Quit Meat if Your Kidneys Act Badly

Take tablespoon of Salts if Back hurts or Bladder bothers.

We are a nation of meat eaters and our blood is filled with uric acid, says a well-known authority, who warns us to be constantly on guard against kidney trouble.

The kidneys do their utmost to free the blood of this irritating acid, but become weak from the overwork; they get sluggish; the eliminative tissues clog and thus the waste is retained in the blood to poison the entire system.

When your kidneys ache and feel like jumps of lead, and you have stinging pains in the back or the urine is cloudy, full of sediment, or the bladder is irritable, obliging you to seek relief during the night; when you have severe headaches, nervous and dizzy spells, sleeplessness, acid stomach, rheumatism in bad weather, get from your pharmacist about four ounces of Jial Salts; take a tablespoonful in a glass of water before breakfast each morning and in a few days your kidneys will be in a normal state.

This famous salt is made from the acid of grapes and lemon juice combined with lithia; and has been used for generations to flush out, stimulate clogged kidneys, to neutralize the acids in uric acid, to induce a normal condition, thus ending urinary and bladder disorders.

Jial Salts is inexpensive and cannot injure; makes a delightful, effervescent lithia-water drink, and nobody can make a mistake by taking a little occasionally to keep the kidneys clean and active.

HOCKEY

The first game of the Eastern Prince Hockey League was played in Carleton Place Monday evening, Jan. 29, between the Beavers of Bedeque and the Shiners of Carleton Place. The game was fast and exciting from start to finish and the way through it was either teams' game, while the Beavers showed more actual team work they could not get away from the Shiners who played a swift and individual game. Wilfred Higgins, Bedeque, called the game at 8 o'clock and after a few minutes of play the Shiners scored number one shortly after the Beavers evened up before the period ended. In the second period the Beavers scored two more to their number, and in the third period the Shiners overtook to overlook this lead and were all but successful, keeping the play around the Bedeque goal almost throughout, but were able to break through only twice so that the final score read 4-2.

WIND BLEW NINETY-FIVE MILES AN HOUR

PLYMOUTH, Jan. 28.—The steamship George Washington arrived here today after a tempestuous voyage. Lifeboats, seventy feet above the water line had been smashed by the furious seas and several members of the crew had been injured. While en route, a gale of 95 miles an hour, three days ago, S. O. S. signals were received from the sailing Norwegian steamer Mod and for fifteen hours the George Washington tried vainly to find her. Finally these efforts were abandoned when it was learned that the Mod's crew had been rescued by the steamer Albatross.

PROSPECTS FOR NORTHERN FARMING

The report of the substations of the Dominion Experimental Farms for the north is replete with information as to the possibilities of agriculture and consequently of settlement in the far North of Canada. When it is considered that the latitude is not as near to the Arctic regions as are some other northern countries in which agriculture is followed, it will be seen at once that the possibilities and prospects are not nearly so remote as some people appear to think.
