

Members of the only company of its kind now in America

nt year by means of a postcard, somade and learn for himself, at first  
 ti-that every grower who makes ap-hand, the exact conditions prevail-  
 m-lication will know that the inspec-ling. Then if the grower is not in  
 ce-tion for which he asks will be car-agreement with the inspector's  
 ried out, and he will not be left findings, he is in a position to say  
 to wondering whether his applica-tion so at once, and he can also appeal  
 ht has been received or not. The omi-to the supervisor of the work for a  
 n-ion of such an acknowledgment decision before it is too late in the  
 e-in previous years has been found season. We do not claim infallib-  
 e-to be a weak spot in the inspection-ity of the inspectors, and in the  
 id service, but the remedy is being case of dissatisfaction it is always  
 applied this year. But we must in- best to secure an additional opin-  
 sist that all applications be receiv-ion. The same applies to any dis-  
 ed at Ottawa not later than July satisfaction that may arise in con-  
 at list, in order that we may have nection with the tuber inspection  
 r to look them over, copy the parti- and grading. It is realized, of  
 c-ulars, and then forward them to course, that, as the grower does  
 e the supervisors in charge of each not know the exact date of the in-  
 e province, for the arrangement of in-spector's visit in advance, it may  
 e-pection routes. You will realize sometimes occur that he is away  
 y that this requires a considerable from home at the time, but gener-  
 y-amount of time, and unless all the ally speaking he is at home and he  
 l-applications are received by the should allow nothing to prevent  
 e date given, it is impossible to lay him accompanying the inspector to  
 out the work—which must of nec- the field or to the bin or ware-  
 e-ssity be performed with the great- house. So in case there may have  
 e, est possible despatch—to the best been any growers in the past who  
 s advantage. So we should be glad have not been entirely satisfied,  
 e if you would advise all your grow- or who have been inclined to differ  
 e-ers that, in order to be sure that in opinion from the inspectors, we  
 e- their applications will be dealt with would request them in future to  
 e, they should forward them so that say so at once and request the sup-  
 e, as much before that date as pos-ervisor to check the inspector's  
 sible. The addressed envelope work. To "carry a chip on the  
 at which is forwarded to the grower-shoulder" and refrain from getting  
 with the application form in order rid of it in the proper direction be-  
 e that it may be more conveniently fore it is too late, is not pleasant,  
 e-returned, need not be stamped; in and should be avoided. I have on  
 e fact, any communication addressed several occasions seen a very good  
 e to the Dominion Botanist, Central expression of the point, in hotels  
 e Experimental Farm, Ottawa, is car- and stores, in the form of a legend  
 ried postage free. which reads, "If you are satisfied  
 e Now it is possible—although we tell others; if not, tell us."  
 e-ve had very few complaints in Now Mr. President, I am begin-  
 e-past—that some of your grow-ning to feel that you have perhaps  
 e-ers may have at times been dissat- heard enough from me for this  
 e-iefed with the results of the in- time; I, however, wish to repeat  
 e-pection of their fields, particularly that I have appreciated the oppor-  
 e-when they have found ineligible tunity of addressing you today, and  
 e-certification. We therefore desire I trust that our future relations in  
 e-to emphasize the importance of connection with potato inspection  
 e-very grower making it a rule to and certification will be just as  
 e-accompany the inspector to his cordial and effective as they have  
 e-fields when the inspection is being been in the past. I beg to thank  
 e- you all for the attentive hearing you  
 e- have given me and to say that I  
 e- hope continued and uninterrupted  
 e- success will attend the activities of  
 e- the Prince Edward Island Potato  
 e- Growers' Association.

# NFLD. PREMIER IN HALIFAX

## Sir Richard A. Squires Gives Out a Lengthy Statement.

(Canadian Press)

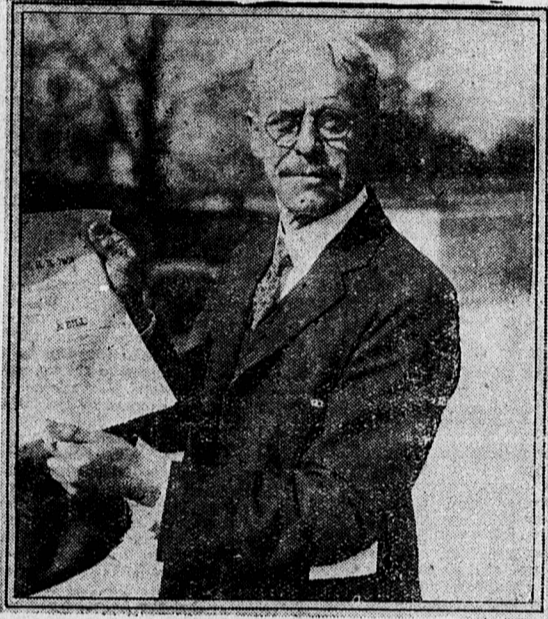

HALIFAX, N. S., April 3.—Sir Richard A. Squires, former Premier of Newfoundland arrived in Halifax this morning en route to Toronto. He told the Canadian press that he proposed returning to Newfoundland a week before the opening of the Legislature, scheduled for April 22nd.

Regarding the findings of the Commission, Sir Richard Squires gave out the following statement:

"The T. Hollis Walker Commission was acting under the Newfoundland Local Enquiries Act, and the findings of the Commissioner, under that paragraph dealing with the Liquor Control Department, in so far as I am affected, were, in my judgment, absolutely contrary to the weight of evidence, and I propose an early opportunity of demonstrating that fact by other process. Unfortunately, the Newfoundland Local Enquiries Act, is defective in that it does not provide for a judicial review of the evidence of finding. I have been advised by my legal counsel that as an enquiry held under this Act is not a judicial proceeding, and that consequently the report is not a judicial decision or judgment under Newfoundland law, the legal result is that a writ of certiorari does not lie to enable a revision by the Supreme Court. In respect to paragraph two of the commission, with reference to contributions made by the Dominion Iron and Steel Company it was the time that the company, during my absence from Newfoundland, in the summer of 1920, assisted the finances of the St. John's Daily Star, which paper had been the political organ of my party, but not a cent of that assistance was used personally, either by myself or any member of my party. With respect to paragraphs three and four and five, concerning the departments of Agriculture and Mines, Public Works and Poor Relief, it was shown that in conjunction with Dr. Alex Campbell, Minister of Agriculture and Mines, W. B. Jennings, Minister of Public Works, and the late R. H. Dwyer, Commissioner of Public Charities, had expended the sum of \$6,000,000 over a period of years in general public works and relief operations, and that as a result of the most exhaustive investigation by accountants, not a single dollar of graft has accrued directly or indirectly to myself or any of the officials named. The reports that Dr. Campbell has misappropriated public funds to his own purposes is entirely untrue, on the contrary he gave the use of his private motor car and other property and expended substantial monies of his own for public purposes. All of which might justly have been charged to Public accounts."

Marie Guy, one of the beautiful and famous Guy sisters, has been creating a sensation in Paris with a silk wig. The new headwear is generally of white, but brilliantly colored ones are frequently seen

BONUS MEASURE PASSES LOWER HOUSE  
Rep. R. R. Green of Iowa is holding the bonus bill, which has passed in the House of Representatives by a vote of 355 to 54. This measure calls chiefly for paid up 20-year endowment insurance policies for all those who served in the military and naval forces during the period of war. It seems a certainty that Pres. Coolidge will veto the measure and in such case, Congress is likely to pass the measure over the veto.

### Difficulties

It is always said to me. So long as you have a difficult business before you, you will never feel satisfied. Therefore you must set about to finish it off; and when you have finished it, then great pleasure is felt.

SO SIMPLE  
Teacher—"what supports the sun in the sky?"  
Bright Boy—"Its beams, of course."

ADVERTISING CANADA IN TRAFALGAR SQUARE  
A big exhibition motor car is touring Britain in an effort to attract British emigrants to this country. The picture shows it at the foot of Nelson's monument in Trafalgar Square. The sides of the car open and the exhibits are electrically lighted. A motion picture screen and camera are also part of the exhibit.

Workmen are busy putting the finishing touches on the Canadian Pavillon at the British Empire Exhibition. This large moose head will adorn one of the walls

### PROBLEM OF BRIQUETTING?

The original one, at a cost of a few thousand dollars, and it is in this plant that thirty tons of coal are now being produced daily at a total cost which is less than the cost of buying alone in the bigger plant. The new type of plant is economical in construction, can be operated with unskilled labor, and produces a number of valuable by-products. The new process promises to make the coal industry in Saskatchewan and Alberta a profitable year-round business and to convert the enormous coal fields of the prairie province into sources of enormous wealth. The picture shows a part of the plant at Bienfait.
