The lowest or any tender not necessarily accepted. H. B. McMILLAN, Secretary of Public Works, Department of Public Works, Charlottetown, P. E. I., Feb. 26, 1921.

THE WOMAN HE MARRIED BY JANE PHELPS Chapter 105 NAN PLANS A TRIP

I had contracted for the decorating of another large house, this time a new one. It was an extremely remunerative job. I had at first refused it, not because of lack of time but because of my depressed condition, my unhappiness in the discovery of Dick's infatuation for Juanita. But when they entreated me to do the work, naming my own price, I consented. I should make enough to finish our own house and if Dick would consent, put into effect a little plan of which I had been thinking. After I finished this work he and I would go to Los Angeles, surprise Junior, then take a trip to San Francisco. His book would be in the publisher's hands then and the rest and chance would do us both good. It would also separate him from Juanita in a perfectly natural way, I reasoned.

When I told Dick I had decided to take the house after all, he only remarked: "Don't try to do too much, Nan. It was what he always said. 'I won't,' I replied, as usual. Perhaps Dick's seeming indifference to my work, even when it really had amounted to something, had hurt me almost as much as anything he could have done except ceasing to love me. At Lansing he had been so interested, asked so many questions, been so solicitous, his cold indifference now hurt doubly in comparison. I attributed all of this to Juanita's influence. He was so interested in her that he had no interest in me, or anything I did, I thought with bitterness.

The book was finished that week. All these last days Juanita was closeted with him from morning until night, while I attended to my work, most of which had to be done away from home. I was always there at meal time, however, and invariably was obliged to call them to my meals, even after the maid we now kept (and could afford) had announced they were ready. "You never know whether I am in the house or not," I said to myself after Dick had made some remark which showed an utter failure to remember I had told him I was doing Mr. Baker's new house. And Juanita seemed to forget my very existence, save occasionally when at lunch she would remember I was alive and say: "You must excuse us, Nan, but we are so interested in our book we can think of nothing else."

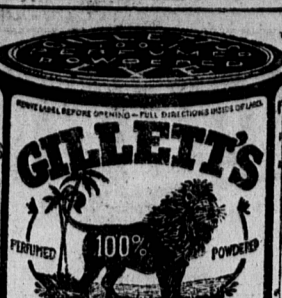

How that "us" and "we," and "our," hurt me! But I comforted myself with the thought—the book is almost finished, she will have no excuse to be here then. So I smiled, and told them not to mind me, while inwardly I knew that I longed to be minded very much indeed. Saturday afternoon they went to the postoffice together and sent the manuscript to a prominent New York publisher. I met them as they were going home from a hard afternoon's work. They were laughing and chatting unrestrainedly until I joined them. They had not seen me, until I was almost abreast of them.

Immediately they became quiet, at least Dick did. "I heard you laughing," I said. "I expect you both feel immensely relieved now that the manuscript is out of the way." "It may come right back," Dick grumbled. "Don't even think that after all your work. We won't talk it back!" I said lightly. "Will you come in?" Dick asked Juanita as we neared the house. "No I think not." It she was waiting for me to say anything she surely must have been disappointed. I would begin at once to hold myself aloof. "Then I'll walk home with you. The walk will do me good. I'll be back by the time dinner is ready, Nan."

I went into the house perfectly disengaged. I had hoped for so much when the book was finished. It was finished. But it looked as if there was to be no change in the intimacy it had fostered to such a dangerous degree. I would sound Dick as to my plan when he returned. I waited until we were drinking our coffee before I unfolded it to him. "You see, Dick, you have been working terribly hard on your book, and we both need a change." Then as he did not answer, I added: "And just think how pleased Junior would be to see us."

"I don't know about going away then, Nan. If Bowman takes my book I may want to take a trip to Europe, thinking of for some time. Somewhere—a man whom we knew only slightly, but a great friend of Juanita's, has asked me to go on a yachting trip with him. I haven't given him any answer yet, but—well, I'll think about it. There's no hurry—you can't go for a month yet anyway I believe you said."

"No, it will take a month longer for me to finish up with the Baker's. I spoke coldly. I had been puzzled, then hurt by the hesitating way in which Dick had received my suggestion for a vacation together, and the calm way in which he had left me out of his own plans. But he did not appear to notice, and we spent the evening reading—he a late magazine, I a book upon interior decoration. Not once did he again mention his book, neither did we talk of anything of interest to us both. We were together, yet as far apart as the poles.

badly and accounts for smoky exhaust. The use of oil of thinner body than recommended for your engine or oil that does not maintain its body under heat, would account for some waste but hardly for the enormous loss you sustain. We assume that you do not fill your crank-case above the prescribed level.

THE ELECTRIC CAR'S SHERE OF USEFULNESS J. O. T. asks: Will an electric car give satisfactory service over rough country roads, where it is used considerably? Answer: Perhaps the best answer to this question is to state that the verdict of motorists in general is to the effect that the electric car is particularly adapted to city and suburban service, and is at a considerable disadvantage in heavy, long distance country travel, where electric charging stations are few and far between. Considering that the gasoline car can replenish its store of propulsive energy in a very few minutes at any town or hamlet, and at almost any crossroads and the electric car can replenish its rather limited supply of energy only at a comparatively few and widely scattered charging stations, and then only after hours of time, the limitations surrounding its use in severe country service become apparent.

IN MEMORIAM JAS. H. VAN IDERSTINE On the evening of Saturday February 19th, Mr. Jas. H. Van Iderstine, a very highly esteemed resident of Hunter River passed to his eternal rest at the age of 53 years. The deceased had been in his usual good health and was carrying on his work in the Post Office until just a week before he was called away.

C. R. C. writes: I am having serious trouble from excessive waste of oil by my six-cylinder engine. When I start with a full supply, I cannot run 50 miles without adding two more quarts, but there is a bluish smoke exhaust at all times, although I have fitted new—piston rings all around. Can my trouble be with the quality of oil used? Answer: You must be using near by one-third as much oil as gasoline, by volume and it is difficult to conceive that all this oil passes out through the exhaust without fouling the plugs. Are absolutely sure that there is no crank-case leakage? Have you ever run the fast, in the garage and watched for oil escape? If the cylinders of your engine are very in compression, it indicates that the piston rings fit me, until I was almost abreast of them.

THIS ENGINE IS AN "OIL EATER" C. R. C. writes: I am having serious trouble from excessive waste of oil by my six-cylinder engine. STOP CATARRH! OPEN NOSTRILS AND HEAL! Cream Applied in Nostril Relieves Head-Colds at Once. If your nostrils are clogged and your head is stuffed and you can breathe freely because of a cold or catarrh, just get a small bottle of Ely's Cream Balm at any drug store. Apply a little of this fragrant, antiseptic cream into your nostrils and let it penetrate through every air passage of your head, soothing and healing the inflamed, swollen mucous membrane. You get instant relief. Ah! how good it feels. Your nostrils are open, your head is clear, no more yawning, sneezing, blowing; no more headache, dizziness or struggling for breath. Ely's Cream Balm is just what suffers from head colds and catarrh need. It's a delight.

when she was taken suddenly ill and all that medical skill and kind nursing could not stay the hands of death. As a Divine Providence willed, we must bow down in humble submission. She was attended in her last hours by her pastor, Rev. Father, McIntyre who administered the last rites of the Catholic Church. Miss McPhee was a noble character. She had no enemies and was loved by all who knew her. Her funeral took place on Monday, Jan. 24th at St. Bonaventure's Church. The pall bearers were Maurice Kelly, John N. McDonald, D. J. McDonald, John Beaton, Ellis Leck, and D. J. McDonald.

Notice of Annual Meeting The general annual meeting of the P. E. I. Rural Telephone Assn. will be held in the Board of Trade rooms at Charlottetown on Tuesday, March 15 at 1 p. m. Each Rural Co. will send two delegates. Meeting to be held at 1 sharp. C. T. FERGOUSON, Secretary, York R. R. 2.

MISS MARGARET MCPHEE On Saturday, Jan. 22nd, Miss Margaret McPhee passed peacefully away at her home in Blooming Point after only a few days illness at the advanced age of 72 years. Her death was a great shock to the community as well as to many friends. She was in perfect health until a week before her death.
