At New Wonderland last night the many patrons of the house enjoyed the splendid program fully. Arlington and Helston simply carried the house by storm, and their travesty is surely out of the common as far as cleverness and entertainment are the questions. Her song is catchy, her dancing splendid, and without any undue praise the act is certainly the very best New Wonderland has had in a long while.

Almost every week in the year this paper refuses one or more mail order advertisements, almost all of them at very high rates, from firms whose places of business are not in this Province.—This is done because The Guardian believes that the local merchants and business men, who are ever ready to purchase what the producers of this Province have to sell, and who as residents pay taxes and support the various local enterprises, should not have competition with their advertising, or otherwise, that of the outside merchant who does not occupy a similar position, and whose revenue goes to build up another Province at the expense of this one. All Prince Edward Island merchants and business men, who are not at present advertising in The Guardian have the privilege of using some of the space which the foreign mail order houses are refused and will be furnished with full information as to rates etc if they will but phone or write this office. There are not many newspapers in this Province that refuse outside mail order ads.
