Insidious Eye Strain

We use this adjective ad- versely. Sufferers from Eye-strain may have perfect vision and therefore do not suspect the presence of any eye defect. The motive power of the entire human organism is Nerve Energy.

Normal eyes, it is computed utilize about 20% of this Nerve Energy, but when Eye-strain is present, a much larger proportion is required. Hence defective eyes, through their consumption of an ex- cessive amount of Nerve En- ergy may seriously affect the functioning of other organs of the body and produce ill health.
