- Florence Higgins, Prince Street, 423.
- Christina McLeod, Summerside, 420.
- Maud McKay, Emerald, 418.

SHOULD BE JAILED.

Dr. Laberge on People Who sell Diseased Cattle.

MONTREAL, July 20.—The city milk inspectors discovered a very bad case of lumpy jaw at the Eastern Abattoir yesterday. When the animal was slaughtered it was found that it was also badly affected with tuberculosis. When the facts were reported to Dr. Laberge, Medical Health Officer, he expressed himself very strongly concerning the inadequateness of the law for the punishment of those who ship diseased cattle to large centres of population. The act should be made a criminal offence, he says, punishable by imprisonment. The animal slaughtered yesterday is said to have come from Ontario.

Hitherto the Province of Quebec has been thought to be entirely free from lumpy jaw. This illusion was dispelled this morning, however, when an animal shipped from St. Gabriel du Brandon this Province, was found to be affected with the disease. As this is the first case known to have originated in the Province, special interest attaches to it, and an enquiry will probably be made to ascertain its cause.

Cured of Epilepsy.

THE STORY OF A ST. CATHARINES LADY WHO IS RESTORED TO HEALTH.

She Suffered Severely, Sometimes Having as Many as Four Spasms in a Week—Several Doctors Consulted Without Benefit.

Mrs. S. B. Wright, of St. Catharines, has for a number of years been a severe sufferer from epilepsy, from which dread disease she is now happily free. To a reporter who recently called upon her to ascertain the manner of her cure, she said:—"It is Dr. Williams' Pink Pills I owe my release. It is some years since I had my first attack. At the time I did not know what the trouble was, but the doctor who was called in to attend me at once said it was epilepsy, and that the disease was incurable. After this I had the spasms as often as two, three and four times a week. I had no pramonitory symptoms, but would fall no matter where I was. I always slept heavily after an attack. Finding that the local treatment was not helping me my husband took me to a doctor in Hamilton. He also said that he could not cure me, but that he could give me medicine that would prolong the period between the spasms. This he accomplished, but I longed for a cure rather than for relief, and I finally consulted a specialist who told me that he could cure me, but that I must have patience. I asked him how long he thought it would require to effect a cure, and he replied at least six months. He gave me medicine and I took it faithfully, but instead of getting better I was surely growing worse. After following this treatment for some months without avail I felt that I could not hope for a cure and was about resigning myself to fate. My sister, however, urged me to give Dr. Williams' Pink Pills for Pale People a trial and reluctantly I decided to take her advice. For a time after beginning to use the pills I continued to have the spasms, but I felt that gradually they were less severe and my strength to bear them greater, and I persisted in the treatment until the time came when the spasms ceased and I was as well and strong as ever I had been. I took in all twelve or fourteen boxes of Dr. Williams' Pink Pills, and although several years have elapsed since I discontinued their use, I have not in that time had any return of the malady. I owe this happy release to Dr. Williams' Pink Pills, and will always have a good word to say for them.

The experience of years has proved that there is absolutely no disease due to a vitiated condition of the blood or shattered nerves, that Dr. Williams' Pink Pills will not promptly cure, and those who are suffering from such troubles would avoid much misery and save money by promptly resorting to this treatment. Get the genuine Pink Pills every time and do not be persuaded to take an imitation or some other remedy from a dealer, who for the sake of the extra profit to himself, may say it is "just as good." Dr. Williams' Pink Pills cure when other medicines fail.

MARRIED.

June 10 by Henry S. Fish, First Reader Chri t Church Scientist, Chelsea Massachusetts, Miss Elsie McKinnon, of Earscliff, P. E. I. to Albion H. Down of Boston Mass.

At the home of the bride's parents Victoria, P. E. I. July 19th by Rev. David Price, Tryon, George W. Hibbett, conductor on P. E. I. R. to Earle Granville Lord.

At the Manse, Mount Stewart, on July 19th, by Rev. A. Craise, Davis Edwin McEwen, St. Peter's Harbor, to Sarah Belle, daughter of Edward Webster, Marie.

At the Manse, Cardigan, on July 19th, by Rev. A. Gunn, Edmond Anthony Jeffrey, of Georgetown, to Ecbea Jane Blackett, of Annandale.

The stories of slaughter that the old soldier could tell his little son are so awfully sad that they would make a sensitive child weep with horror and pity. But all the stories of war on sea and land shrink into insignificance before the dreadful massacre of men and women, for which that relentless enemy of life, consumption, is each year responsible.

Scientists state that one-fourth of the adult men and women in the civilized world have in their bodies the seeds of this grim destroyer. A single grain of dirt taken from a city street, under the microscope sometimes reveals as many as a million of the minute but murderous bacilli of consumption. There has never been but one medicine discovered that will prevent and cure this disease. It is Dr. Pierce's Golden Medical Discovery. It acts directly on the lungs, driving out disease germs and building new and healthy tissues. It allays inflammation of the mucous membranes. It is the great blood-maker, flesh-builder and nerve tonic. It cures 98 per cent. of all cases of consumption and diseases of the air passages. All medicine dealers sell it.

Mrs. Louisa Steinmann, of 67th St., Brooklyn, N. Y. writes: "Three years ago I was so sick I could not eat, sleep or walk, for I coughed all day and night. My weight was reduced from 150 to 127 pounds. The first night that I slept four hours at one time, was after I had taken three doses of Dr. Pierce's Golden Medical Discovery. The offensive matter expectorated grew less every day and when I had taken the whole of one bottle I could sleep all night without coughing, and have been well ever since and weigh 178 pounds."

When someone is sick in the family and the doctor is called in, what is the first question he asks? "Are the bowels regular?" That's the question, isn't it? If a wife and mother will see to it that when any member of the family is troubled with constipation a prompt resort is had to Dr. Pierce's Pleasant Pellets, there will be mighty little sickness in the family. One little "Pellet" is a gentle laxative and two a mild cathartic. They cure constipation and biliousness and never gripe. They regulate and invigorate the stomach, liver and bowels. Found at all medicine stores.

THE ATLIN MINING Co. OF ONTARIO LIMITED.

OFFICERS:
 JOHN TORRANCE, Jr. Montreal, President. W. W. MEACHAM, M.D., Kingston, Ont., 2nd Vice Pres.
 WILLIAM MOORE, London, Eng., 1st Vice President. J. B. CLARK, ON, Montreal, Treasurer.
BANNEL SAWYER, B. C. L. Secretary.

Capital: \$400,000, divided into 1,600,000 shares of par value of 25c each.
 Incorporation: Working under the Ontario Company's Act, non-personal liability.
 Treasury: Fund 600,000 shares from the sale of which development funds will be received and expended in placing the mine on a dividend paying basis.
 Mine: The mining location which it is the special province of this Company to develop, is known as the "SIRDAR OF THE MANITOU." It is technically known as the H P 259 location, and lies in the Rainy Lake Mining District of Ontario.
 The Vein: Is 4 feet wide at the service or wider and the width increases as the shaft is sunk, until at a depth of 45 feet it is about 7 feet across.
 Work: In addition to surface prospecting and tracing the vein over the property, a shaft has been sunk to a depth of 45 feet, and a contract has been given to sink 30 feet farther and to drift for 60 feet on the vein. When this is completed, further and permanent development will be arranged for.
 Mill Test: Eighteen tons of ore from the dump were milled and the gold returned at the "Keewatin Reduction Works" which went \$9.60 to the ton. Five-hundred pounds from the pay-streak was put through, which went so heavy in gold that extra quick silver had to be put on the plates to catch it all.
 Concentrates: These were only partially saved, but we have one thousand pounds on hand which we sampled and had assayed by Professor Donald which showed \$153.09 to the ton. If all the Concentrates are as rich as this, the whole cost of operating the mine can be paid from them alone, leaving the free milling gold for dividends.

Gold Bricks: We expect to have our first gold brick in Montreal within 6 months from the 1st of June.
 Shares: We are offering 100,000 Treasury shares at 15c, payable cash, 1/3 in 60 days and 2/3 in 90 days. Those who wish to pay in full at time of purchase may do so and receive their scrip at once.
 Conclusion: From the result already obtained, we think we are safe in saying that this is one of the best and most promising investments in sight, and we believe that large profits will be made from such investment in a very short while.

ENGINEER'S REPORT.

WABINGTON, ONT., 28 Dec., 1898.
 Made by Mr. Hugh D. Alston, of the Neepawa Mine Ontario, late of London, England.
BANNEL SAWYER, Esq., Montreal, Que.
 Sir:—In accordance with your request by telegram dated Nipigon, 22nd Dec. I now beg to hand you report on Sirdar Mine, better known as "Swede Boys."

Locations and Means of Communication. The property contains 67 acres, more or less, situated on the upper Manitou Lake, in the Rainy River District of Ontario, it is distant about seven miles from Denmark at the head of the lake and about thirty-miles from Town of Wabigon, a station on the main line three of the Canadian Pacific Railway. At both points there are stores which nearly all necessary supplies can be obtained at reasonable cost. Communication is carried on during the winter by horses and sleighs and in summer by steamboats, with the exception of seven miles over a government road.
 Shaft and Lode: The shaft is down 45 feet and timbered for about 10 feet and from there down it is about 6 x 8 on a slight incline partly following the hanging wall.
 The vein is exceptionally well-defined and regular, and it is a "fissure" vein of a "banded" structure, it shows the full width of the shaft—this would make the vein over 7 feet wide.
 Mill Sites, Timber, &c. There is a very favourable mill site East of the shaft, on the Lake shore, and as the ground rises towards the shaft, ore could be supplied to the mill by gravity tramway at small cost.
 There is a large quantity of dry timber on the property sufficient for fuel requirements for some time to come; building logs and mill timber can be obtained adjacent to the lake.
 Recommendation. Considering that this location is so favourably situated for mining and milling, and, judging from the character of the vein and quality of ore exposed in the shaft, I am of the opinion that this location will develop into a very valuable mine on a comparatively small outlay, and have no hesitation in recommending it as a sound investment.

Yours faithfully, **HUGH D. ALSTON**

Application for shares should be made to the Secretary.
BANNEL SAWYER, B. C. L.,
 Temple Building, MONTREAL.
 July 19 1899—wed sat mon.t

Assays: By Milton Hersey, Esq., B. A. Sc., Consulting Chemist of the C. P. R. of Montreal, average sample of the dump (not knowingly putting in any of the pay-streak, which was carefully sacked, as it was extracted from the shaft) went \$54.19; also sample from the bottom and sides of the shaft went \$72.00 to the ton.
 By Professor Donald, M. A. Professor of Chemistry, Bishop's College, sample taken from the pay-streak went \$1,585.50.
 By various persons, the following results were obtained: \$14, \$39.60, \$615.
 Plan of Operation: As soon as the work now under contract has been completed, our plan is to erect a two stamp mill in such a way that eight more stamps can be added later on, when the mine is sufficiently developed to supply ore rapidly enough to keep that number of stamps going night and day.
 Output: Would be more than enough to keep the two stamps going, when we would be able to see and prove the value of our mine and we would also receive money steadily from the ore to help pay for development, thus rendering it unnecessary to sell many Treasury Shares and enabling us to command a better price for them when offered.
 Profits: The total cost of mining this ore need not exceed \$2.50 per ton, and estimating it at \$20.00 there would be a yield of \$18,000 per month, crushing 30 tons a day.

The Very Latest Pineapple Champagne

A sparkling non-alcoholic beverage possessing an exceptionally fine flavor which is bound to prove very popular. For sale by all first class grocers etc.

G. H. SIMMONS,
Sole Bottler.

FOR SALE Cheap.—A Ladies' Rambler Bicycle used only a few times. Apply at this office.

Hughes SPECIAL REMEDIES
