

# Here is the Most Attractive Fox Ranching Proposition Open to the Investors Of Prince Edward Island Today

## The Melrose Black Fox Co. Ltd.

Authorized Capital \$150,000.00

Stock Issued \$85,000.00

Have secured five pairs of the best pure bred Black Foxes in the world, whose pedigrees trace back to the Foxes whose pelts produced the world's price record on the London Market. They are also the descendants of foxes noted for their prolificness, which fact should not be overlooked by intending investors. At present it is proposed to issue stock to the amount of \$85,000.00 divided into 850 shares of \$100.00 each par value, being a sum sufficient to complete the purchase of the five pairs of foxes and pay all necessary organization expenses.

### The Ranch

Is located at Marshfield six miles from Charlottetown on the farm of Peter McN. Robertson. It is built in an ideal grove of fir and birch, sheltered in winter and cool and shady in summer. It is built within a stone's throw of Mr. Robertson's dwelling, who is care taker, and who has had a most successful experience in caring for foxes, both old and young. The ranch is one mile from the public highway, thus securing the greatest possible freedom from noise or other distractions so injurious to a fox ranch.

### Cost of Ranching

The owners of the ranch will supply the pens, food, keeper, watchmen, attendance of a veterinary surgeon and everything necessary for the health, comfort and safety of the animals, the ranch retaining 15 p. c. of the offspring.

### Capitalization

It will be seen by the figures that the foxes are capitalized at \$17,000.00 a pair which is the lowest capitalization on guaranteed stock of the Dalton, Oulton, Gordon and Tuplin strains on the market today, and as the percentage of dividends depends on the capitalization, you will readily see by comparing this proposition with any other now on the market, that this is the only company worthy of consideration of the careful and conservative investor.

### This is Your Opportunity

The cost of foxes is advancing year by year. The sooner you get into the business the sooner your wealth begins to accumulate. From five pairs there should be at least 15 pups which at present prices would net the shareholders 95 to 100 p. c.

### Without Fear of Contradiction

We state, that the surest method for an investor to make money in the fox industry, is to place his money in a ranch that is stocked with the best foxes that the world has ever produced, capitalized at a figure which will insure the largest possible percentage of profits.

It is beyond question that the Melrose Black Fox Co. Ltd. is destined to become one of the greatest Fox companies in existence, and whether the investor buys stock in this company as a permanent investment or as a speculation, a good return is absolutely assured, as the promoters fully believe that inside of six months the stock of this company will be worth at least \$125.00 a share.

It is estimated that there are over \$7,000,000.00 invested in the Fox industry in this Province and it is the opinion of calculating business men that it is only in its infancy. Large amounts of money have been made and are now being made and shall continue to be made for many years to come.

### DAILY SELECTIONS FOR GUARDIAN READERS

Furnished by W. S. Louison.

#### BETWEEN OURSELVES

In this public way let me thank many who from time to time send selections to pass along, in this corner of the Daily Guardian. Not only this but I am very happy to know from letters received, and from hosts of others by word of mouth, in different places in the province, that this this corner has proved helpful and uplifting. Oh the power of the press, how little seemingly we understand its influence for good or evil. In our prayers, let us occasionally remember, the press of our land. The thought uppermost to day, is Spring time. The trees are putting on new green clothes, some bursting into beautiful blossom, showing their thankfulness to the Creator. "Tongues in trees, books in the running brooks, Sermons in stoves, and good in every thing." "Oh that man would praise the Lord for His goodness and for His wonderful works to the children of men." Let me pass along to you a few thoughts, clipped from an English newspaper, as follows:

For scent of lilac after last night's rain;  
For feathery ash-buds bursting into leaves;  
For joy of beauty that is almost pain;  
I praise Thee, Lord.
