# THE ECONOMICAL PRODUCTION OF PORK.

J. H. Grisdale, Agriculturist at the Central Experimental Farm, Ottawa, Gives an Interesting Paper.

In the past some objections have been raised by the packers re the use of forage plants and roots for pork production, but the light of recent experiments would seem to show their fears or objections groundless; in fact, the good influence of a considerable proportion of green food or roots in the ration of a pig can scarcely be overestimated. It has long been known that skim milk has a most beneficial influence upon the thrift of the porkers, and quality of the pork, even when the amount fed, forms only a small part of the ration. Green food and roots seem in a large measure to be capable of supple-menting the now,—in view of the tremendous expansion in the Canadian bacon industry,—quite inadequate supply of dairy products, for use in pig feeding. The farmer whose conditions permit may go even further than to use forage plants as a supplementary food. He may even make them the chief item of his pig feed if he is careful to use a good proportion of grain, (oats, peas and barley,) during the last month of the feeding period.

As the season is rather far advanced for an exhaustive discussion of forage crops suitable for this purpose, I shall confine my remarks to such as are still reasonable.

**CLOVER**.—Probably no crop is better adapted to young pigs than clover, and a bit of clover stubble used for this purpose will give very good returns. So far as our experiments go, the pork so produced is of good quality.

**RAPE**.—Of all the crops used here so far for pasturing pigs, rape quite easily stands first. The principal points in its favor are:—(1) its quick growth, (2) its wide range, as it grows well on almost any kind of land, (3) its long season, as it may be sown as late as September and still do fairly well, (4) its eventful palatability, as the pigs eat it greedily, and (4) its good effect upon the quality of the bacon, producing as it does, almost invariably a good firm carcass. Rape may be expected to be fit for pasturage from six to eight weeks from date of sowing. It should be sown about in rows 24" in apart, since when so grown it gives the greatest return per acre, and is best adapted for pasturing. It should be sown fairly thickly in the rows, say, three lbs. of seed per acre. An acre may be expected to carry from 20 to 40 pigs through a season, depending on the season and the condition of the crop when the pigs are turned in.

**VETCHES**.—Vetches also are valuable as forage for swine, and may be, under exceptional condition, sown late in the season. Especially is this true of the Hairy Vetch, which species has the peculiar quality of growing up again after having been cut off or eaten down.

**OATS**.—Probably no green crop will give a better return in pork than oats. They may be sown late or early in the season at the rate of 5 or 6 bushels to the acre and the pigs turned on about a month after they germinate. The fault of this crop is that it lasts only a short time, as it does not seem to be able to recover when once eaten down.

**ARTICHOKES**.—Another crop of great value for pork production is the artichoke. It should be sown late in the fall or very early in the spring. The pigs may be allowed to feed on it in October and the early spring. They will do the harvesting themselves. This is a most excellent crop for brood sows in spring and autumn.

Almost all varieties of juicy forage crops are suitable for pork production, the sorts mentioned above being probably the best for Canada.

The question as to the advisability of allowing pigs to graze, or shutting in a small pen and feeding them the green crops, does not seem to have been positively settled yet, for while greater daily gains may be expected where animals are kept in close quarters, there is always the item of extra labor for cutting and carrying the forage.

Another item of some importance to the feeder is the comparative economy of Winter and Summer feeding of pig. According to various experiments conducted here recently, pork may be produced at about \$1.00 per hundred pounds, live weight, less cost in summer than in winter. This seems to be due to less cost of green feed, as well as to low temperature, which must be overcome by food or artificial heat.

## Paine's Celery Compound

Nature's Summer Health Giver.

It Purifies the Blood and Multiplies the Number of Vital Red Corpuscles, Feeds the Nerves and Tissues and Gives True Physical Strength.

Weak nerves, exhausted tissue, poor, thin blood, impaired digestion and sleepless nights, account for much of the present existing summer misery and suffering. Dear reader, if you are unfortunately numbered amongst the sickly and weak mortals of to-day, it is now time to awake to a true realization of your danger, the weakening and depressing hot weather will only add to your miseries if you are careless and indifferent.

There is absolute relief and a positive cure for you in Paine's Celery Compound. This wonder-working medicine is successfully conquering such troubles as yours every day. It is a fact verified by able physicians and thousands of testimonials that Paine's Celery Compound makes new, pure blood, builds up the nervous system, regulates digestion, whets the appetite and gives vigor and strength to combat the discomforts of the heated term. Mrs. E. Wilcox, Creemore, Ont., says:

"For years I have suffered from constant sick headache and nervousness; at times I have been so bad that I have been unable to sleep two hours a night for weeks. I have tried many medicines and doctors to a great deal, but never received a hundredth part of the value from them that I obtained from Paine's Celery Compound. After using three bottles I can sleep well, my headaches have ceased, and I feel healthier and fresher than I have done for years."

Reflections of a Bachelor.  
Children are a necessity that is as expensive as luxuries.  
Great men look into other people's mirrors; small men into their own.  
Women don't worry so much about how the other half lives as how the better half lives away from home.  
There is never any telling when a man asks a girl to marry him whether she is going to refuse him and be sorry or accept him and be sorrier still.

Misconstrued.  
Clara (haughtily)—I went to the theatre every night last week, and had a different escort each time.  
Rival belle (vindictively)—You should be more cautious, my dear.  
Cautious!  
Yes, my dear. Ill-natured people all over town are saying that you can't get the same man to go with you twice.

Served Him Right.  
Mrs. Homer—"I didn't want to attend the picnic, but my husband insisted on my going." Mrs. Neighbors—"And did you enjoy it?" Mrs. Homer—"Indeed, I did. My old gown was utterly ruined and my husband had to replace it with a new one."  
The longest alphabet in Europe is that of the Slavonic language. It has 42 letters.

# DR. FOWLER'S EXTRACT OF WILD STRAWBERRY

HAS BEEN IN USE FOR NEARLY SIXTY YEARS.

**CURES**  
DIARRHŒA, DYSENTERY, CHOLERA MORBUS, SUMMER COMPLAINT, SEA SICKNESS, ETC.

CHOLERA, CRAMPS, COLIC, CHOLERA INFANTUM, CANKER OF THE MOUTH AND STOMACH, ETC.

FOR CHILDREN AND ADULTS.

**A LITTLE GIRL ALMOST DEAD.**  
Morrisburg, Ont., Feb. 13th, 1901.  
Messrs. The T. Milburn Co., Limited, Toronto, Ont.

Dear Sirs.—My little girl was almost dead with summer complaint. I tried numerous remedies for her, but they did no good. A friend recommended Dr. Fowler's Extract of Wild Strawberry, so I procured a bottle, and by the time she had taken three doses it began to help her, and two bottles effected a complete cure. I owe her life to your excellent remedy.

MRS. EMERSON BARKLEY.

**A LITTLE BOY'S LIFE SAVED.**  
Seagrave, Ont., Jan. 2nd, 1901.  
Messrs. The T. Milburn Co., Limited, Toronto, Ont.

Dear Sirs.—My little boy was very bad with diarrhœa. He passed nothing but blood. I tried everything, but could get nothing to do him any good until I got a bottle of Dr. Fowler's Extract of Wild Strawberry. A few doses made a complete cure, and I have more faith in your remedy for diarrhœa than any other preparation on earth and always keep it in the house.

MRS. THOMAS LAMB.
