THE agricultural possibilities of Prince Edward Island are great but these resources cannot be fully developed without the aid of improved machinery. The growing of grain is receiving a great deal of attention now-a-days owing to the way the harvest is made easy by the McCormack Binder. The terrible heat is rarely if ever experienced if the farmer will look into the best kind of machine before purchasing. It will be too late on the day you go to the field to make a selection. Mr. J. M. Clark sole agent for the McCormack machines, desires that farmers should call at the different agencies and inspect before purchasing.

ELECTRIC SPORTS

To be Held on To-morrow Evening

THE DIFFERENT EVENTS

With a List of Names of Those Who Will be the the Contestants

Below we give the official list of the entries received for the Electric Light Sports on Thursday evening next. Other entries are expected by mail.

The bicycle events in particular show a grand field of starters comprising all our local favorites and three men from the Boston Press Club who are considered among the fastest.

The fact that these latter will compete will no doubt induce a large number of American visitors, as well from hotels as from the boat which arrives early Thursday evening.

Patrons remember pleasantly the smoothness with which the events of the last Electric Light Sports were run off without any of those tiresome delays between events which sometimes creep in through lack of foresight in the management.

An effort will be made to have the program on Thursday evening pulled off with equal alacrity notwithstanding the greater number of entrees.

Leprosy in the United States.

WASHINGTON, July 13. "Leprosy in the United States" is the subject of an elaborate report which is being prepared for transmission to congress by the surgeons of the Maine Hospital service. It will show that there are about 980 cases of leprosy in the United States proper, and that nearly every large city has one or more cases Officials say that more persons than is generally supposed are afflicted with the disease, but that so long as they are clean personally, inhabit residential locations provided with sanintary arrangements, and consume wholesome food, the danger of communicating the disease to others is reduced to a minimum. Concerning the new possessions of the United States, a member of the Marine Hospital service said: "The Philippines are always in prime condition for the birth and growth of leprosy and there are hundreds of cases there which will have to be attended to. In Cuba and Porto Rico, however, the disease is not so general. In Hawaii the ailment was unknown prior to Captain Cook's arrival from China. It now has a great many cases."
