## and PRINCE COUNTY CHRONICLE

### The Western Guardian

—This column is reserved for news of local interest but advertising of a new nature may be inserted at a cents a word strictly payable in advance.

—FILMS DEVELOPED promptly Taylor Drug Co., Kensington. L-8-6-1f.

—"BRAYCO" special made-to-order English fox netting, is the best and cheapest netting obtainable today. All sizes in stock at Bracco's. L-8523-8-6-21.

—DANCE, CARD PARTY Parish House, Kensington, August 9th. Sale of Ice Cream. Wellington Vagabond Orchestra in attendance. L-8889-8-6-21.

—VISITING IN HALIFAX—Rev. J. B. Wilson, pastor of the Summerside Baptist Church, is spending his vacation in Halifax and Truro. S.

—THE ENGLISH pound sterling is nearly \$5.00 in Canadian money which means higher prices for fox pelts and higher cost for fox netting. Order "Brayco" English netting now at Bracco's. L-8523-8-6-21.

### WEDDING OF INTEREST AT SUMMERSIDE

**Mary Ellen White Becomes the Bride of Mr. William Edward May.**

At St. Mary's Church, Summerside, Prince Edward Island on Tuesday morning, August sixth at nine o'clock, a very pretty wedding was solemnized in the presence of immediate relatives and friends when Miss Mary Ellen, daughter of the Rev. Mr. W. C. De W. White, D.D., and Mrs. De W. White, became the wife of Mr. William Edward May, son of Mr. and Mrs. Oliver W. May of Auburn, Mass. The chancel was tastefully decorated with sweetpeas, flax and ferns. The ceremony was performed by the bride's father, the choir assisting with the music. The simple but impressive service opened with the choir singing that beautiful hymn, "Glory to Thee who safe has kept."

The bride who was given away by her brother, Mr. Thomas White, was dressed in white muslin de sole and carried a bouquet of pink and white sweet peas. She was attended by her youngest sister, Miss Betty who was very sweet in pink and white.

The groom was attended by Mr. Marj H. White of New Ross, the brother of the bride. Following the ceremony the wedding breakfast was served at the rectory to the immediate relatives.

The day had a special significance as it was the 39th anniversary of the wedding of the bride's parents and congratulations were in order to Ven. C. De W. White D.D., and Mrs. White as well as to the newly married couple.

After a brief honeymoon, Mr. and Mrs. May will reside in Auburn, Mass.—S.

### Greatest Fair In History August 19 to 23

The publicity program in connection with the big Provincial Exhibition is now in full swing. Daily by radio and newspaper you will be made acquainted with what this management have to offer this season. Without question it will be the greatest exhibition in exhibition history. For months the management have been making preparations and have now a complete program one that will cater to everyone from the smallest tot to the oldest inhabitant. The Exhibition proper will be the largest in history, in prizes and in accommodation for entries of any for many years.

The race program will consist of either three or four events daily, bringing together the fastest horses in the Maritimes. The exhibition proper will be the largest in history, in prizes and in accommodation for entries of any for many years.

The race program will consist of either three or four events daily, bringing together the fastest horses in the Maritimes. The exhibition proper will be the largest in history, in prizes and in accommodation for entries of any for many years.

### Boat Idea Is 25 Years Old

**"Hydrafoil"**

BADDECK, N. S., Aug. 6.—If the "Hydrafoil" boat Bob and Ed Evans of Detroit hope to put in the next Harnsworth race is built on the design worked out by Dr. Alexander Graham Bell and "Casey" Baldwin the idea is 25 years old.

After helping to give the British Empire its first airplane flight, Bell and Baldwin, experimenting on Cape Breton's Bras d'Or Lakes, decided to apply the idea of the airplane to water craft.

They evolved what they called the "hydrodrome", using an air screw propeller and an ordinary motorboat hull from the bottom of which stuck out "aerofolios"—the marine equivalent of the airplane's wings.

As the boat's speed increased the foils cut through the water and lifted the boat up until at top speed she was clear and there was nothing touching the water but the lower tips of the foils.

More than 13 years ago the old HDZ, one of the early models, hit 72 knots on the lakes, and Baldwin, now a member of Nova Scotia's Legislature, sees 125 knots an hour in sight.

But he has bigger plans than speedboat races for the hydrodrome, believing the idea behind it could be developed into one of the most potent weapons in naval warfare of the future. What he has in mind is a swift little craft, darting smoothly over the sea at more than 100 knots an hour, guided by an invisible hand toward a far-off enemy ship into whose side she will fling a ton or more of death-dealing explosive.

Both the British and United States navies have approved the hydrodrome for its projected purpose, and when "Casey" is not yachting or helping to make laws he is developing the brain-child born soon after he made the world's first public flight more than 27 years ago.

### Normandie Has 12 Year Old Stowaway

(By Guardian's Special Wire)

LE HAVRE, Aug. 6.—Officers of the France's record-breaking liner Normandie are proud of her Atlantic blue ribbon but they were not so proud today of their newly-acquired distinction of having carried the youngest girl stowaway in maritime annals, twelve-year old Joan Daley of New York.

As the Normandie steamed out of New York last Wednesday, Joan stepped up to the bridge deck and announced herself a stowaway. Officers were stunned.

But matters were simplified by receipt of a wireless from Joan's frantic mother. Money for her passage was sent by her family.

The child explained she went aboard to visit the Normandie in New York and could not bear to leave the ship. Her brother was with her but he refused to share the adventure.

"He didn't have the nerve," Joan commented.

### Joining up Highways To Cross Canada

WINNIPEG, Aug. 6.—Formal opening on Dominion Day—July 1—of 452 miles of gravelled road between Winnipeg and the twin cities of Port Arthur and Port William at the head of the Great Lakes marked a long step forward for the Trans-Canada Highway, long a vision of the future for Canadian motorists and now rapidly approaching completion.

Motorists now actually may cross the Dominion without dipping south into the United States, by using car ferries for 125 miles east of Fort William and by bridging a short gap in the Rocky Mountains through transporting their cars on freight trains. Within a few months roads will be constructed over these gaps. Curiously the depression actually expedited the Trans-Canada project, because to provide employment the Dominion and provincial governments co-operated to build through the thinly settled areas of the Great Lakes and the mountainous stretches of British Columbia.

The Trans-Canada Highway when finished will be about 4,200 miles long and between its terminals at Halifax and Vancouver will link eight provinces, with the ninth, the province of Prince Edward Island, joined by a government ferry service. It will offer motorists an opportunity of diversified scenery difficult to match anywhere.

### Britain Reduces Import Duties On Iron, Steel

(A. P. by Guardian's Special Wire)

LONDON, Aug. 6.—As a sequel to a new five-year agreement between the British steel industry and a continental steel cartel, the British treasury today announced a reduction of import duties on iron and steel to 20 per cent ad valorem.

These duties will be effective for five months. The agreement, which is expected to have wide influence as a model for similar action for other industries, notably cotton, becomes operative Aug. 8.

Under its terms imports of steel from the continental cartel operating in France, Germany, Belgium, Luxembourg and Poland are restricted to \$70,000 tons the first year and \$25,000 tons annually for the next four years in a considerable gain for Britain in view of the fact that 912,000 tons were imported from cartel countries last year.

A British committee pointed out that under commercial treaties reduced rates on duty extend to similar products imported from countries not parties to the agreement.

Canada has taken a prominent part in the World Poultry Congress which is held every three years. Next year, 1936, the congress will meet in Berlin, Germany.

Canada has taken a prominent part in the World Poultry Congress which is held every three years. Next year, 1936, the congress will meet in Berlin, Germany.

### TO COMMENCE WORK ON HIGH SCHOOL SOON

The Summerside School Board met last night in regular session, Dr. E. T. Tanton presiding. The Board received the report of the Insurance Committee, which was to the effect that the insurance companies would undertake to rebuild the High School. The Board has decided to abide by this decision and is expected that the work of rebuilding will go forward in a few days.

Dr. Morton's resignation was accepted and applications for his successor received. The remainder of the evening was taken up with routine matters. A committee was appointed to arrange for the accommodation of the pupils in the various halls until such time as the school will be completed.

### Validity of Montreal's Tax By-Law Attacked

MONTREAL, Aug. 5.—Validity of Montreal's two per cent sales tax by-law was defended in Superior Court today by the joint forces of the Quebec Attorney-General's Department and the City Legal Bureau when Mayor Herve Perland of Verdun sought a writ of prohibition. Mayor Perland's writ attacked legality of the by-law and asked a Superior Court order to prevent the Recorder's Court trying charges of failure to collect the tax laid against Mayor Perland.

Mr. Justice A. Trehan took the matter under advisement after Aime Geoffroy, K.C., acting for the Attorney-General, delved into the British North America Act to indicate the division of taxing powers as between the Dominion and Provincial Governments. Provinces were permitted to enact legislation for direct taxation, he said. He defined direct tax as being the desire of the Legislature that it be paid by the consumer. Under this heading, the city's sales tax is a direct levy, Mr. Geoffroy held.

Should the court decide the by-law was unconstitutional, he declared, the whole machinery of tax collection in Montreal would be threatened with the city's treasury being seriously harmed.

Counsel for Mayor Perland also dug into the British North America Act to support his argument and mentioned decisions by the Privy Council to help his claim that the sales tax is an indirect levy and ultra vires of the Provincial Legislature and the city's by-laws.

### Grand River Again Leads MacLean League

Grand River snapped a three-game losing streak over the weekend, defeating Miscouche 19-11 on the latter's home grounds.

The game was as usual a free-hitting exhibition with Grand River getting the majority of hits.

Father "Bob" MacDonald, Grand River hurler, knocked his second home run in two games with two mates aboard to drive in three runs in the third. This followed by a six run spurt in the 7th put the game on ice.

Next week's game will be between Miscouche and Richmond at Richmond.

Miscouche: B. Williams, catcher; J. Gaudet, pitcher; C. Gaudet, 1st base; L. Gaudet, 2nd base; C. MacKinnon, 3rd base; W. Gillis, 3rd base; B. Gillis, short stop; A. MacKinnon, centre field; Praught, right field; Gillis, left field.

Umpire: MacDonald, Grand River. D.

### Case Against Stock Brokers Adjudged

(C.P. By Guardian's Special Wire)

CAMPBELLTON, N. B., Aug. 6.—Further adjournments were made today in the cases of Ernest A. Willis and Edward A. Malone, stock brokers charged with keeping a common gaming house by illegal dealing in shares.

Willis was remanded until Aug. 12 on application of his counsel Leonard C. Jones, Moncton, and Malone was released on \$20,000 bail until Aug. 13. H. F. G. Bridges appeared for Malone and E. B. McLatchy represented the attorney-general.

The two accused were arrested following investigation by the New Brunswick Public Utilities Board into the operations of the brokerage firm headed by Willis. The company's offices in New Brunswick were closed. Malone was manager of the Campbellton branch.

### WELL DRILLING

Our new cable drill has arrived, our men are here and we need work. It takes a lot of wells to keep this outfit busy sinking them. If you need a new well or wish to ream out and recase an old one. Give us a call.

All work guaranteed to stand the test of time.

### Whose Word Will You Take?

For TIRE MILEAGE?

"I've Proved Firestone Safe at Any Speed" says Kelly Petillo

That's the statement of this year's winner of the Indianapolis Speed Contest. Into this 500-mile endurance race are packed all the stress and strain of 40,000 miles of ordinary driving.

In every community are records of individual sets of tires, but Firestone have been proved in the world's most grueling test—the Indianapolis Race—500 hot miles at top speed—which equals 40,000 miles of ordinary driving.

In this terrific race tires become the vital factor. They must be perfect—they must be super-safe. For sixteen consecutive years the winning cars have been Firestone-equipped.

Fearless drivers who stake life and victory on tires choose Firestone. Accept with confidence the recommendations of these men. Firestone are safe for them and safe for you.

Only Firestone offers Gum-Dipped protection. For extra thousands of trouble-free miles equip your car with New Firestone Tires. See Your Dealer TODAY.

\* Compared with any previous type of Firestone tire
