## Useful New Invention

Enables Anyone to Play Piano or Organ Without Lessons

A Detroit musician has invented a wonderful new system which enables any person or little child to learn to play the piano or organ in one evening. Even though you know absolutely nothing about music or have never touched a piano or organ, you can now learn to play in an hour or two. People who do not know one note from another are able to play their favorite music with this method without any assistance whatever from anyone.

This new system which is called the Numeral Method, is sold in Canada by the Numeral Method Music Co., of Canada, and as they are desirous of at once making it known in every locality they are making the following special free trial and half-price offer to our readers.

You are now asked to send any money until you have tried and are satisfied with the new method. The Numeral Company is willing to send it to you on one week's free trial, and you will not have to pay them one cent unless you desire to keep it. There are no express charges to be paid, as everything will be sent by mail. Simply write a letter or post card of the Numeral Method Music Co., of Canada, 169B Curry Hall, Windsor, Ontario, saying "Please send me the Numeral Method on seven days' free trial." If you are not satisfied after trying it, the Method and fifty different pieces of sheet music will cost you only \$5, although the regular price of these is \$10. You should not delay writing, as the Numeral Company will not continue this special half-price offer indefinitely. Later on, the Method and fifty pieces will be sold at the regular price.

### Milton Silver Patch Fox Co.

Capital \$16000 Shares \$50

Very little information has been given the public regarding the immense possibilities of Patch Fox Ranching, in fact very few were bred in captivity until last year. The test more than exceeded the expectations of the owners as in every litter was found one or two Black Beauties. Another point to consider is that the fur which has advanced over 150 p. c. in value during the past year, is very popular with the nobility and the wealthy class.

If you consider carefully the above indisputable facts you will be convinced that the Milton Silver Patch Fox Co. is offering to the public a proposition hard to beat. The six pairs of foxes owned by the Company were not picked up at random but were carefully selected by men of several years experience in handling all classes of foxes. Most of the foxes in this Company are but slightly removed from the silvers. The very low capitalization of \$16,000 for six pairs lets the investor in on the ground floor.

The ranch which is located at Milton is built of the best possible material and is up to date in every respect. The manager D. W. Howard has had several years experience in the caring and handling of foxes, and the services of an assistant has been secured who has had two years successful experience along this line. Mr. Investor, consider this proposition carefully—remember you only have about six months to wait for dividends. As there are only a few shares left don't delay, but send in your application to day.
