The people have had quite an experience with this blank cheque business in this province. The Bell Government asked for one and got it. Now they are filling in the blanks and the average taxpayer is pretty well acquainted with their manner of doing it.

Of course when it leaked out that business was being conducted in this loose and unlawful way, Dr. Lea and his assistants ceased administering his medicine in the held the nose forceful way until the House met, and then by means of the "Cure-All" Act he drew the sting of criminality from the forehead—the throat method. And the County Court has been resorted to, to enforce collection of these blanks which appear to have been since filled in. Of course, no one expects anything better than this kind of bungling from the Bell Government, but in the present instance it is the Federal Liberals that are asking for a BLANK CHECK of the same kind, to be filled in to suit themselves if they get into power.
