

The Ounce of Prevention

It is the "ounce of prevention" which today inspires medical science in its fight for the race. Vaccines, sanitation, health departments, all carry forward the good work of *Sickness Prevention*. Science has now developed an agent that effectively meets the condition which is the originating point of over 90% of all sickness—constipation.

That effective agent is Nujol. The dangers of constipation are so widespread because through self-poisoning it reduces the body's power of resistance. Nujol by relieving constipation prevents the absorption of poisons which otherwise would be taken into the blood and undermine the whole system.

Leading medical authorities agree that pills, salts, castor oil, etc., simply force and weaken the system. But Nujol is different.

Nujol softens the food waste and encourages the intestinal muscles to act naturally. Nujol helps Nature establish easy, thorough bowel evacuation at regular intervals—the healthiest habit in the world. Get a bottle from your druggist today.

For available health booklet—"Thirty Feet of Danger"—free, write Nujol Laboratories, Standard Oil Co. (New Jersey), 50 Broadway, New York.

Warning: Nujol is sold only in sealed bottles bearing the Nujol Trade Mark. All druggists. Insist on Nujol. You may suffer from substitutes.
