The Cause of Heart Trouble

Faulty digestion causes the generation of gases in the stomach which inflate and press down on the heart and interfere with its regular action, causing faintness and pain. 15 to 30 drops of Mother Seigel's Curative Syrup after meals sets digestion right, which allows the heart to beat full and regular.

What You Get for the Last \$10

WHAT is it worth to you that your C.C.M. will be running more smoothly after long use than many ordinary wheels do when new—that it will still be giving sturdy service years after an inferior wheel is played out—that fewer repairs are needed owing to C.C.M. sincerity of workmanship in every part—that in case of accident, you can get C.C.M. service almost everywhere in Canada?

Imagine getting all this extra service for the last ten dollars you pay! Spread over the much longer life of your C.C.M., the cost to you is but a trifle!

C.C.M. Bicycles

Every running part of a C.C.M. bicycle is made true as a watch. And it keeps true. Every rider of an ordinary wheel has felt the hard pedalling caused by inaccuracies in the crank-hanger—the power plant of a bicycle. He feels an alternate looseness and tightness, indicating friction and loss of driving power. In C.C.M. bicycles the parts subject to wear are not stamped out but are accurately machine ground. Not a whit of driving power is lost.

And the "Hercules" Coaster Brake! All C.C.M. bicycles have it. It is the only brake without a side arm. Lightest and simplest of all brakes, the Hercules is sensitive, sure and powerful. The clutch engages with utmost smoothness. We back this brake with a hard and fast guarantee.

Look at a C.C.M.! After years of hard use its graceful lines are still enhanced by the sparkle of its brilliant enamel. The handle bars, and all bright parts, defy the rain—these are nickelled over a heavy coat of copper—and copper can't rust.

There's a C.C.M. dealer not far away.

Look for these Name plates when choosing a bicycle. All of them well known lines are members of the "C.C.M." family.
