Everyone who wants to have a good holiday from city and country should write now and make their arrangements to attend this year's Exhibition and horse races. The Island is prosperous and everything points to a greater prosperity later this fall with abundant crops and excellent prices so make up your mind to have a jolly good time at Charlottetown Sept. 21st to 24th.

**Football Season**

Now that the Football season is at hand would it not be a good idea to get a little organization work in and get a line up of players for each section of the City League Football.

Last year was the first time that a City League Football series was played in the city, it proved very successful, in fact more successful than was hoped for at the beginning.

In former years it seemed impossible to get sufficient men to make up the one team last year three teams were picked but of the City and the Prince of Wales College material which turned out a good brand of ball, in fact the best in the city for some years.

The few fans that were present at the playoff for the City Championship will not soon forget the contest and especially the excitement when it went into overtime play.

What was accomplished last year could be more easily accomplished this season and the City Championship will get a big boost upward this fall.

The only way to bring it back to its former position is for the practice and then for the fans of the grand old game to get out and boost along the game, if you are a knocker come out too, possibly your knocks will be heard to good advantage.

However before it gets too late, let us have once again the old familiar sound of "leather meeting and jig skin" and the cry of "tackle 'em low" or better still "we're over 'or a touch down."

How about a meeting soon and get things going.

Made by an Old English Process

FOR centuries in England the pipe has been the most popular smoke, due beyond doubt to the very fine smoking tobacco obtainable there. Now in Canada you can obtain—at a price no more than the ordinary kind—the finest Virginia tobacco, made by an English process, which from the first puff, we believe, will make the pipe your most satisfying, pleasant and enjoyable smoke. Try one package of Mayfield, then you will smoke it always.

**Meighen Makes Hit** In "New Klondike"

What is Tom Meighen's secret? Whatever it is—no surely has the ability to pack a theatre when one of his pictures is announced. And last night, the capacity house which greeted "The New Klondike" at the Strand was no exception to the rule.

But when one thinks it over, Meighen's popularity would seem to be due to his likeable personality. Tom's being "six foot two; eyes of blue," helps of course. And then, let's not forget that he's an actor—a mighty fine one.

Now—glory be to heaven, Tom has a new role worthy of his talents. "The New Klondike" finds him enacting the part of Tom Kelly, a crack pitcher of the New York Baseball Club. Lila Lee plays opposite the star. His supporting cast includes Paul Kelly, Fritz Brunette, Vera Sisson, Charles Winniger, and a host of others.

Ring Lardner wrote the tale as an original story.

Lardner's inimitable baseball characters have come to life in "The New Klondike." We go south with the team to Florida and there—Tom becomes involved in the land boom. He is fired from the squad by a jealous manager; with the result that he soon finds himself making money hand over fist. Of course, his fellow players are envious and ask to be taken in.

Tom agrees and stars buying and selling property on a large scale. They arrange a plot by which Tom is tricked out of all the money he has made. Although terribly discouraged, he determines to stick tight, clear his name, and return their investments to his buddies.

In the end, Tom is successful. He is reinstated on the team, and made manager by the club owner because of having exposed the old coach's treacherous conduct.

The serial "Play Ball" continues to hold the interest of the serial fans. The same program will be repeated today for the last time.

Two Vienna scientists claim to have rediscovered the art of making an elastic glass that can be bent and that will return to its original form without breaking.
