

# Bigger Crops

## More profit from POTATOES, better LAWNS, FLOWERS and VEGETABLES.

No matter where you use Soilgro—on your potatoes, corn, grain—on your lawn, flowers or in your garden, you'll be amazed at the growth it promotes. Soilgro feeds any plant that has roots. It is the new scientific method of hastening and increasing growth. It is cheap — for six dollars you get a package that will do for a good sized lawn and garden, or an acre and a half of roots or grain — for all summer. It is easy to apply and eliminates for the man in town, the difficulty of procuring and the objection to applying barnyard manure or other fertilizer. On farms it can be used with manure with splendid results.

**Here's what one man says about Soilgro**  
Temiskaming, Que., Sept. 4, 1924.  
"I take much pleasure in saying that I got very good results from Soilgro as we had a very bad summer for flowers. I am pleased to say that my flower garden took first prize at the Exhibition and as there is but one other here that has used Soilgro we both had the best gardens."

To make two blades grow where only one grew before is the work of Soilgro

There was a large attendance of fans at the game which was very exciting from start to finish. The Kill Kare Club went over to Moncton Wednesday morning and returned last night. During their stay in Moncton they were given a splendid time by the Colleens and after the game Wednesday night they were royally entertained. Miss Edna McElmou gave a dance for the Club which was attended by the Colleens and a large number of "sheiks." Thursday night the girls attended the Firemen's Dance and
