Victor McLaglen At The Capitol

"The Magnificent Brute," a giant of a man, is torn between two blondes. That is, two at one time. The battle of the blondes for his affection starts at the Capitol Theatre today. The story is taken from Owen Francis' "Big," which ran in Liberty Magazine.

Shirley Temple At Prince Edward

A Shirley Temple more glorious than anyone has ever known and a beloved story that has enthralled millions the world over arrived yesterday on the screen of the Prince Edward Theatre in the never-to-be-forgotten picture, "Heidi." Johanna Spross' enchanting tale brought to such happy ending the life that it touches the deepest corners of the heart.

dance sequence, with special routines arranged by Sammy Lee. Shirley also sings the grand new novelty tune, "Our Little Wood on Shoes," written by Lew Pollack and Sidney D. Mitchell.

In Memoriam MR. LLOYD OTTAWAY

The citizens of Borden and surrounding territory, were deeply shocked, when they learned that death had claimed Lloyd Ottaway, a well known and popular citizen of Stanley Ottaway. His passing, on Monday evening, 16th, was quite unexpected, as he had been ill only a few days. A heart ailment, which developed into pneumonia, ultimately terminated the earthly career of this promising lad; and despite all the medical skill and tender care which was his, he passed peacefully to the great here.

Then begins the aforementioned struggle between the blondes for the possession of Steve, Binnie Barnes, as Della, scores the first victory. Jean Dixon, as Blossom, uses feminine strategy to gain the advantage. The climax pits Steve against Morgan in a stirring conflict, a battle of titans.

Johanna Spross' enchanting tale brought to such happy ending the life that it touches the deepest corners of the heart.

East and West Figure Skaters Seeking Titles

WINNIPEG, Jan. 27.—(CP)—Mary Rose Thacker, 15-year-old star from the Winnipeg Winter Club pits her skill against Canada's best figure skaters with the Dominion title at stake when the Canadian Figure Skating Association stages its annual battle of the blades Jan. 28 and 29 in Winnipeg.

Her strongest competitors all come from Toronto. The Garnits Skating Club sends three of the best in the country, Dorothy Cayley, 1937 singles champion, Hazel Cayley, Dorothy's sister, who narrowly lost last year to her sister, and Eleanor O'Meara, who won the 1936 title.

But Toronto Skating Club entries, too, will be watching for Mrs. Constance Willard, former Canadian singles champion, and Veronica Clarke will represent that club.

Miss Thacker swept to her junior title against Canadian skaters, including Nora McCarthy of the Toronto Skating Club and Audrey Miller of the Granite Skating Club. Despite her age, she is no newcomer to figure skating circles. Since she was three and a half years old she has been skating at the Winnipeg Winter Club.

Winning the junior title made compulsory her competition as a senior, as the junior classification is not based on age but experience. Because Miss McCarthy was only second last year in the junior competition, she will compete as both a junior and a senior this year.

Chief interest centres on the senior women's contest, for there keen competition is assured. But there will be an interesting East-West angle to the senior pair championships. Mrs. Veronica Clarke and Ralph McCreath, Toronto Skating Club, holders of the North American and Canadian pair championships, will meet the challenge of the youthful Winnipeggers, Mrs. George M. Black, Jr., and Jack Kilcur.

Last year Mrs. Black, then Miss Betty Reilly, teamed with 22-year-old Kilcur to win the junior pair championship. Careful attention under the watchful eyes of the Winnipeg professional, Lewis Ekin, has improved the two considerably. Winnipeg experts rate them as serious contenders for the senior title.

Mr. and Mrs. Donald B. Cruickshank, who were second in the 1937 Dominion finals, again are entered in the Minto Skating Club of Ottawa.

Possibly Patricia Chown and Phillip Lee of Winnipeg may compete in this class.

Winning Winter Club officials today hoped for entries from as far west as Vancouver, for it is the first time since 1928 the Dominion association has staged its competitions west of the Great Lakes.

Regina's Dick Salter in the men's junior section will represent the Western Canadian Skating Association's capital against Toronto Skating Club entries of Jack Vigon and Sandy McKeechie and either Jack Kilcur or Burton Kennedy.

Wingate Smith, Montreal Winter Club, runner-up for the men's singles title will not be faced with last year's champion, Osborne Colson, who has turned professional. But Montgomery Wilson, and Ralph McCreath, hold the present North American title and are conceded almost sure winners of the Winnipeg meet.

Last year's star team of four from the Minto Club of Ottawa is divided, two members, Prudence Mackenzie and Guy Owen turning professional.

Junior events will be held the first day of the meet, the senior events on the second day. Dancing events will be held on the third day, sponsored by the association, so the Winnipeg Club will stage a special event for juniors.

Comparatively few Canada's skaters, enter the 20 coming from the East and fewer from the West.

James Bay Attracts Many Waterfowl

OTTAWA, Jan. 27.—James Bay region at the southern end of Hudson Bay is one of the greatest gathering places for wild geese and ducks on the North American continent. While no complete census figures on this subject have ever been compiled, it is believed that about thirty per cent of the wild geese hatched in the Arctic pass through James Bay on their autumn migration.

Precisely all the Blue Geese in existence and possibly one-third of the Lesser Snow Geese participate in this great rendezvous, together with some Canada Geese and American Bantam numbers of ducks and some Canada geese in the area.

These are overshadowed by the abundance of Blue Geese and Lesser Snow Geese which make James Bay a stop-over point on their flight from the Far North.

Possibly the main attraction of the James Bay region for waterfowl is the extensive feeding grounds along the coast and inland, and tidal flats, but no doubt the outline of Hudson and James Bays, which is roughly funnel-shaped, also plays a part in producing the heavy concentration of migrant geese and ducks around the south end of James Bay.

The Bay stretches about 230 miles from north to south and 140 miles from east to west. On the south and west sides the land is flat with a slight slope and the shores are bordered by extensive tidal flats, which are covered by water from a large inland sea level, standing at the high water mark and looking out over the flats at low tide.

In some places, unable to see the distant shore, the water appears to be a normal high tide line lies a strip of marsh averaging about a mile wide, and back of the marsh is a coniferous forest, interspersed with areas of muskeg and swamp.

On the eastern side the coast descends more steeply, but even there one finds several large, shallow bays, fresh water ponds, and a large drainage basin flows into James Bay in a number of large rivers, from the east, south and west.

Would Not Limit Naval Craft Size

PARIS, Jan. 26.—(AP)—The chamber of Deputies Naval Committee, concerned over Italian battleship construction and Japanese activities in the Orient, went on record today in favor of abolishing clauses of the 1936 London Naval Treaty limiting battleships to 35,000 tons.

The deputies, decided at previous meetings to urge construction of two 42,000-ton warships to offset Italy's two new 35,000-ton battleships, but today was the first time their attitude was recorded officially.

Jean Michel Renaitour, chairman of the Navy Committee, reviewed naval construction programs of foreign powers and stressed the necessity of taking measures to speed up French construction. He expressed the belief France should regain the right to build ships as she wants, the committee agreed.

May Hand Down Judgments Feb. 15

OTTAWA, Jan. 26.—(CP)—The Supreme Court may deliver judgment in the Alberta constitutional reference Feb. 15, it was indicated here today.

The usual February term of the court was postponed from Feb. 1 to Feb. 15 and it was assumed the reason was to give the judges time to work over their friends' suggestions. A certain amount of speed is necessary in the case to get it to the Privy Council in England at its earliest term.

The reference was started before the Supreme Court Jan. 10. There were three questions to be decided—whether the dominion retained its power to disallow provincial enactments, and whether the lieutenant-governor had power to reserve assent to bills pending instructions from the governor-general.

From Nanking, Nov. 18, Miss Borel wrote the family, with her mother and brother, Dr. Roy Mar, superintendent of the Nanking Municipal Hospital. Portions of her letter were let loose.

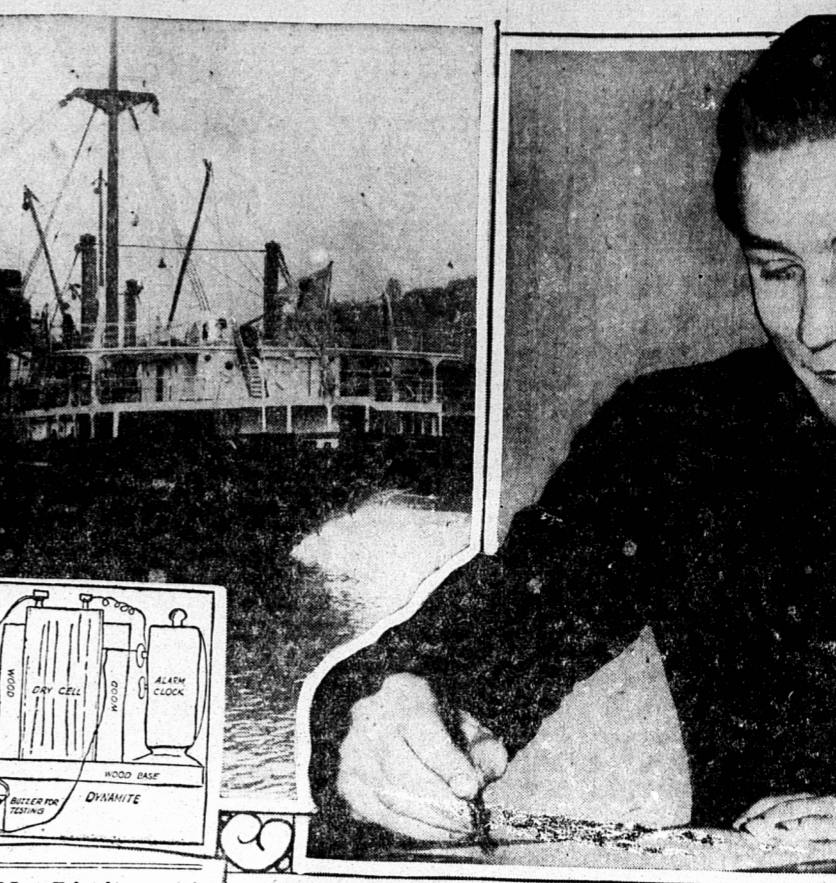

"We stayed at a model village, Wuish, until Oct. 13. On the 14th, two bombs were dropped by enemy planes. The village was destroyed. Mother and Dad, and the following day we went out in the fields. The same day planes again visited the village, but only machine gun bullets were let loose.

"On Oct. 18, we sought shelter in a little native village all day, each morning going down at dawn and returning every night at sundown. We stayed at this village until Oct. 26. The evening of this day we took refuge cars and reached Nanking the following morning. We were very fortunate in having a quiet but monotonous trip. No enemy planes bombed the train or stations on the way.

"At Nanking we stayed at Roy's. We were almost without possessions. From Oct. 28 until now we've been in Nanking. Fortunately the capital has been very quiet. We only had three air raids since arriving. Now that troops are gradually retreating, Nanking is in danger. We are always in contact with the Mayor. He says that fighting probably will take place in Nanking before long. He urges us to flee to the interior or get anywhere away from Nanking.

"In my small way I shall do my best. I hope that all will be well. It may be weeks or months before I am able to write you again."

Attempt to Bomb Liner Ends With Death, Arrest For Vancouver Men

The Importance of Wood as Fuel

OTTAWA, Jan. 26.—Canada's forests continue to be an important source of fuel, supplying about 15 to 20 per cent of the domestic requirements of the country. During the five-year period 1931-35 the average annual cut of fuel wood in Canada was approximately 10,000,000 cords valued at about \$33,000,000.

Wood as a fuel has a very definite field. It is the mainstay for heating purposes in villages and towns in those parts of Canada where lack of local deposits prevents the population from securing cheap coal for domestic use. If methods of selling, measuring and burning firewood were improved the value of this fuel undoubtedly would be more appreciated.

To this end the Forest Products Laboratories and the Testing and Research Laboratories of the Department of Mines and Technical Surveys, in co-operation with other organizations, are investigating ways and means of extending the use of wood for fuel.

It has been found that as a rule the fuel value of seasoned wood depends generally on the weight per cubic foot, the heaviest woods naturally giving the most heat. A standard maple or yellow birch split firewood weighs upwards of 4,000 pounds, whereas a similar cord of softwood may weigh less than two-thirds as much. The relative value of the different wood fuels may, therefore, be approximately compared on the basis of contents. Two cords of seasoned firewood are generally required to furnish the amount of heat obtainable from a pound of anthracite coal of good grade.

It is a mistake to think that the cost of good grade anthracite coal is less than that of seasoned firewood. The cost of fuelwood is used in heating installations designed for coal. In order to deliver the same amount of heat to a two-thirds as much. The relative value of the different wood fuels may, therefore, be approximately compared on the basis of contents.

The extension of the use of wood for fuel, especially that not utilized for logging or in sawmills, would be of great advantage to producer, consumer, and labour, and if the cut of fuelwood is adequately regulated to enhance the value of Canada's forest stands.

CRIME DWINDLING SAYS INSPECTOR

EDMONTON, Jan. 26.—Average citizens have become frightened by the news of a diminishing crime rate, says Inspector Mait Blackwood of Edmonton City Police force in an interview.

"It is wrong to say a policeman's life is all happy. It is wrong to say it's all unhappy. Policemen have ups and downs just like everyone else. The inspector who is six feet three inches tall, has been on the force 26 years and it is his belief that most of the serious crime in the city is the work of transients.

RIDE BATHUBS TO PROSPERITY

(By The Canadian Press) WELLINGTON, Shropshire, England, Jan. 25.—Declaring the average Englishman took about 10 baths a year, Mrs. Eileen Murphy representing the British Commercial Gas Association, told the National Union of Townswomen's Guilds here, if Britons bathed daily national prosperity would increase with the use of more bathtubs soap and fuel.

STURGEON WOMEN'S INSTITUTE

The January meeting of the Sturgeon Women's Institute was held at the home of Mrs. Loinel Collins on the evening of the 25th with an attendance of eleven members and three visitors. Meeting opened by singing Institute Ode and reading the Creed in unison. Minutes of last meeting were read and approved. Five were then paid amounting to fifty-five cents. Reports of committees were heard and new ones appointed. It was moved and seconded that all bills from the annual meeting be paid. Library of books was talked about and it was moved and seconded that they be sent for. It was decided that a Masquerade Dance and box social be held in Sturgeon hall.

It was suggested that a bath robe be bought and given to a sick member also two letters of sympathy be written. Program of the evening—Monologue by Mrs. John Lavers, Mrs. Leo French, and Mrs. Richard Westway. Mrs. Ray Collins invited the Institute to her home for next meeting. Helpers Miss Alice Lannigan and Mrs. Lloyd Collings.

Meeting closed by singing the National Anthem. A dainty lunch was then served by Mrs. Loinel Collins, assisted by Mrs. John Collings, Mrs. Leo French.

RIDERS PROPOSE TO VISIT CANADA

SYDNEY N.S.W., Jan. 26.—(CP)—A team of four Australian riders will shortly visit Canada and the United States, probably to compete on the rich rodeo circuit.

Arrangements to bring the team to North America were made by Col. Tim McCoy, member of Ringling brothers and Barnum and Bailey Circus. Heading the four riders will be Lance Plathorne, one of Australia's leading horsemen.
