The ice on this route being now safe enough to travel on. At the present time of writing (29th) the ice between Powell and Earncliffe has not been pushed. EVERYONE WILL BE NEEDED TO HELP TORONTO, Jan. 30.—Ontario will need 7,500 farm hands during the coming season in addition to the army

of city men who will spend their vacations on the farm, the University girls and other young women who will help with general farming this year and to the several thousand war veterans who expect to go on the land. How the men will be secured is not known at present, but it is presumed that the men employed in military service overseas will be asked to volunteer for food production work; falling that they may be conscripted. The notion also prevails that factories engaged in the production of articles considered non-essential in war time may be closed in order that the men employed in these factories may be available for work on the land. Some twelve thousand high school boys are counted on, and it is also expected there will be a large increase in the number of city men who will go out to the country and spend their vacations in the harvest fields. One of the most interesting features of the preparations is the announcement that University girls
