

Fashion and Comfort.
 For once fashion and common sense have joined in the cause of comfort in ladies' footwear. The really fashionable shoe is built much like a man's shoe on a womanly scale. This fashion has the advantage of a fine appearance, combined with common-sense comfort, and will therefore be a permanent one. Won the gold medal at Paris Exposition. \$3 and \$4. Sold everywhere. Genuine only when stamped—

CAPITALIZATION.
 The Bonds, as well as the Common Stock, have been issued and paid for; with the money thus obtained, and the proceeds of the Preferred Stock, the cost of organization, construction of the works, and the purchase of mining properties will be entirely defrayed, and about one million dollars remain for working capital.
 The Bond issue, \$8,000,000, is secured by a mortgage to the National Trust Company, Limited, covering all the property of the Company.
 The General Manager, Mr. A. J. Moxham, has written as follows:—
Mr. H. M. WHITNEY,
 President, Dominion Iron & Steel Co., Limited, Montreal, Canada.
 Dear Sir,—I am glad to advise you that No. 1 furnace is in successful operation, and we have been able to measure results by accomplished facts. Whatever doubt may have existed as to the manufacturing possibilities at Sydney are now removed. Speaking in detail:
1st. Iron Ore—The developments at Bell Island, both by the drilling done and by loadings put in, have demonstrated the certainty of the ore quality. The fact that we mined last year only about 120,000 tons, and that we unloaded this by hand instead of by machinery, and that we charged off into this country the expense of a long strike at Bell Island, the cost of the ore delivered at our dock, f.o.b. steamer, was only \$1.25 a ton. Our estimate is based upon the figure of \$1.25. This result shows our estimate to be a safe one. The ore, as anticipated, works kindly in the furnace, and guarantees to us a large profit per furnace.
2nd. Lime Stone—We have two supplies—Georges River and Marble Mountain. We are operating at present with the Georges River stone at a cost of 60 cents a ton, which is within our estimate. The unusual purity of our flux has enabled us to control both the silicon and the sulphur in our pig metal to an unusual degree, and with the use of a minimum amount of flux. We have in our very pure flux an asset of great value.
3rd. Coal—We are operating our bi-product ovens with unwashed coal, nevertheless the coke manufactured is of excellent physical quality. It is capable of hard driving and of maintaining the burden in the blast furnace without trouble. While slightly higher in sulphur—as must be the case with any wash it—our pure flux, as stated, renders this no disadvantage to us. We have demonstrated that the question of washing is not a necessity, but purely an economic question. The coke from washed coal will be fully equal to the celebrated Connellsville standard—the sulphur will be no higher, the ash lower and carbon higher.
4th. Labor—The plant is constructed with every modern labor-saving device, and, after that interval of time necessary to get every new plant well organized in its labor department, our cost sheet will challenge comparison with that of any steel plant elsewhere.
5th. Cost of Production—I am confirmed in my opinion, hitherto expressed, that after crediting the value of the bi-products from the coke ovens, the cost of our pig iron should not exceed \$5.50 per ton after everything has been reduced to steady practice. The quality is all that could be desired.
 In conclusion, we are safe in counting upon a reasonable profit from the start and a handsome increase in the same as the product reaches its maximum.
 Yours, truly,
 A. J. MOXHAM, General Manager, Dominion Iron & Steel Co., Limited.
 (Signed)
