## Just So

FOLKSTONE, Eng., July 23.—Every woman knows that men "though interesting creatures, are tiresome, hard to control, and are prone to seek their own way in spite of warnings," according to Mrs. H. A. L. Fisher, wife of the president of the British National Board of Education. She told an audience at the Royal Sanitary Institute that the most men become ill owing to "rough faults of their own," and "sow seeds of trouble for themselves by eating too much, eating the wrong things, drinking too much, being lazy, keeping late hours, or living in hermetically sealed rooms."

CHICAGO, July 22.—Ambrose J. Rose, ninety-one years of age, granted a decree of divorce from his third wife, asserted today that "women were getting worse with every generation."  
"My first wife was pretty good," he said, "my second was just median and the third was no good at all."

## Sensations in Chicago

CHICAGO, Ill., July 22.—Original copies of the Grand Jury con- siderations in which Eddie Clotte Joe Jackson and Claude Williams, White Sox players, declared they had been paid from five thousand to ten thousand dollars to throw games in the 1919 world's series, and the statements they signed waiving im- munity are missing. It became known today when the State began its fight to introduce the con- siderations as evidence in the baseball trial.

The announcement came as a dramatic sensation near the end of today's session of court, when the State placed Harley Replogle, former State Assistant State's Attorney, who directed the first Grand Jury investigation of the baseball scandal, on the stand and revealed that it would have to depend on carbon copies of the confessions and on the testimony of men who heard them and who are said to have seen the immunity waivers signed. The defense plans to con- tend that the confessions were made involuntarily.

## Gold Found on Ontario Farm

BOURKE'S SIDING, Ont., July 22.—A spectacular discovery of gold in Northern Ontario has just been made in the township of Benoit. The find lies on A. O. Anderson's farm. Samples of the ore were brought out yesterday. The gold is shot through in leaves such as the silver occurs in the high grade silver ore at Cobalt. In addition to this heavy gold there are loose leaves of pure gold which are as big around as a twenty-five cent piece.

The body in which the rich ore occurs is about eight feet in width, in which are veins measuring two or three inches in width. The gold occurs in one of these stragglers, while the intervening rock is highly mineralized.

## Mrs. Bridgen To Be Tried

KINGSTON, July 23.—Mrs. Mary Bridgen, who with her three daughters, was taken to the Hotel Dieppe last Friday suffering from strychnine poisoning, was this morning arraigned before Magistrate Farrell, charged with causing to be taken by Agnes Bidgen, one of the daughters, poison so as to endanger her life. She pleaded not guilty to the charge and was com- mitted for trial after the evidence of Dr. A. P. Chown, Dr. Huxek and Inspector John Polie, of the Children's Aid Society, was taken. Arrangements are being made to have Mrs. Bridgen released on bail.

Mrs. Bridgen appeared in court accompanied by Matron Goodhew. With a steady step she walked into the prisoner's box and in a strong unshaken tone, pleaded "not guilty" to the charge of causing her daughter to be poisoned. The only pro- secutor, while W. M. Nickle appeared for the accused.

Dr. A. P. Chown, druggist, who was the first witness called, stated that on July 9 twenty grains of strychnine were sold to "A. Bridgen." The girl purchased the strychnine at Dr. Chown's store after tendering a note, purported to be signed by Mrs. Bridgen, in which it was stated that the strychnine was wanted to kill rats with. Dr. Chown stated that he kept the note, but couldn't remember where he had laid it.

Inspector John Polie, of the Children's Aid Society, told of several interviews he had had with Mrs. Bridgen in regard to the two younger children, the custody of whom was recently awarded to their father.

The mother was much adverse to giving up the children and just before they left with their father, said to witness: "They will never leave this place alive."

## Canada Suggested For Pacific Parley

LONDON, July 21.—According to reports current in well-informed quarters to-night, Japan has intimat- ed to the British Government that she considers Washington unfavor- able as setting for the conference on Pacific problems, although doesn't object to a conference at Washington on limitation of arma- ments.

The strictest reticence is main- tained in official quarters regard- ing this report, but the fact that the idea of a preliminary confer- ence on Pacific issues at some place outside of Washington again is being propagated here, lends em- phasis to the rumor of Japan's ac- tion.

The correspondent was informed to-night in an authoritative quar- ter that the question of a preliminary conference was still before the United States Government. The sugges- tion made here is that if the United States is not willing to agree to the London conference, she might not be opposed to some place in Canada, such as Quebec or Vancouver. Whatever antipathies Japan may have to discussing the Pacific issues in Washington, she count- not, so it is held here, object to such a conference in Canada being part of the British Empire.

## Preserving Process

NEW YORK, July 23.—If Donald Macmillan and his six venturesome companions who sailed from Wis- casset, Maine, last week, succeed in reaching Baffin Bay in the frozen north, they probably will celebrate with a banquet on ship- board in which such delicacies as "fresh" raspberries, spinach and green corn will figure largely.

It was learned today that the Macmillan party had taken along a quantity of perishable foodstuffs prepared by a new process of dehy- dration which, its sponsors claim, leaves the dried products capable of restoration to their original bulk, color and taste, by soaking in water.

In addition to fruits and vegeta- bles, the Macmillan party's dehy- drated food supply includes roast beef hash, reduced to whithered bits, unrecognizable fish, also cap- able of being made fresh, again, and a few bales of grass for the ship's cat.

## Refuses to Surrender Negro if There is Possibility of Lynching

LANSING, Mich., July 23.—Gov- ernor Greenback today served notice upon the State of Georgia that he will not permit negroes to be extradited from Michigan in cases where it is probable they may be lynched instead of receiving a fair trial.

The Governor held a hearing in the case of Thomas Ray, Detroit negro, sought by Georgia authori- ties to answer a charge of murder. The Governor did not say he would consent to the extradition of Ray, whose papers were signed by ex-Governor Sleeper several months ago. He indicated, however, that Georgia must disprove testimony to the effect that preparations were made to lynch Ray at the time his return from Michigan to Georgia was expected, or he will order the negro's release.

## NONE TURNED BACK

NEW YORK, July 23.—The restrictive immigration law which went into effect June 3, thus far has barred no newcomers who have been able to reach these shores. The only persons excluded have been unable to meet the usual physical, mental and moral tests.

(Special to The Guardian) PARIS, July 23.—Premier Briand following a meeting of the council of ministers at Ramouillet yester- day has despatched a telegram to Berlin requesting that the German government take all necessary steps to insure safe conduct through Germany or a new division of French troops which, it is said, will be ordered to Silesia within a few hours. This morning's newspapers give considerable prominence to the council meeting which was the second to be held at Ramouillet since the election of premier Millerand. It is understood that the Silesian question was the chief subject under discussion and news- papers declare unqualified approval was given the premier's position after he had explained it in great detail. The ministers are reported to feel that France should not re- treat an inch from the determina- tion to send reinforcements to Upper Silesia despite opposition to such a move by Lloyd George. In- structions were sent late last night to the French ambassador in Lon- don requesting him to tell the British government that France con- sidered it useless for the allies to establish a Silesian boundary with- out providing sufficient troops to enforce the provisions, and adding that France intends to dispatch another division without waiting for action by the other allies.
