Slight Fire In S'side Plant

The Summerside Fire Dept. was called out about 7.30 last evening for a slight fire in the wooden building on the corner of Spring and First Streets, owned by Mr Percy Bowness, and occuped on the first floor by R.B. Dewar as a garage and on the second and third floors by the International Fox and Animals Foods, Ltd. where they have their equipment for puffing wheat.

The fire was confined to the floor of the second story under a pile of newly puffed wheat. The origin of the fire has not been determined, but it is thought possible that a hot cinder from the puffer might have smouldered on the pile of puffed wheat from earlier in the day. There was only minor damage to the building.—S.

WILL CARRY WAGE

(Continued from Page 1)

they had a series of conferences with government officials, but without any progress toward settlement being made.

One of the objects of the latest conferences, it was learned, was to attempt to have negotiations between company and union reopened. However, this was impossible, and the union men decided to return home and direct any moves from district U.M.W. headquarters.

Text of Statement

Text of Mr. Jenkins' statement; We are going back to the Maritimes to wage a just battle with all the resources we have.

This is a three-pronged battle that has been forced upon us. It is a fight for a decent living for the miners; at the same time it is one more battle in the age long campaign for justice for the Maritime people as a whole; and finally it is a continuation of the struggle of organized labor in Canada to wipe out regional wage differentials and to maintain purchasing power amidst rising prices.

We are asking for nothing but simple justice: that the present miners wage differential of $2.25 per day between east and west be reduced by $1.40 per day.

The same Government that authorized for the western miners practically the same increase as we now are asking, refuses us the same justice.

Even the Government commissioner, Mr. Justice Carroll, reported that our demands are "fully justifiable".

The anti-labor policies and the reckless responsibility of Dosco are well known, especially to Maritimers, but it is surprising to find the Federal Government apparently throwing its whole weight behind a concern that has been gouging public funds for years, that refuses to modernize the coal industry and that sneers at public opinion.

The Government and Dosco know full well that were the industry properly mechanized, our wage demands would be covered many times over by increased productivity and we have offered a plan for increasing productivity. The Government's refusal to finance a temporary subsidy reflects, it would seem, its refusal to accept any responsibility for Dosco's mismanagement of the industry with the aid of public funds.

It is unbelievable to us in the Maritimes that with tens of millions of Federal funds invested in the Martime coal industry, the Government refuses to lift one little finger to insist that Dosco raise productivity by mechanization and in other ways. Why should we be the victims of Dosco's mismanagement?

We have done all we can. We scaled down our demands; we agreed to a 15-day strike truce and we stayed several days in Ottawa, while the company representatives coolly broke off negotiations and went back to Nova Scotia.

Let no one think that the Maritime miners won't fight this out to a finish.

The arrogance of Dosco and the Government's seeming encouragement of this monopoly will be met by the unbeatable tenacity, the rare fighting spirit and the intense hatred of injustice of the coal miner.

It is with these qualities that we are going to conduct our battle.

All the Maritime people are with us and we are quite confident that organized labor throughout Canada is now rallying to our support.

CONTRACT CONCLUDED

(Continued from Page 1)

news of the concluding of the agreement had become known, the price of bags had advanced 15 per cent which means 3 cents per 100 pounds. Every effort, Mr. Boulter said, will have to be made to keep the costs down if the farmer is to get his 68 cents per bushel.

Not For Seed

Mr. Boulter told the gathering that the British Government does not want the Island potatoes for seed purposes; that, in fact, it is opposed to such use of the potatoes they will receive from this Province and that the cargoes will be unloaded in ports which are as far away as possible from the potato-growing areas of Britain.

He explained that since Prince Edward Island was fortunate enough to secure the order, the potatoes will be allowed transportation by rail from this Province to Upper Canada markets while the contract with Britain is being filled. That market, Mr. Boulter said, will be left for Ontario, Quebec, and New Brunswick growers.

Priority on the railway will be given for freight cars which are to haul the potatoes destined for Great Britain to Saint John.

Mr. Boulter expressed some concern over the present car situation but said the railway will co-operate to the fullest extent.

As soon as navigation opens at Charlottetown, Georgetown, and Summerside, vessels will be loaded at those points, Mr. Boulter said.
