Success Of Farm Made By Woman

PARIS, Jan. 27.—Widespread indignation has been roused against the action of the Institute of France in evicting a young woman Mlle. Gouze, from a farm near Chantilly, of which she had made a great success. Mlle. Gouze is but another victim of French officialdom and rooted prejudice against feminine initiative. She was merely notified by the institute which owned the estate, that she must quit the farm as the end of her lease. She was given no chance of renewing the lease at an increased rent of $2,500, which the new tenant is to pay, instead of the present rent of $1,600. Public sympathy with Mlle. Gouze, pretty and ex-student, is all the greater because it was by her own untiring labor and application of modern scientific methods that she increased the value of the land. Now she is faced with the loss, not only of three years' labor, but also of $5,000 which she had borrowed from the state for development. She took the matter to the courts, but lost on technical legal grounds.

PECULIAR ACCIDENT

SYRACUSE, N.Y., Jan. 25—Helen Vickery, of Schenectady, N.Y., a student nurse at the Good Shephard Hospital here is confined to a bed in that institution with a fractured vertebrae, suffered while combing her hair Sunday night. She had her head in an inclined position and while passing the comb through her hair twisted a vertebrae in her neck out of position.

CAPACITY HOUSE—The Burns' Anniversary Concert was repeated very successfully last night at the Strand Theatre. As expected, the house was packed to the doors and many who came in the anticipation of getting tickets at the last moment were disappointed. The Caledonian Club and all who took part in the entertainment are to be congratulated upon its success, which was due in no small measure to the capable Chairman of the Concert Committee, Mr. James Paton.

SUPREME COURT— In the Supreme Court Thursday the jury returned a verdict for the defendant in the case of Ewen McDougall vs. Gordon MacMillan. Mr. Justice Arsenault was the trial judge. The plaintiff claimed $1,000 damages for injuries received when working for the defendant, a trace breaking during hoisting operations. Gaudet for Plaintiff. MacKinnon, K.C., and MacNeill for Defendant. The case of J. S. Wedlock and D. M. MacDonald of the Springton Lumber Company vs. Bruce Stewart & Co., was continued before Chief Justice Mathieson and a jury yesterday. The plaintiffs are claiming $2,000 for alleged breach of contract. eBntley K.C., for Plaintiff. Gaudet, K.C., for Defendant. After some evidence had been taken the Court adjourned till 11 a.m. on Monday.

MILL RIVER EAST SCHOOL

The semi-annual Examination of Mill River East School was held on the evening of Dec. 22. The school was beautifully decorated with Christmas decorations. Nearly all the ratepayers of the district were present and also a number of visitors from the neighbouring districts. One of the trustees Mr. John J. Rooney, presided as chairman, while the teacher Miss Mae E. Horne was ably assisted in taking the many branches by Miss Agatha O'Brien of Bloomfield corner school and Miss Chester Hodgson of Hills River School. The promptness and correctness of the answers showed the people he good work which had already been accomplished. A short programme followed and then the distribution of prizes and candy. The following were the pupils who won prizes— Grade VII. Miss Jennie Hardy, Grade VI. Miss Edith Gard, Grade IV. Mr. Vernon McAusland, Grade III. Mr. James Rooney, Grade II. Miss Mary Rooney. Prize for attendance awarded to Miss Gard. Prizes for Deportment awarded to Mr. Sutherland Bell, Miss Jennie Hardy and Miss Mary Rooney.

The teacher was the recipient of many useful presents. After many complimentary rmarks by both trustees and ratepayers a vote of thanks was rendered to the teacher.

The Examination was brought to a close by the singing of the National Anthem, and all returned to their homes greatly pleased.

NEW BOOTS, all shapes, all sizes regular values up to $10.00, now $5.95. Alley & Co. Ltd.

INTERESTING NEWS for young men. This week we have on sale $2.00 pairs of fashionable boots. Regular values up to $10.00. Now $5.95 at Alley & Co. Ltd.

PRESBYTERIAN CHURCH.—On Sabbath 29th inst., the Rev. George Cameron will preach as follows: Bonshaw, 11 a. m. Hampton, 3 p. m., Tryon, 7 p. m.

ICE RACES TODAY. — The postponed ice races will be held by the Charlottetown Driving Club this afternoon, starting at 2 o'clock sharp. The race course will be between Hillsboro Bridge and the Railway dock.

PERSONALS

Mrs. Cecil Scott, Clyde River, returned home after visiting in the city.

Mr. James Pendergast of Kensington was a visitor to the city yesterday.

Mrs. Bruce Rodd, Mrs. Ben. Ward and Mr. Davis Ward, Kingston, have returned home after visiting in New Glasgow.

Mr. William Kerr has severed his connection with the Egg and Poultry Co-operative Association his resignation as Secretary having been accepted at a meeting of the Directors yesterday. He will remain, however, with the Canada Farm Products Limited, which has closed its retail store but will continue to conduct a wholesale and export business.

BIRTHS

ROACH— In this City Jan. 25, 1922 to Mr. and Mrs. James Roach a son.

HUGHES— In this city, on Dec. 31st, 1921, to Mr. and Mrs. John H. Hughes, a daughter.

DEATHS

McKINNON—At Indian River on December 21st, Mrs. Mary MacKinnon aged 83 years, R.I.P.

KELLY.— In the P. E. Island Hospital at 7.30 p. m., last night, Patrick Kelly city, age 68. Funeral notice later.

MURPHY—In this city, Saturday, Jan. 28th, 1922. Samuel Murphy aged 29. R. I. P. Funeral notice late.

SAY DEFECTIVE TEETH OFTEN CAUSE CANCER

MONTREAL, Jan. 26— At the afternoon session today of the dentists' association cancer was one of the subjects discussed, and Dr. A. T. Bazin, of McGill University, pointed out that while very little is known of cancer, the practical point for the student of dentistry was that sharp edges of teeth, roots that caused irritation to the tongue or cheek, rough overhanging fillings, dentures, crowns or bridges that cause irritation all seem to produce a tendency towards the development of cancer.

MUNICH, Jan. 27—"I refuse to marry this couple because the would-be bride cannot cook nor keep house," declared Register Rimmerle, of Neu Ulm, Bavaria, when a man and a woman appeared at his office and had been questioned.

INSANE FRENCH SOLDIERS MAY GO TO GRAVE UNKNOWN

PARIS, Jan. 27—Among the most pathetic sequels of the war is the condition of six French prisoners who were returned to France from Germany after the armistice and who are still unidentified. They are insane and were found wandering between the lines. The Germans did not identify them, but kept them in a hospital until after the armistice was signed, when they sent them home. The men never recovered their reason however, and all exforts to identify them have failed, although the Ministry of Pensions has done everything possible in this connection.

The next step will be to publish their photographs in every newspaper in France an dto have their pictures shown in every cinema theatre in this country. Even this, however, is considered doubtful of results, as it is quite possible they are foreigners who volunteered to fight for France. Therefore they most probably will remain "unknown soldiers" until death releases them.

George Meldord's Great Production

"THE SHEIK"

Next Week's Special Film Attraction at The Prince Edward

What promises to prove one of the reigning sensations of the current screen season, "The Sheik" a remarkable Paramount picture, will be shown at the Prince Edward Wednesday and Thursday, February 1st and 2nd. The photoplay is a picturization of E. M. Hull's novel of the Sahara desert which is now numbered as one of the best sellers in the literary market.

The High Spots in this wonderful picture "The Sheik" are colorful desert scenes with wild riding and exciting action. Fino love theme and characters that are intensely real and convincing. The festival, like an Arabian Night's Scene in the Casion at Biskra-Monte Carlo of the Algerian Sahara. The savage sand storm in the desert, the assault on the stronghold of the desert bandit by the tribal clans of Sheik Ahmed Ben Hassan and the sensational rescue of the English girl.

Don't miss this picture. It is one of the big sensations of the year.

TO THE POULTRYMAN:

A Weekly Letter Containing Practical Pointers in the Management and Care of Standard Bred Poultry, Taken From the Daily Log Book of Sunny Crest Poultry Farm, Bear River, P. E. I. by the Manager.

When I started these articles eight weeks ago it was my intention to show the reader just which was the most profitable breed of fowl and to write them as applying to a flock of some size such as the farm flock which is kept for the production of market eggs. Of course the small back yard flock which are only kept as a means of supplying the table with fresh eggs and an occasional roaster are not a commercial enterprise and there are several things which must be taken into consideration before you decide that the most profitable hen is also the best hen for you, whether it be for the eggs for the table or as a business.

If it were keeping a few hens for the above purpose I think without doubt that I would pick one of the American class because I would only keep about as many as the scraps from the house would feed. Ordinarily they would give me all the eggs I wanted and I could eat both the surplus cockerels and the old ladies when they had finished their egg contract. But on the other hand I feel quite sure that I would be ahead of the game if instead of this I kept about half as many more of the egg type, they would thrive on the same amount of scrap from the house and the extra eggs which they laid would far more than buy fowls for my table. Still it is a certain advantage to be able to run out to the henhouse and get the bird at a moments notice or when company unexpectedly drop in on you— therefore let the keeper of the small flock bear these things in mind when he is passing judgment on my summary of values.

It matters not what side of the poultry business you take up or in what branch you intend to specialize, the bird which is the easiest to hatch, cheapest to raise, and which comes to maturity the quickest is the bird which is going to be the most profitable.

This is more especially the case with the flock for the production of eggs than in other cases because the bird which begins to lay in late October and is handled in such a manner that she will not go through a partial molt the same fall but will continue to produce until her pullet year of laying is completed, is far more profitable than the bird that does not get underway until about the first of the year when by the time she is starting to get down to business the price of eggs is already on the decline.

The egg of the Leghorn runs high in fertility and hatchability (they are a true breed and) when you fill your incubator after making a first test you can feel pretty well assured that you will not have to test out thirty to fifty percent of all eggs set, the shell of the egg being white you can make the first test on the fourth day and the clears from the machine are quite alright to be used for culinary purposes, this means no needless waste of eggs.

The chick (from proper breeding stock) is a strong husky fellow and a worker from the minute he dries his birthday suit, puts on the wing and protecting back feathers very quickly and is ready for the colony house and range far sooner than the one slow to feather, sex is distinguishable as early as the second week which allows you to pen off the males and start feeding for the early broiler trade, giving the remaining pullets more room as they grow and not necessitating the dividing of the flock and the change which is so detrimental to best growth, and development.

The pullets are good workers and foragers, not in the least hurry to hunt shelter at the first signs of rain as is the case with their slower feathering relations, they are fast growers and the percentage of mortality has been proven to be far lower than in the flock of the heavier breeds.

With wholesome food some shade in summer, and good range the Leghorn will mature and come into laying in one hundred and sixty days from time of hatching until the fifteenth of April and by the time the deferring hatching by the time the chicks come they can be allowed out on the ground during the warm part of the day (and the person who has hatched in March and kept cricks on a floor for two to four weeks will understand what a lot this means.)

When moved to winter quarters a house fifty feet long by fifteen feet wide will give plenty of floor space for a laying flock of 250 pullets and this whole number can be successfully run in one large flock, requiring less equipment and a smaller outlay for labour will permit the pullets being used as breeders when they are nine to ten months old with as good results as hens and you can use stock for three years as breeders.

You can feed a Leghorn for her two years as a layr for about $3.50 to $4.00 and good stock properly handled will produce ten per cent more eggs then any other breed kept under the same conditions.

Summarised briefly the Leghorns qualifications are as follows, hatchable eggs, livable chicks, economical to raise and quick to mature, early returns on investment, high production on small consumption, smallest possible outlay in housing and equipment and last but not least, ninety five percent of the successful her two years as a layer for about

Next week we will try a like summary of the heavier breed. Following my short article on the judicious use of litter which appeared in last weeks article I would like to say a few words on another phase of the business which seems to be directly connected with it and which appears to be giving some of our breeders quite a lot of trouble at present time.

We have investigated several cases of non productive flocks in the last two weeks and in practically every case the cause has been apparent at a glance, namely wrong method of feeding an over abundance of a badly balanced ration.

I stated before that the use of litter would be a great help in preventing fowls from becoming overfat but litter will be of no avail if the ration is fed in over sufficient quantities and contains only fat forming elements.

It is quite possible to feed a ration that will keep a hen fat and in good health but on which she will never produce a single normal egg for the simple reason that she is receiving only one part of the material out of which the egg is made and if this happens to be the fatty part, she will simply put it on her body in layers of fat, while if you give her the other part out of which she makes the white of the egg together with sufficient lime to make the shell she will be enabled to finish and turn out the product.

In the ordinary grain used in poultry feeds the material out of which the white of the egg is formed are in insufficient quantities and what little are there are needed by the hen for the upkeep of the body and the repair of waste tissue and it is therefore necessary to supply a certain amount of this material in a more concentrated form; this can be done by feeding about ten to twenty percent of the total amount of feed consumed by the hen in the form of ground bone, meat scrap, skim milk or fresh chopped waste meat, this will require modification in the spring and summer when she is able to get a lot of this material in the form of worms and bugs and with good range for a certain time during the spring and early summer this part of the ration can be cut out altogether.

If your hens are sluggish, inactive, tough and baggy behind and not producing it is pretty safe to assume that you are not supplying part of her wants and I would advise you to provide her with some form of animal feed, you will answer to this treatment if the conditions are as above, personally I would rather feed skim milk then any of the expensive commercial preparations which are supposed to test from a forty to sixty percent protein and on most any farm the hen can be allowed to a little of themilk she will make a great deal better use of it then the pigs or calves, why not give her a chance? Mgr.

RED ROSE TEA "is good tea"

27 Years the Same Good Tea—and Always in the Sealed Package

Charlottetown Bankers Lost To Summerside Bankers

Game Was Closely Contested and Marked by Individual Rushes. Score 3—1.

Last evening the special from Summerside arrived in Charlottetown about 6.30. Carrying the Bankers hockey team and about one hundred and fifty of their supporters.

The game got under way at 8.10, Referee Herrell on the job in his usual impartial manner.

The first period though somewhat slow, was featured by some nice individual rushes on the part of players of both sides, and the goal tenders were called upon on several occasions to stop some hot shots, after fifteen minutes of play, Summerside drove home their first count. Charlottetown closely followed and the period ended 1—1.

The second period opened up much faster and the fans were treated to a number of surprises both by the rushes of the forwards and the nice "saves" by the net men. Summerside again making a nice deposit after ten minute's hard playing.

Charlottetown Bankers tried very hard to even matters up, but Summerside's "Goalie" was determined that the cage was closed for the period. Before the period ended Summerside players drew on Harper at sight, but "thre was no response to notices sent" and the period ended 2—1. The Referee was called on to hand out a few penalties in this period, for checking against the boards and tripping.

The third period was a battle from gong to gong, Charlottetown doing their utmost to score, but lack of combination and weak shots lost them many an opportunity to score.

As the play progressed and the boys were warming up to the game they thought it about time to "square off some old accounts" from that were long overdue, but Herrell, would have none of it and the players resumed playing the puck.

The hard grind was beginning to tell on some of the players and they had difficulty in "balancing their ledgers" Perry, of Summerside, at this stage of the game came down the ice with a "note" for Harper, but it was dishonored again for want of more signatures attached to it.

Charlottetown again livened up and kept the play for the next few minutes in Summerside territory but failed to score and a few more end to end rushes took place, Summerside succeeded in making their third and last deposit of the game, a few more rushes and all was over, but it did not take any alding machines to get the total 3—1.

After the match the spectators present, who were fortunate enough to bring skates, enjoyed one hours skating to excellent music by the Band.

The line up was a follows:—

Charlottetown		Summerside
	Goal	
H. Harper		Crockett
	Defense	
E. Craig		Morrison
L. McLellan		Perry
S. Moore		Phillips
	Forwards	
J. S. Cook		R. Phillips
J. McDonald		Lynds
R. McEwell		Noonan
H. Coles		Pidgeon
R. Connolly		Perry

The Pastime members and their friends entertained the players and visitors to an enjoyable dance and luncheon in their hall.

TO MAKE RATS ILLEGAL

HAMILTON, ONT. Jan. 25— The local Board of Health will recommend to the provincial legislation which will make it a breach of the Public Health Act for anyone to maintain rats or vermin in premises.

Sanitary Inspector W. T. Thornley informed the board that the rat menace in Hamilton was becoming serious, yet, owing to the lack of any civic ordinance, nothing further could be done than to appeal to owners of rat-infested premises to take voluntary action toward abatin gthe nuisance.

Thackeray's Birthplace.

(Manchester Guardian.)

Calcutta gave England one of her greatest novelists, for William Makepeace Thackeray was born there on July 18, 1811. The novelist's father was an Indian civil servant; as also had been his grandfather, and his mother was the daughter of yet another servant of the old John Jompany. The city of Calcutta has not forgotten her famous son, and to celebrate his centenary ten years ago a memorial with an inscription from "Henry Esmond" was unveiled in the Church of St. John, where he was baptized.

Soviet Withdraws Offer to Mortgage Industrial Future

LONDON, Jan. 26— Along with other grandiose schemes that have been proposed of late for the reconstruction of Russia, but which have "gone to pot," is that of Hugo Stinnes, in which he attempts to interest English capital during the last visit here. Economic ties undoubtedly are being formed between Germany and Russia, but according to information in London, which has come to your correspondent, Herr Stinnes' dream of reconstructed and revitalized Russian trade has not been fulfilled.

Although the German industrialists, it is understood, still think there is some chance of putting the project through in the event of English or American financial support, the terms sught ore such as to discourage capitol because they present only gambling elements and not safe security. When Stinnes was in London he said he had assurances from the Soviet authorities that they were willing to turn over the industrial and agricultural departments of the country to foreign capital.

Since Stinnes accepted such an offer as a working basis there has been a change in the Soviet mind as not infrequently has been the case before and the insistence of the Soviet now is said to be that it cannot mortgage its industrial future for the sake of immediate development of its agricultural resources. In fact all officers for foreign development are said to have been withdrawn b ythe Soviet except in those industrial lines which it cannot undertake itself few in number and in its place Moscow once more seeks to aid agricultural rehabilitation our long time credits with no security except a Soviet promise to pay.

It is believed the English financiers, who regarded the Stinnes programme previously as partially feasible will not show the slightest interest under the altered circumstances.

LONDON, Ont., Jan. 25— In refusing to attend a meeting called to consider the question of affiliation with the International Brotherhood of Railway Employees, members of the Canadian organization have precipitated a showdown. They declare emphatically that they will no longer send their money across the line, but will endeavor to support and build up a Canadian organization.

LOST

Epidemic of Influenza in Europe

The most Illustrious Personage of the World has just succumbed to its dreadful attacks.

This dreadful epidemic is now reported in New York, where it is making daily progress, with the same fatal results as in 1918.

Municipal, provincial and federal Health authorities advise to use the utmost care so as to prevent the eventual infection of our country. Be extremely careful.

There is only one remedy and that is

Dr. J. O. LAMBERT'S SYRUP

which was recommended by medical authorities and rendered unequalled service during the appalling epidemic of 1918.

A strong dose morning and evening will prevent such attacks. Do not delay, get a bottle immediately.

Let every one in the Home use it daily.

Prevention is better and cheaper than cure.

DR. J. O. LAMBERT'S SYRUP

is absolutely pure, and free from any noxious drugs, as well as alcohol. We guarantee it absolutely.

Elderly persons, adults, children and infants will find equal relief by its use.

DR. J. O. LAMBERT'S SYRUP is for sale everywhere and possesses

The largest Sale without exception of all advertised products for relief of Colds, Coughs, Bronchitis, Croup and all Chest ailments.

DR. J. O. LAMBERT, LIMITED. 396 St. Antoine St., Montreal.
