

The Betts Fur Salon Announces
THE LARGEST AND MOST MODERN
AIR-CONDITIONED, ALL METAL

FUR STORAGE

VAULT ON THE ISLAND!

This great new all metal, air-conditioned vault is now ready and waiting to store your coat and 500 others. 3000 cubic feet of cold storage space, where fresh pure air is constantly circulating.

BUT THAT'S ONLY PART OF THE BETTS TRIPLE PROTECTION . . .

FIRST—You get complete destruction of all moth life in the Betts Kil-More gas chamber.

SECOND—Absolutely SAFE storage in the largest and MOST MODERN cold storage vault on the Island.

THIRD—FREE Insurance for one full year (365 days) covered by an individual Policy which protects your coat wherever it may be, against FIRE, THEFT or ACCIDENT of any kind.

IN ADDITION—All furs stored with BETTS are carefully dusted and examined, and you are notified by letter as to their condition. Yet for all this you pay only the regular storage charge which is 2 1/2 PER CENT OF YOUR OWN VALUATION.

Phone 1693—WE CALL AND DELIVER

BULLY FOR BILLY
(By The Canadian Press)
MILDURA, Australia.—To win a \$100 bet, a Mildura man built an art, harnessing it to a bull, Billy, and drove 400 miles to Melbourne in 73 days with his wife and three children. "Billy can take it," he said.

FACTS ABOUT FERTILIZERS

Plant food content alone does not determine the value of a fertilizer. Residual effect, Mechanical condition, and cost must be considered.

LET US ILLUSTRATE—
—by comparing several different ways of compounding a fertilizer with the same amount of plant food as, say a 4-8-10.

A FARM MIXED, Containing—		
400 Lbs. Sulphate of Ammonia @ \$37.00 per ton	\$7.40	
800 Lbs. Superphosphate, 20% @ \$19.50 per ton	\$7.80	
400 Lbs. Muriate of Potash @ \$38.00 per ton	\$7.60	
Labor Mixing — Say	50c	
		—\$23.30

Has relative low cost, RESIDUAL EFFECT VERY STRONGLY ACID. Increased acidity on many soils results in reduced grain or hay crops in following years. COMPARATIVE VALUE POOR.

A FARM MIXED, Containing—		
125 Lbs. Nitrate of Soda (1 unit) @ \$41.00 per ton	\$2.56	
300 Lbs. Sulphate of Ammonia @ \$37.00 per ton	\$5.55	
800 Lbs. Superphosphate, 20% @ \$19.50 per ton	\$7.80	
400 Lbs. Muriate of Potash @ \$38.00 per ton	\$7.60	
Labor Mixing—Say	50c	
		—\$24.01

Slightly more costly, RESIDUAL EFFECT STRONGLY ACID. Results in reduced yields of crops in following years on most soils, COMPARATIVE VALUE BETTER BUT STILL POOR.

A FARM MIXED, Containing—		
375 Lbs. Nitrate of Soda @ \$41.00 per ton	\$7.98	
100 Lbs. Sulphate of Ammonia @ \$37.00 per ton	\$1.85	
800 Lbs. Superphosphate, 20% @ \$19.50 per ton	\$7.80	
400 Lbs. Muriate of Potash @ \$38.00 per ton	\$7.60	
Labor Mixing — Say	50c	
		—\$25.73

Cost much increased, RESIDUAL EFFECT. NEUTRAL, NON ACID FORMING, Result—No injury to plant roots—No reduction in crop yields in following years. Mechanical condition generally poor. Heavy rains may wash Nitrate of Soda below the reach of plant roots, COMPARATIVE VALUE GOOD.

A FACTORY MIXED—		
—2000 lbs. NEUTRALIZED 4-8-10 —		—\$25.20

—Cost reasonable. RESIDUAL EFFECT NON ACID FORMING. Result—No injury to plant roots—No reduction in crop yields of following years—No leaching of Nitrogen below plant root level. BEST VALUE

NEUTRALIZED 4-8-10, or other FACTORY MIXED Manufactured by the THE ISLAND FERTILIZER CO. LTD. will have.

MECHANICAL CONDITION—The BEST, permitting uniform distribution, and

THOROUGH MIXING Resulting in uniform plant growth.

FREE! — MAGNESIUM — FREE!

All our fertilizers that have four or more units of Nitrogen contain about 140 POUNDS (7 units) of MAGNESIUM CARBONATE, the Magnesium content of which nearly equals THREE UNITS OF MAGNESIUM OXIDE.

Magnesium is lacking in many soils. Farmers in New Brunswick and elsewhere frequently demand Magnesium Oxide in their fertilizers, at an additional cost of \$1.00 per unit.

We Supply the Magnesium Carbonate FREE

For BEST VALUE select fertilizers that are ECONOMIC, NON ACID FORMING, and that are not DETRIMENTAL TO PLANT LIFE.

We Supply Them—Let Us Help You

ALL INTERESTED in the National Conservative Party are invited to the Social Evening at the Canadian Legion Rooms on Wednesday evening, April 26th, at 8 p. m. L-590-4-25-31.

HARBOR CLEAR OF ICE—Charlottetown Harbor was clear of ice yesterday although drift ice could be seen in Hillsboro Bay. Ice still remained in the upper reaches of the three rivers flowing into Charlottetown Harbor but was expected to break up shortly. Meanwhile, according to word received here, the C.G.S. Montclair had been ordered to proceed to Georgetown to open the harbor to shipping.

GEESE CONDITION "BELOW PAR"—Canada geese had arrived in the Province this spring in "poorer condition than usual," it was learned last night from a reliable source. Number of the birds was approximately the same as last year, however. Food here was plentiful on the fields and the birds were "pecking up," it was thought. Brant put in an appearance late last week.

AUDITORS STILL AT WORK—Work of the auditors, employed by the City Council to make a complete audit of the City finances and install a modern up to date bookkeeping system was progressing satisfactorily but was not yet complete, it was learned yesterday. Work of the audit itself is said to be about finished but installation of a change in the bookkeeping system was occupying the attention of Auditors Archibald and McNeil. Meanwhile the annual meeting of the City Council had not been held, awaiting the auditors' report. It was expected the annual meeting, and probably the tabling of estimates for the current year at the same session, would be held about the 15th of May. However, it was understood there was no definite decision.

GYRO MEETING—Hope that the Canadian National Hotel system would "reconsider their choice" of a name for the Canadian National Hotel, was expressed by several members of the Charlottetown Gyro Club at their weekly dinner meeting yesterday. The Club meets in the Canadian National Hotel here, which according to an announcement by Joseph Vanvorvick, general manager for hotels would henceforth be called "The Charlottetown." Gyro Club members felt a more appropriate name could be found, especially in view of the forthcoming Royal visit. Speaker last night was Mr. E. P. Foley, M.L.A., Summerside, who described the inaugural passenger flight of the Trans-Canada Airlines. A vote of thanks, moved by Mr. J. J. Conolly and seconded by Mr. D. E. Ester was tendered the speaker. Mr. O. K. Presby was chairman. Mr. Don Lathbone of Charlottetown was a guest of the Club.

Miss Nan Leightizer Wins Distinction

The following news item appears in the last edition of the "Xaverian Weekly", Antigonish, April 15th:

"Clark University Scholarship awarded to St. F.X. Graduate." The distinction of being the first forthcoming Royal visit, given to Clark University has been given to Nan Leightizer, of Charlottetown, P.E.I. At Clark's she plans to do graduate work in Economics.

Miss Leightizer came to St. F.X. in the fall of '36 from Prince of Wales College, Charlottetown as a Junior; she graduated from St. F.X. in 1938 with a Summa Cum Laude Degree in Arts. This year she is working for a B.A. degree with honors (Economics).

While here Nan has shown herself to be a brilliant student, and has participated in many activities. Her service on the Xaverian Staff, attended two Maritime Conferences, and was prominent in debating circles.

Her executive ability was demonstrated by the various positions which she has held, such as: President of the Senior class, President of Debating Society, President of Students' Council, Vice-President of Students' Assembly and Vice-President of Dramatic Society at M.S.B.

Because of her excellent record here and at Prince of Wales, we feel that Nan will be successful in future.

(Miss Leightizer is a daughter of Mr. and Mrs. James Leightizer of Charlottetown.)

Arrange Free Distribution Of Butter

OTTAWA, April 24.—(CP)—Arrangements for the free distribution of butter to persons on relief or dependent on charity are near completion, Agriculture Minister Gardiner told the House of Commons tonight as approval was given to two bills designed to improve the condition of the dairy industry.

The Red Cross, the Minister said has agreed to take charge of the distribution of vouchers to relief and charitable organizations. The vouchers will be good for No. 1 butter and they will be accepted by any merchant dealing in butter. At the end of each month the merchants will present the vouchers to the banks which will pay the market price for the butter and send the vouchers in to the government for final payment.

The purpose of the plan is to increase the consumption of butter and so to reduce the surplus pressing surplus which is depressing prices.

Will Return Envoys To Berlin Today

PARIS, April 24.—(AP)—France prepared to send back her Ambassador to Berlin, Robert Coulongre, after ordering dissolution of propaganda organizations in the Reich zone along the German frontier.

Great Britain returned her envoy to Berlin today. The British Ambassador, Sir Neville Henderson, called home last month in what was regarded as a diplomatic rebuff to Germany for her annexation of Bohemia and Moravia.

Germany in turn called home her ambassador on the 22nd.

Foreign Office sources said Coulongre probably would leave Paris tomorrow.

MR. JOHN MUSTARD

Continuing the debate on April 19, Mr. John Mustard said he regarded Premier Campbell as the leader of the Liberal government "for some time." He hoped that some time we might hear him deliver the Budget speech from Ottawa.

The junior member from Charlottetown, (Mr. Traipor) had been no doubt sincere in his reference to the Premier, but he was not entirely in touch with farming conditions. Admittedly a large part of the depression which exists among the farmers has been due to mismanagement, but that was only part. Our farmers have always labored under adverse circumstances. The balance of the budget, but stagflation and go-nothingness is, not, never has been, and never will be the policy of the Liberal Government," which the Prohibition law, he maintained, has been "vigorously enforced, the illicit traffic of intoxicating liquors has been reduced, the bootlegger and booze agents have been prosecuted without favor or affection; they are now running for shelter and bid fair to soon become as extinct as the auk or the dodo of prehistoric times. The effluents gleams of the Government are now glinting over the horizon."

Mr. Allen referred to the report of the Public Accounts Committee which he is a member. The criticism had been raised that the unpaid bills were not included in this report. Usually, he pointed out, the unpaid bills were included in the 1932 report had been moved by Mr. McIntyre to the effect that it be referred back to the committee to include as liabilities all outstanding bills unpaid at the end of the year, one of which was \$112,000 on Prince of Wales College. The House has divided on the amendment, 6 for, 15 against, and the original report was adopted on a vote of 15 to 8.

In 1936, Mr. Allen conceded, the Public Accounts Committee report showed unpaid bills amounting to \$23,710.48. This was ordinary expenditure, but objection was taken by the Opposition that it did not include as liabilities the amount spent under the Relief Act.

"In the report of the Public Accounts Committee of this year," he said, "we did not include the ordinary unpaid bills, and why? because it was not the custom. But from the Auditor today, he gives me the figures and he vouches for them as being \$25,539.73." The unpaid bills, one casual account, he continued, were \$48,032.63. This amount was not included for the reason the bills were not paid and the settlements had not been made.

"The balance carried over from one year to the other," Mr. Allen maintained, "is generally a constant

CLUB SECRETARY

In the list of officers named in the recently formed Blood Donors' Club at the Charlottetown Hospital the secretary is Mr. Leo Corcoran and not Mr. C. E. Burke as reported.

RETURN FROM SAINT JOHN

Mrs. Edwin MacFarlane, Fernwood, and Mrs. T. G. Ives, Charlottetown returned Saturday night from Saint John, N.S. where they attended an executive meeting of the Baptist Women's Missionary Union of the Maritime Provinces.

PERSONALS

Mr. George MacCormack, Georgetown, was a visitor in the city over the weekend.

The many friends of Mrs. Horace Parker, Georgetown, Royalty, will be glad to learn that she is much improved after having a minor operation in the P. E. Island Hospital.

Local Student Is Graduate At Chicago

CHICAGO, Illinois, Apr. 21, 1939 (Special)—Alan S. Clarkin, 49 Upper Hillsboro Street, Charlottetown, is one of twenty students who were recently graduated from the Refrigeration and Air Conditioning Institute, Chicago, Illinois.

Having completed four weeks of laboratory training in the Institute's laboratories in Chicago, following an eighteen months' extension course, the graduates have been awarded diplomas testifying to their ability in the air conditioning and refrigeration field.

Mr. Clarkin is the son of Mr. and Mrs. P. W. Clarkin, 49 Upper Hillsboro Street, Charlottetown, and is a graduate of both the Queen's School and the Prince of Wales College.

While at the Institute, his work was primarily in the field of service engineering in all phases of heating, ventilating, refrigeration, and air conditioning.

BIRTHS

CARR—At the Prince County Hospital, April 23, 1939, to Mr. and Mrs. Clarence Carr of Lot 16, a son.

HUBLEY—At the Prince County Hospital on April 20, 1939, to Mr. and Mrs. A. H. Hubley of Summerside, a son.

SILLIPHANT—At the Prince County Hospital, April 20, 1939, to Mr. and Mrs. Ralph Silliphant of Summerside, a son.

DEATHS

PHILLIPS—At Tyne Valley, April 23, 1939, Mrs. H. P. Phillips aged 59. Funeral notice later.

IRVING—At Beach Point on April 21, 1939, William D. Irving aged 71 years. Funeral service was held at the home Sunday, 23rd at 2.30 p. m.

Conclusion Of Budget Debate In Legislature

Following is a continuation of the report of the addresses in the Legislature on the Budget debate, April 18.

Mr. E. P. Foley, Summerside, gave an account of the recent Trans-Canada flying trip from Montreal to Vancouver, in which he participated as Prince Edward Island representative. The trip, which inaugurated the commercial passenger service, was a most enjoyable and instructive one, he said.

He extended congratulations to the Premier and ministers of departments on the financial showing. He commended particularly the progress in adult education and the proposal to encourage gardens for fishermen.

Notwithstanding unemployment, Mr. Foley said it was difficult to get men to fill skilled positions. There was evidently a great need for training along this line.

He stressed the necessity of preventing democracy from slipping under dictatorship in a sad plight, teaching their children nothing but pagan ideas.

The Premier, in reply, said that budget balancing, he said, "I wonder if they could have foreseen what this Government has been up against. Although we admit that things are not as good as we would like to see them, yet when better government is given to this Province, it will fill a better position than that it will be administered."

HON. MR. ALLEN

Hon. L. R. Allen, said he considered himself fortunate in having the privilege of listening to the Premier's presentation of the finances. He had, Mr. Allen believed, "displayed a business acumen that is simply marvelous, when the into consideration could many unexpected demands that were made upon the public treasury."

He instanced among other things the fact that the House in Summerside, which was most of a state of total collapse owing to the unpardonable neglect of the late Conservative Government, had been renovated and "practically rebuilt" and was now "from an architectural point of view, a credit to the Government."

So many and numerous were the benefits conferred upon the Province by the present administration that to enumerate them all would be to prolong this session indefinitely. True, there has been a small deficit, "a mere trifle, less than one-third of one per cent per day per capita of our population, scarcely worth mentioning when we consider the many adversities with which the Government has confronted. Possibly we could have sat back, folded our arms, done nothing, neglected the public service, allowed the budget to stagnate, and go-nothingness is, not, never has been, and never will be the policy of the Liberal Government," which the Prohibition law, he maintained, has been "vigorously enforced, the illicit traffic of intoxicating liquors has been reduced, the bootlegger and booze agents have been prosecuted without favor or affection; they are now running for shelter and bid fair to soon become as extinct as the auk or the dodo of prehistoric times. The effluents gleams of the Government are now glinting over the horizon."

Mr. Allen referred to the report of the Public Accounts Committee which he is a member. The criticism had been raised that the unpaid bills were not included in this report. Usually, he pointed out, the unpaid bills were included in the 1932 report had been moved by Mr. McIntyre to the effect that it be referred back to the committee to include as liabilities all outstanding bills unpaid at the end of the year, one of which was \$112,000 on Prince of Wales College. The House has divided on the amendment, 6 for, 15 against, and the original report was adopted on a vote of 15 to 8.

Rotary

Cancer today stands second in death rate, being exceeded only by heart and blood diseases, said Dr. W. J. P. MacMillan, Past Rotary President, in addressing his fellow Rotarians at their luncheon yesterday.

The gloomy thing about the whole situation, he said, is that the rate is going up every year. In Prince Edward Island the death rate from cancer is the fourth highest in Canada, being 1.18 per thousand.

Dr. MacMillan impressively stressed the great need of educating the public regarding this dread disease, pointing out that if taken in time, it can be cured, but if it is left until pain is felt then the case is practically hopeless.

He stated that the Medical Association of this province have been dealing with the problem for many years, and he then told of what is being done in a national way to control the disease.

From the King George V Jubilee Fund approximately \$500,000 was raised, and the trustees of the Fund are headed by the Chief Justice of Canada and include the Prime Minister, the Leader of the Opposition and other prominent public men.

Some one had suggested the formation of an experimental laboratory for scientific research, but this would cost at least two million dollars, and a million a year to function. So the trustees decided to donate the interest on the \$500,000 amounting to \$14,000 a year to Cancer Control Associations.

The arousing of the doctors in Canada to the importance of controlling the disease, dissemination of knowledge among the non-medical population, the investigation of cancer cures, the establishment of pathological laboratories not re-

time it might be an advantage if it doesn't affect the farmers of the Province one iota because the only search laboratories, the appointment of specially trained and competent pathologists, the granting of financial aid to necessitous sufferers are among Canada's requirements so far as dealing with cancer is concerned.

The Doctor, who is President of the Provincial Society for the Control of Cancer, also told of what the Canadian Medical Association has been doing to cope with the situation.

In each standard hospital in this province there is a cancer committee who collaborates and co-operates with the doctors in charge of cancer cases. They also study the family history, and after the patient is operated upon and sent home they follow up his progress.

The speaker also outlined the machinery that is available for the formation of lay associations. There is only one branch on the Island and there is no reason why there should not be more. The Charlottetown branch has 350 members, and the membership of one thousand is the objective.

Of the money raised, 25 cents of every dollar goes to the headquarters for literature, fees, expenses, etc., and the balance remains on the Island to be disposed of as the Association sees fit.

If they desire, they can grant help to necessitous patients, but one of the great objectives will be the education of the public.

The work that has been carried on by the various organizations will be continued in the hope that some time clinical research would stumble on the cause of cancer, and the discoverer of that cause would be the greatest benefactor the world has ever known.

Rotarian Warren Brenton was in the chair, and the guests were Major Craig, Burleigh Taylor, James H. Terry, the new manager of the Imperial Oil Company.

The new President-elect, A. R. Cooper, was chosen as a delegate to the international convention at Cleveland, and an amount of money voted for his expenses.

The musical program included a vocal solo by Miss Pearl Burns, who was encored, with Miss Sue Brenton as accompanist, also piano selections by Miss Brenton.

ANNOUNCEMENT

The Women's National Conservative Association extend a cordial invitation to all Conservatives to attend a social evening at the Canadian Legion Rooms on Wednesday evening, April 26th, at 8 P. M.

NEW FOOD-KEEPING MIRACLE... NOW AT OUR STORE

SAVES FOOD'S VITAL JUICES FROM DRYING OUT!

BOTH 7 DAYS OLD*... but look at the amazing difference in these Baked Beans!

*Reproduced from certified, unretouched photographs of identical food, refrigerated, uncovered, at comparable temperatures.

SEE THIS NEW 939 Frigidaire... World's First "Cold-Wall" Refrigerator!

MADE ONLY BY GENERAL MOTORS
BUILT ON AN ENTIRELY NEW PRINCIPLE

● Come in. See how the new "Cold-Wall" Principle preserves even highly perishable foods days longer than ever before. Prolongs their original freshness—retains rich nutritional values—saves peak flavor. Food is not dried out by moisture-robbing air circulation.

Only Frigidaire gives you this revolutionary advancement. And puts you years ahead in every way... with elegant new modern styling... new MEAT TENDER for fresh meats... new SUPER-MOIST HYDRATORS for freshening vegetables... Genuine QUICKUBE TRAYS for releasing cubes instantly... Yet it costs no more than ordinary "first line" refrigerators! Convince yourself in 5 minutes. Don't buy till you see our Demonstration. Come in today.

SEE A DEMONSTRATION NOW!

ONLY FRIGIDAIRE has the METER-MISER

CUTS CURRENT COST TO THE BONE—for it's the Simplest Refrigerating Mechanism Ever Built... and when parts aren't there, they just can't use current or wear. Uses a trouble-free, completely sealed in a permanent bath of oil. Comes to you with 5-Year Protection Plan backed by General Motors.

CONVENIENT TERMS AS LOW AS 25c A DAY
