, whiskey as a drug; Second, whiskey as a food; Third, whiskey as a poison.'

"The greatest medical authorities in the world have passed in their verdict and their verdict is unambiguous. Whiskey is a stimulant but a stimulant of absolutely no medical value. The nerves, the stomach, the circulation - whiskey is not a medicine."

"And when a man is not able to take care of his own head or his own body, whiskey can do him no good. It is a drug and a poison. It has absolutely no value as a medicine."

"The greatest medical authorities in the world have passed in their verdict and their verdict is unambiguous. Whiskey is a stimulant but a stimulant of absolutely no medical value. The nerves, the stomach, the circulation - whiskey is not a medicine."
