New Jersey Market For Seed Potatoes Continues Promising

Bookings For Quarter Million Bushel Movement This Fall Have Been Made By The Island Association, Despite Fact That Worst Phase Of Season's Operations Is Now Being Experienced. Mr. W. J. Boulter Sums Up Impressions Of Potato Situation After Visit To United States.

Confidence that despite depressed market conditions the Potato Growers Association will not have enough certified Cobblers to fill the orders which it will receive later on was expressed by Mr. J. W. Boulter, secretary of the Association, in an interview with a Guardian representative yesterday. Mr. Boulter has just returned from an extended trip to New York, Pennsylvania and other states represented by dealers who handle seed potatoes for the Prince Edward Island association, and who are distributed from the State of New York to the Gulf of Mexico.

Dealers in the Southern States look for a reduction in acreage next year, Mr. Boulter states. Those of the State of New Jersey, however, are quite certain there will be no reduction in that State, and as New Jersey plants practically 90 per cent Prince Edward Island seed, there is bound to be a demand when the time approaches for the farmers to make provision for their seed.

On the outlook for the potato situation in general Mr. Boulter was very reluctant to express himself. He did not wish to be pessimistic regarding the disposal of the seed, but at the same time could not guarantee anything definite. The deplorable financial situation of the farmers in the sections of United States requiring seed potatoes prevents them buying at this time, while the assets of the dealers are pretty well tied up.

The low price of flour, rice, beans and other food commodities has had the effect of checking, to some extent, the consumption of potatoes, so that States that normally would be cleaned up with their

Heavy Fog Over Surface of Cobequid Bay Hampers Work of Searchers.

PARRSBORO, N. S., Oct. 8. (By the Canadian Press)—Fog that lay on the surface of Cobequid Bay and Minas Basin today hampered searchers for the bodies of Fritz Simon and Rudolph Wogenknecht. Nothing was added to the broken pontoon, scraps of official papers and splintered wing fabric which yesterday indicated definitely the fate of the two German flyers, who crashed off Burncoat Light on Tuesday morning, while flying the mail from the liner Bremen, at sea, to New York. These scraps of evid-

2 Resignations From Nat. Gov't.

By George Hambleton, Canadian Press Staff Correspondent

LONDON, Oct. 8.—Two resignations from the National Government mark the opening round of the great electoral battle. They are: Major Gwilym Lloyd George, Parliamentary Secretary of the Board of Trade, and Major Goronwy Owen, Controller of the Household.

Both held only junior posts, but the resignation of Major Lloyd George is especially significant as indicating the attitude of his famous father, Rt. Hon. David Lloyd George.

Both resignations were similar. "I took for granted," declares Major Lloyd George in a letter to Prime Minister Ramsay MacDonald, "that there would be no attempt to organize the National Government into an anti-Labor combination and I relied upon the pledge given by you that it would confine its existence to the period needed to deal with immediate issues, and that you would not, under its auspices, fight a general election or attempt to form a permanent coalition. "In fact, however," the letter continues, "the National Government has not only failed to secure these objects; it has not even made them its chief concern. There has been no examination carried out by the government of the very problems

GOLD STRIKE IN ALBERTA LOOKS BIG

(Canadian Press)

CALGARY, Alta., Oct., 8—Samples of nuggets taken from Big Timber Creek were assayed today at the technical institute here and pronounced pure gold. A rush of gold seekers into the area, 65 miles northwest of Moreley, Alta., was expected by Harry Ford and Jack Hunter, coal operators, who displayed the gold samples.

Ford and Hunter, Wednesday accompanied 25 members of the Stoney Indian tribe at Moreley reserve into Calgary where they registered 39 placer and gold quartz claims at the Government office here. The indians had made the gold discovery in the creek and because they were in doubt of the find had taken Ford and Hunter in to their confidence.

The Indians had samples of gravel which showed strong traces of gold. They declared they had discovered an abandoned cabin and an old prospector's pick and pan near Big Timber Creek. They believed that the Lemon Mine, famed in song and story as the lost Eldorado, would be found in the vicinity.

Many outfits today were preparing to rush to the scene. There is an automobile trail from Calgary to within 30 miles of the strike, but the rest of the journey must be by horseback and pack train.

Is Hopeful Of Price Increase After Harvest

Maine Potato Crop Much Lighter Than Reported, States Visiting Co-operative Manager.

That the Maine potato crop is much lighter than is reported, and that it is not by any means free from rot, is the opinion expressed by Mr. Ralph H. Gaskill, manager of the Essex County Co-operative Farming Association, of Topsfield Mass., who with a party motored to Charlottetown this week and spent some time looking at the seed potatoes of the Province. Mr. Gaskill's organization imports a few cars of northern seed, and he speaks very favorably of the results obtained from the use of Prince Edward Island seed.

While not claiming to be an authority on potato marketing, Mr. Gaskill believes that there is not the quantity of potatoes available to keep the market so low as it is at present. While there is little hope of high prices he feels there should be an improvement after harvesting of the crop is completed.
