IMPORTANT READING MATTER SELECTED FROM THIS WEEK'S NEWS FOR THE GUARDIAN'S SATURDAY SUBSCRIBERS

RHEUMATISM CRIPPLED HER

Zam-Buk Gave Quick Relief.

For rheumatism, sciatic, and stiffened muscles, nothing can equal Zam-Buk. Mrs. Mary Harman, Wheatley, Ont., writes: "About four years ago I had rheumatism very badly. It affected my right arm and leg, and was so bad that I could hardly move my hand. I was quite helpless, and could not do my work—could not even dress myself, but had to be attended to like a child. The rheumatism in my leg made walking almost impossible, and at times I could hardly move across the house. A friend advised me to try Zam-Buk. I obtained some and had it rubbed thoroughly into the affected muscles. It was soon evident that Zam-Buk was doing its work, and in a short time I could walk around the house with ease. My arm got better, I could dress myself, and needed very little personal attention. I continued with the treatment, rubbing Zam-Buk in thoroughly every day, and in a few weeks' time the rheumatism was driven out of my system. The cure was permanent, too, as since that time I have never been troubled with rheumatism."

Mr. Lawrence Cameron, of Richmond, P. E. I., says: "I have been a great sufferer from a sore and crippled back, but after perservering with Zam-Buk I am completely cured. I feel that I cannot praise this remedy enough.

Numerous other similar cases could be cited. Zam-Buk has benefited many, Why not you

Use Zam-Buk also for eczema, piles, cuts, burns, bruises, cold sores, chapped hands, or for any disease or injury of the skin. At all druggists and stores 50s., or post-paid from Zam-Buk Co., Toronto, on receipt of price.

Change in Time

On 1st October, 1914, the following changes in trains on P. E. I. railway will take place:—

Morning train will leave Elmira at 5.25, Souris, 6.35, Mt. Stewart, 8.30, arrive at Charlottetown 9.30.

Saturday trip Elmira to Souris and return will be discontinued.

Morning train will leave Georgetown 6.30, Mt. Stewart, 8.30, arrive Charlottetown at 9.30.

All other trains will run as at present.

District Passenger Agent's Office, Charlottetown, Sept. 28th, 1914.

THUDSDAY

POWDERY SCAB.—Yesterday afternoon the Council of the Charlottetown Board of Trade held an informal meeting, the object of which was to consult with Mr J. A. Adams, M.A., and Messrs Holmden and Partridge, the Dominion Government officials appointed to inspect potatoes in Prince Edward Island, the inspection being for the purpose of ascertaining if Island potatoes are sufficiently free from powdery scab to permit of their export to the United States. Mr Adams and his assistants produced samples of potatoes grown in Prince Edward Island, showing what the affected potatoes looked like, and also what the ideal potato should be. A general discussion took place and many questions were asked Mr Adams, which he satisfactorily explained to the Board. Mr Adams returns very shortly to Ottawa, and the two inspectors will continue their work here. It is hoped that as a result of the work performed hereby Mr Adams and Messrs Holmden and Partridge, Prince Edward Island potatoes, when duly certified as being free from powdery scab, will be admitted into the United States. Negotiations now being conducted to this end may not be completed in time for shippers to take advantage of the American market this fall, but no doubt arrangements will have been fully settled by next spring. From the general observation so far it appears that the Dakota red potato is the least affected by powdery scab of any of the varieties grown on the Island. Mr Adams is of the opinion that if the farmers of Prince Edward Island would realise the necessity of having powdery scab exterminated there would be no trouble in doing this inside of two years. But it rests with the farmers themselves to overcome the disease, and this can be done only by proper attention to the selection of seed and care in planting in unaffected fields.

On the morning of October 13th there took place a very sad event in Souris when that stern and inevitable vision, death, entered the home of James Moynagh and claimed his beloved wife. The deceased had been ailing for about a year but at all times exhibited a mild and genial character which was a striking characteristic of her life. Cared for most tenderly, her every wish anticipated and supplied by her devoted relatives and friends, Mrs. Moynagh lingered until the worn out body could retain the heroic spirit no longer. During all this long illness Mrs. Moynagh's strong, courageous spirit demonstrated how a true Christian woman can endure sickness and weakness of body. About a month ago it became evident that death was hovering about the home and, in spite of skilled medical aid, it finally claimed her as a victim.

The long funeral cortege that followed the remains to their resting place amply testified to the high esteem in which she was held. The last solemn rites were performed by Rev. R. B. McDonald after which all that was mortal of a good and true woman was laid to rest in the adjoining cemetery. The funeral was under the skilful management of Funeral Director, W. L. Dingwell. The deceased leaves to mourn besides a sorrow-stricken husband, two sons, Edward in Souris and James in Seattle, Wash., one sister in Gloucester, Mass; two brothers on P. E. Island, and one brother in California. The late Mrs. Moynagh was, in the community and to all her acquaintances a general favorite and a woman of good and pleasing qualities. The community at large share in the sorrow of the grief stricken family in their sad bereavement.

A telegram received yesterday by Mr. J. A. Clark, Superintendent of the Experimental Station, Charlottetown, brought the sad news of the sudden death in Kamloops, B. C., on Tuesday night, of his father, Mr. John C. Clark, of Bay View.

The late Mr. Clark left some weeks ago in excellent health to visit his children in Western Canada. En route he spent some time with his son, Dr. Jermiah S. Clark, in Brandon, Manitoba and later proceeded to British Columbia where at the home of his daughter, Mrs. A. J. Proscer, Kamploop, B. C., he was stricken with apoplexy, death coming suddenly.

Many friends throughout this province will learn of his death with sorrow. He was widely known as a successful farmer, a man of much more than average intelligence, public spirited and progressive. In all maters of educational, religious and public interest he took a prominent part and his voice and his means could always be depended upon as factors in the furthering of anything calculated to benefit his country or his fellowmen. He was in his eightieth year and up to the time of his death was mentally and physically well preserved and so active as many at a much younger age. He will be greatly missed especially in the community in which his life was spent and in the welfare of which he always took a keen interest. His surviving children are Dr. Judson F. Clark of Vancouver, B. C.; Dr. Jermiah S. Clark, Brandon, Man.; Mr. J. A. Clark, Superintendent Experimental Station, Charlottetown; the Misses Martha and Lella, Missionaries in India, now on furlough and who were with him in Kamloops, and Miss Irene nurse in Vancouver General Hospital. There are also four sisters, Mrs. William Simpson, Vancouver, B. C.; Mrs. William McNeill Simpson, Hamilton, this Province; Mrs. Thomas Johnson, Brookfield; the Misses Mary Jane and Matilda, Kensington. To the bereaved relatives The Guardian tenders sincere sympathy.

The community of Tryon was saddened by the death of Mrs. Angus MacDonald which took place on 19th inst. Deceased had been in poor health for some time, being confined to bed for over three months. The end, however, came suddenly and with something of a shock. On Sabbath the 18th, she took suddenly worse. All that loving hands could do was done to stay death, but on Monday night she passed quietly away. Mrs. Macdonald was not only respected and beloved in the community. Many will miss her kindly, cheery presence and the warmth of her smile. Her thought was ever of others and is seeking the welfare of her fellow beings, she did not hesitate to sacrifice herself. There is an old verse which reads: "At eventide there shall be light," It was so with her. When the dark clouds of physical suffering hovered over her the light which is eternal filled her soul. When the flame of life was burning low—the flame of the hope which is eternal waxed greater. She passed as the "morning star which goes not down behind a dark horrizon but melts away into the light of Heaven.

There are left to mourn their loss a husband, two step-daughters and a son Kenneth. Also her father Wm. Chisholm, three sisters, Mrs. Waite, of Bedeque, Mrs. F. Lang of Tryon, Miss Grace at the old home and a brother James of Tryon.

Funeral service which was held at the home were conducted by the pastor of the Presbyterian Church assisted by Rev. G. M. Young.

The pall-bearers were Mr. Waite of Bedeque, Mr. P. Cameron of Albany, Mr. F. Lang and Mr. Jas. Chisholm of Tryon.

On Thursday morning, October 15th the vicinity of Little Pond was saddened by the death of Angus B. McDonald. He enjoyed excellent health until about a week previous to his death when he was stricken with pleuro-pneumonia from which he never recovered. The deceased spent thirty-five years in the Western States, the greater part being spent in Seattle, and about four years ago returned to his old home in Little Pond where he remained with his late brother's family Since his return to his native home his kind disposition won for him many friends, especially among the youth of the place. During his illness, which he endured with great patience and resignation to the Divine Will, he was comforted by the last rites of the Holy Catholic Church and in its comforts he passed to his eternal reward. He leaves to mourn, besides a large circle of friends and relations one, sister, Mrs. John Morrison, Georgetown Royalty, and one brother Joseph in Butte, Montana, also his late brother's widow, Mrs. D. J. Mac donald, and family to whom he was a devoted friend and uncle. On Saturday his remains were carried to St. Francis De Sales Church where Requiem High Mass was celebrated by the pastor Rev. Dr. Walker. Then after Mass all that was mortal of a kind brother and uncle was laid to rest in the adjoining cemetery there to await the final summons on the resurrection morn.

Eternal rest grant unto him, O Lord!

And let perpetual light shine upon him.

The meeting last night opened at 7.30. Professor Ross was appointed chairman. He pointed out that the potato question was a most important one to Prince Edward Island, as this province was the greatest potato-growing and exporting county on earth, according to its population.

Mr Adams was the first speaker. He was asked the following questions:—Is there a large percentage of potatoes affected in foreign countries? No, not a large percentage. Is it not more common in heavy land than in sandy land? Yes, it is more common in soils that hold moisture.

Are they getting clear of the disease in Ireland?

No; and I am afraid they will be a long time doing it, as it is so widely distributed.

Mr Holmden.—Up to the present time this year we have found about 36 new cases in the Island.

Is there any way of disinfecting the seed?

We do not recommend trying it. Get clean seed.

Have you found any canker?

No.

Will the inspection be general over the Island?

We hope to make it general.

Mr Partridge.—I have done some inspection in this district and have found powdery scab on some loads at the factory, and will be around again to inspect farms.

Did you find a large percentage diseased on any load?

No. In fact it took an eagle eye to detect it in some loads.

Well, then. we should disinfect even clean-looking potatoes?

Yes, it would be a good precaution.

Hon. A. A. McLean then outlined the action of the Government on this matter. He stated that it had been brought up in the House at the last session and he had interviewed the Minister, the Hon. Martin Burrell, who promised him to send inspectors to the Island. He told of the care that was exercised in handling potatoes in Belgium. He thought the potato was a good money-maker, and everything should be done to improve the potato industry. The Government will provide inspectors as rapidly as possible, but it takes time to train suitable men.

Would it be safe to store clean potatoes in a diseased cellar?

No; the spores might easily be carried.

How does lime in the soil encourage the disease, while lime in the cellar destroys the disease?

The lime used in the cellar is quicklime, and will kill the disease germ. The lime in the soil is not so strong.

How can we get clean seed? Mr Partridge inspected fourteen loads from one field and found only one potato infected. How could they be inspected in the cellar? It is going to be a great problem to secure pure seed.

Mr Adams.—We cannot guarantee any seed clean.

Mr J. Artemas Clark.—I cannot recommend the importation of seed potatoes from Ontario. They do not yield nearly as well. Moreover, they have a lot of Rhizostonia, which is a bad disease. I have found that disease spreads very easily by soil being carried from place to place.

Would it not be safer to disinfect than to look for clean seed?

I think you should get clean seed and also disinfect them.

Walter Simpson.—These inspectors are finding powdery scab, but it may be there and they may not find it. I think we should be very particular about the seed. We can see it when we are cutting the sets.

What effect has powdery scab on the crop?

It does not injure it to any great extent. It is not anything like as bad as the canker.

Will this disease get worse the longer it is left?

We cannot say yet.

Mr Crewys moved a vote of thanks, seconded and carried unanimously. There were about 45 present.

FOX MEETING.—In the Board of Trade room last night there was a meeting of the shareholders of the Upton Silver Black Fox Company. An additional dividend of two per cent. was declared, and this, together with the 10 per cent. dividend paid some time ago, represents a total dividend for the year of 12 per cent. It was decided to add two and a half pairs of foxes to the stock of the Company, reducing the capitalisation to below eleven thousand. The officers were re-elected as follows:—President, Mr C. H. Black; Vice-President, Dr S. R. Jenkins; Secretary-Treasurer, Mr E. R. Brow; Directors, Messrs Robert Stewart and D. O'M Reddin. The meeting decided to enter into an agreement with the keeper of the foxes for the care of the animals during the coming year.

DRINK AND UNEMPLOYMENT HAND IN HAND

When the test comes and the factory and office forces have to be cut down, drinkers are the first to be let go. This falls hardest on their wives and families, for the man who has the whiskey or alchol craving spends so much on it that there is usually nothing laid aside.

Alcura stops the craving for drink and helps the man help himself in his desire to get away from the drink disease and keep his work It is guaranteed to give satisfaction or money is refunded. Alcura No. 1 can be given secretely by wife or mother, and will render drink distasteful, even nauseous. Alcura No. 2 is the voluntary treatment.

Can be had at our store, $1.00 per box. Ask for free Alcura booklet.

"CEETEE"

ALL PURE WOOL - GUARANTEED UNSHRINKABLE UNDERCLOTHING

Why do Governments always supply their soldiers with woolen underclothes?

Why do experienced travelers always wear woolen underclothes?

Why do sportsmen—hunters—sailors, etc., always wear woolen underclothes?

Because:—Clean, pure Wool is recognized as the only safe and healthful material to wear next the skin.

"CEETEE" is manufactured from only the very finest Australian Merino Wool, scoured and combed over and over again until every particle of foreign matter is taken out and every strand is as clean as it is possible to be made.
It is then carefully manufactured on expensive and exclusive machinery, very different from the ordinary style of underwear machinery — fashioning each garment to fit the human form. It is all selvage edges, therefore cannot come unravelled; every join is knitted together, not sewn, as with ordinary underwear.

CANADIAN-MADE FROM START TO FINISH, AND ALL BRITISH MATERIAL

People wear "CEETEE" Underclothing because they know it to be the best.

In All Sizes For Men, Women and Children.
