CONDENSED MILK MERGER.

TORONTO, May 28—With the incorporation of the Borden Milk Company, Ltd., under a dominion charter, another merger has taken place. It is of the condensed milk business. The Borden interests have merged with the Borden's Condensed Milk Company, Ltd., St. Charles Condensed Milk Company, Ltd., and the Reindeer Condensed Milk Co., Ltd., of Truro, N. S.

It has been well known that the Borden interests have had control of these for some time, and now these interests virtually have the condensed milk trade of the continent. The condensed milk trust is not confined to this continent, however. In Europe the Anglo-Swiss Condensed Milk Company, Ltd., and the Nestle Milk Company, Ltd., control the trade and it is well known that they and the Borden interests have an understanding as to the spheres of activity of each. The headquarters of the new Canadian merger will be in Montreal.

NEW USE FOR CRIMINALS.

PARIS, May 28—A somewhat startling suggestion is put forward in the Paris Midi, by an eminent physician, Doctor Buizard. Why, he asks, should condemned criminals be executed when society might make a better use of them by making them subject for medical research?

The doctor suggests that the criminal would, rather than submit to capital punishment, prefer to allow himself to be inoculated with disease germs. He would have a chance, however remote, of surviving, and since he has been adjudged guilty of taking human life he would be given a better opportunity of expiating his crime by the probability that, owing to the experiments he has been submitted to hundred of lives might be saved by the medical knowledge gained.

At present medical research is hindered by the fact that doctors have, except in rare cases, only dead bodies and invalids on which to experiment. If they had healthy and vigorous living subjects, the doctor says, the value of the knowledge gained by inoculating them with typhoid cholera, diptheria and other germs would be inestimable.
