DIVORCE CASES FOR THE SENATE

STAG CHEWING TOBACCO

MONTREAL, Feb. 15.—The next session of parliament will eclipse all records in the number of divorce cases before the senate, says the Ottawa correspondent of the Montreal Star.

Mr. John A. McLaren, who is now head of the firm, (associated with Mr. J. W. Stewart, Mr. Irving G. McLaren, Miss Dolron, Miss Harry McDougall, the Messrs. Donoette, Miss Thompson, Miss Harper and others of the staff), has been a partner of Mr. Paton for nearly thirty years.

So far 112 notices of intended applications have been published. The formal petitions setting forth particulars cannot be presented until parliament assembles.

OUR SCHOOLS

Sir: "If the war taught one lesson more profoundly than another it was the need for education. Never indeed in any period of the world's history have the responsibilities and requirements of nations more clearly demanded the placing of the school upon a place of efficient service.

The above short paragraph taken from an article entitled "Is the Government neglecting Canada's Youth?" in the February number of "Everywoman's World" gives expression to a most important truth.

How can present conditions be improved? The present indications are, not that improvement is being made but that things are becoming worse. At no time within the last fifty years have there been so many vacant schools as at present.

Pay a living wage to the teacher. Make the inducements to the successful teachers such that they will be willing to continue at the profession, that is, when teaching is raised to the dignity of a profession.

The problem is admittedly a difficult one, and until those who control public affairs can be made to realize that the greatest asset of any country is its inhabitants especially the children; until they see in the child something more valuable than a horse, cow, or black fox, it will not be attacked manfully.

When the real importance of an intelligent well educated industrious community is realized means will be taken to secure such out by the only means possibly, efficient schools.

Today, through the commendable action of the Department of Education, the attention of the people is being called to this matter as never before.

Every School section in the province is invited to speak in the matter. There should be a very general response. Will there? I am, Sir etc.

Teeth Do Not Stain It is Film that Clouds Their Whiteness

All Statements Approved by High Dental Authorities

Learn the Cause of Decay

Dental science has now traced most tooth troubles to a film. To that slimy film which you can feel.

That is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

The film is clinging. It enters crevices and stays. No ordinary tooth paste can dissolve it. A soapy tooth paste makes it more viscous.

So, despite your brushing, much film stays. Night and day it does its damage. It is the great tooth wrecker.

Science now has found a way to combat that film. The fact has been proved by many clinical tests. The method is now advocated by leading dentists everywhere.

For daily use it is embodied in a dentifrice called Pepsodent. And we are mailing 10-Day Tubes so that every home may try it.

Do This and See

We urge you for your own sake to write for this 10-Day Tube. See the results for yourself.

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to constantly combat it.

Pepsin must be activated, and science has discovered a harmless activating method. The usual method is an acid harmful to the teeth, so pepsin long seemed impossible. Now everyone may apply it, morning, noon and night. And the evidence is that this invention brings a new dental era.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears.

Compare results with the methods you use now. Then judge for yourself what is best. Cut out the coupon now.

Look in 10 Days Note how the teeth glisten. You can see that the film is gone.
