

After long tests we are convinced Aluminum is the best container for tea.

RED ROSE TEA "is good tea"

Now packed only in Aluminum.

DID ANY "UNKNOWN WOMAN" LOSE HER LIFE IN WAR?

Memorial To Such Heroine Suggested, But Proposal May Not Be Proceeded With.

LONDON, Sept. 28.—Is there an "Unknown Woman"?

This question is raised in the Daily News by the suggestion to erect a memorial to the nurses and Englishwomen who lost their lives in the war near the tomb of the Unknown Warrior in Westminster Abbey.

"Many women lost their lives during the war, the number of officers alone being 152, but it is doubtful whether one remained under the name of the Daily News says. It was a sad and simple task to exhume the body from one of the countless graves of unknown soldiers in Flanders, but it would be a vastly different matter to find the grave of an unknown

The general secretary of the National Citizens' Union, Coy. H. D. Lawrence, has told the Daily News that no steps are being taken to forward the scheme at present.

"There is a memorial to women who lost their lives in the war at York Minster, where 'The Five Sisters' window has been re-erected to their memory. Whether this represents all the women who gave their lives in the war or merely the women of York I do not know," he said.

Captain Stanley Abbott, late secretary-general to the National Citizens' Union, considers that the memorial to the Unknown Warrior included all who lost their lives in the war, and that women were included in the great idea.

HOT SCRAP FORESEEN BETWEEN E. C. DRURY AND AGNES MACPHAIL

TORONTO, Sept. 30.—The breach in the U. F. O. ranks between Miss Agnes Macphail, M. P., and Hon. E. C. Drury, former premier of Ontario, which had its beginning on the election platform in North Huron, is going to end in a "pretty fight" at the U. F. O. Convention here in December.

Yesterday Miss Macphail stated that Mr. Drury would not find the same courtesy, sympathy and support at the convention this year. Mr. Drury also hinted that as a farmer he did not propose to be put out of the U. F. O. by Miss Macphail or her supporters. "He said

he had a few shots reserved but that because he believed in the usefulness of the organization he had refrained from pointing the gun."

Miss Macphail said there was no difference between the U. F. O. and politics. "All we are out to do," she said, "is to look after the interests of agriculture. That is why I want a group in the House to look after the interest of agriculture as no other people can do it."

Miss Macphail defined the difference between Progressives and Conservatives in the fact that the feud between the two factions is causing the trouble in U. F. O. circles.

"The Progressives are people," said Miss Macphail, "who believe in forming a new party to capture enough seats in the House to form a Government. But the U. F. O. believe in the party system that is evil and not the individuals composing the parties."

"I want organized Agriculture to send representatives to each house to vote on the merits of each question as it comes up. Of course, if new groups continue to come into Parliament, then the system of government must be changed to allow them to function there."

ELECTRICAL INSPECTORS HOLD CONFERENCE HERE

TORONTO, Sept. 30.—For the section of the International Association of Electrical Inspectors held their annual convention in Canada, opening at the King Edward Hotel today.

Mayor Foster welcomed the delegates to the city, and Harley R. Markel, first vice-president, replied with a humorous warning to the delegates on the new Liquor Act.

The report of the "committee on instructions to the public concerning the safe operation and maintenance of electric wiring and apparatus," was presented. Financial and business reports occupied the attention of the delegates for the remainder of the period.

LIQUOR REVENUE GIVES ONTARIO SURPLUS AT LAST.

TORONTO, Sept. 29.—By means of the liquor shops and the government control bill the Ferguson administration is likely to have its first financial surplus at the end of the present fiscal year, the first since the 1919 report handed in by the Drury government.

The revenue derived from the sale of liquor in government shops has been estimated at Queen's Park as reaching three and one-half million dollars.

It is anticipated that next year this total will be more than doubled when liquor is sold for the full twelve months.

Owing to the imposition of new taxes and an efficient means of collection, revenues from the department of highways are considerably higher than last year and possibly higher than ever before.

Succession duties are greater than the market set last year but the revenues from the department of lands and forests are said to be about the same.

A rigid and efficient means of collecting amusement taxes has likely added to this revenue producing source.

INSTITUTE MEETING.—The Cornwall York Point Women's Institute held their September meeting at the home of Mrs. David White. The meeting opened with singing of Institute Ode. Sixteen members and eight visitors were present.

One more member was welcomed to the Institute. The members of last meeting were read in connection with the Institute were ordered to be paid. It was decided that the Institute quilt should be exhibited and offered for sale at the Exhibition. Useful and practical pieces of fancy work are to be sold at the Bazaar which will be held in December. Roll call is to be responded to with a Rhyme at the October meeting. Delicious refreshments were served by the York Point Ladies. The meeting closed with the National Anthem. The social hour was spent in conversation. The next meeting will be held at the home of Mrs. Hazen Howard on the afternoon of Monday, Oct. 3rd, at the usual hour.

MURPHY-McAULAY.—A very pretty wedding took place at Sacred Heart Church, Malden on Sept. 14th, when Cornelia Mae Murphy, formerly of Kelly's Cross, became the bride of Mr. Joseph McAulay of Concord, N.H. The nuptial Mass was celebrated by Rev. S. F. Chamberlain, assisted by Rev. Wm. O'Reilly, the altar being beautifully decorated for the occasion by the "Sisters of Providence." The bride was handsomely attired in a gown of white georgette; her veil of rose point lace was held in place by a coronet of orange blossoms and her shower bouquet was of white roses and lilies of the valley. She was attended by her cousin, Miss Tena McCloskey, who wore pink georgette with black picture hat and carried a bouquet of pink roses while Mr. Basil S. McDonald ably supported the groom. The music for the occasion was rendered by Miss M. O'Connell, Organist. After the ceremony the bridal party motored to the home of the bride's cousin, Mrs. Willis Whitmore, where a sumptuous wedding breakfast was served to the immediate friends of the happy couple left on a honeymoon trip to New York, Niagara Falls and Atlantic City, and on their return will reside in Concord, N.H. The groom's gift to the bride was a beautiful Muskrat coat, with fox collar. The wedding gifts, which consisted of cheeses, silver, cut glass and linens, included two hundred dollars in gold; one hundred dollars in gift from the firm of Batchelder Bros., Inc., where the bride long enough to permit them to be a valued employee. The many friends here, and in Massachusetts extend congratulations.

SEAT COVERS CAN COME OFF Summer with its drought and dust has passed and the motorist consisted of cheques, silver, cut glass and linens, included two hundred dollars in gold; one hundred dollars in gift from the firm of Batchelder Bros., Inc., where the bride long enough to permit them to be a valued employee. The many friends here, and in Massachusetts extend congratulations.

PERSONALS

Miss Elizabeth H. MacMillan, Alberry Plain, left Thursday morning to resume her studies at Acadia University.

The many friends of Miss Helen Skerry Steele, a pupil of Notre Dame Academy will be glad to learn that she was successfully operated upon for appendicitis at the City Hospital on Thursday morning and is resting easy.

Mr. Watson Hudson is at present in the Province renewing old friendships. He was the guest of his niece, Mrs. Leslie McDonald of Banbury, and also visited his sister, Mrs. William Boyce of this City. He left on Thursday for his home in Annapolis Valley, N. S.

CANADA TO CELEBRATE AGRICULTURAL JUBILEE

OTTAWA, Sept. 29.—"Canada's Agricultural Jubilee" is to be celebrated in this sixtieth year of Confederation and due recognition paid to agriculture—the greatest of the Dominion's basic industries.

Announcement to this effect is made by the Hon. W. R. Motherwell, Federal Minister of Agriculture, through which it is hoped will bring home to the people of Canada the far-reaching extent and importance agriculture plays in Canadian life.

Mr. Motherwell has taken the matter up with the various provinces and has secured ready assurance of co-operation to make the event successful.

While the complete details of the projected "Canada's Agricultural Jubilee" may not be announced yet, it has been decided to hold it in connection with the Royal Winter Fair at Toronto from November 14 to November 24 as the new buildings erected there jointly by the Dominion and Province of Ontario offer a splendid setting for the event. His Excellency Viscount Willingdon has consented to officiate at the opening ceremonies.

Smith—"My wife is like a stable full of decrepit horses."

Williams—"How's that?"

Smith—"Nag, nag, nag."

That Car Of Yours

By WILLIAM ULLMAN Heart-to-Heart Talks With Automobile Owners and Drivers How to Get the Most Out of Their Cars at the Least Expense.

TOO OFTEN OVERLOOKED

Periodic washing, and repainting at least once a year, are particularly effective ways to preserve the utility and beauty of the under sides of the fenders. Subjected to a continual bombardment of dirt, sand, gravel and water thrown up by the wheels, the under sides of the fenders probably are more severely used than any other part of the car's exterior. Repainting is the remedy for the effects of that service.

NOISES CAN BE USEFUL

One of the most interesting and potentially useful sections of the instruction books accompanying new cars is that which is devoted to a description of the various noises that may develop. Too many knocks are dismissed as "just knocks" when they really are telling signs of possibly severe damage to the mechanism. The motorist who reads his instruction book and acquaints himself with the different types of noise the engine, drive, chassis or body may develop is forewarned as to possible troubles. The noise whose source is recognized can be really useful.

MAY SIMPLIFY BACKING

Many experienced motorists confess that they still do not feel at ease or familiar with their position when backing the car. One who had this trouble declared it helped him to remember that to go either to right or left was a matter of turning the wheel in the same direction as when going forward. It is an idea that escapes attention because it is so elementary.

NEW INSTRUMENTS HELP

Motor heat indicators are among the most recent additions to the instrument boards of many cars. Every motorist should learn to use them to their full advantage, instead of dismissing them as just one more knick-knack. Most engines operate at the highest efficiency at a temperature of 180 to 190 degrees. Watching the indicator will enable the car owner to avoid running with too cool or too hot an engine.

MAKES CLEANING EFFECTIVE.

Carbon cleaning is made more effective if waste or rags are packed into the engine head bolt holes. The motorist should learn to use them to their full advantage, instead of dismissing them as just one more knick-knack. Most engines operate at the highest efficiency at a temperature of 180 to 190 degrees. Watching the indicator will enable the car owner to avoid running with too cool or too hot an engine.

PERHAPS A LITTLE RICHER.

Fall's first cool days may find the carburetor too leanly adjusted for the smoothest starting, although the adjustment may be fine for operation. Care should be used in making a readjustment of the mixture at this time. The cool days are interspersed with higher temperatures and the mixture that is ideal for the former may be entirely too rich for the latter. Any change made should be slight.

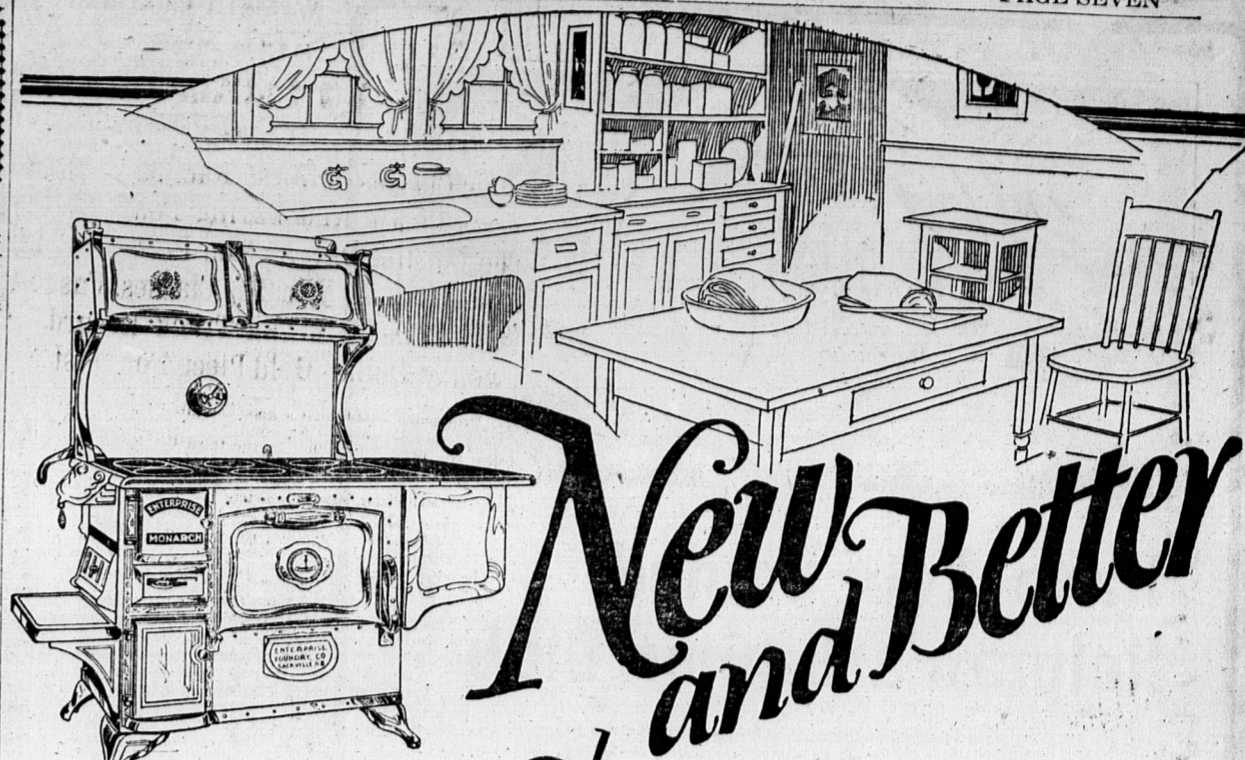

Scallop Fishing Growing Industry In Nova Scotia

(Canadian Press.) DIGBY, N.S., Sept. 30.—Scallop fishing, an industry that started here a few years ago with one man operating a small boat and picking up a few dollars for the season, and has developed quickly until a fleet of 35 boats have earned \$150,000 this season, received a fresh impetus recently when two new, richly stocked, scallop beds were discovered off this port.

The first find was made fifteen miles off Point Prim lighthouse at the entrance to Digby basin, when the fisheries patrol steamer Arleux, searching for signs of the shell fish, located an immense bed. A few days ago another fisheries patrol boat, the F. B. 1, commanded by Captain George Baker and with a Westport fisherman acting as guide, located a second previously unknown bed off Bear Island on Digby Neck. Several test rakes were taken up from the bottom at this point and it was ascertained that the bed was an extensive one and well stocked.

Ore Shipments Show Increase

(Canadian Press.) ST. JOHN'S, Nfld., Sept. 30.—Ore shipments from the iron mines at Wabano on Bell Island, reached a record-breaking volume during August when for one period of a week the total tonnage going in eleven steamers, was 103,160.

New and Better and Enterprise Monarch

WE have built a new and better MONARCH STEEL RANGE for housewives who demand the finest of kitchen equipment.

It is finished in shining white porcelain enamel because porcelain lends a fresh and lasting beauty to this famous range — because it entirely eliminates polishing and blacking — because it is washable and can be quickly cleaned with a damp cloth — and because it will not crack, chip or discolour.

The oven of the new Monarch is big and bright. Its walls are of silvery white and there are no dark, dirt-collecting corners. It washes out just like a dish. Its copper-fused steel will never rust. It bakes evenly on every side because the heat passes around all four walls. Also it is equipped with a remarkable new device which stops the inrush of cold air when you open the oven door.

There are special Enterprise Monarch ranges for wood, as well as other types for various sorts of fuel. The Monarch is easy to operate. Everything is just where it should be. The famous Enterprise oven bakes wonderful fluffy cakes because it can be regulated perfectly to any desired cooking speed. The purchase of a Monarch means comfort, convenience and economy to you. Use the coupon below and write for our illustrated booklet telling all about the many special features of the new Monarch.

The Enterprise All-Cast Furnace

The home that is equipped with an ENTERPRISE FURNACE is always a comfortable home — with an even temperature from basement to attic under the most blustery zero weather. There are various types, pipe and pipeless, for various kinds of fuel, including wood. And when an Enterprise Furnace is installed according to our plan and recommendations, we definitely guarantee, in writing, complete heating satisfaction.

The Enterprise Cabinet Heater

This wonderful new heater does the work of three or four ordinary stoves on the fuel consumption of one. It operates just like a furnace — heats by circulation, not by radiation, and floods every corner of your home with moist, warm air. This handsome piece of furniture does not require a cellar. It can be placed in any room and will harmonize with the furniture and add to the room's attractiveness.

THE ENTERPRISE FOUNDRY CO., LIMITED, Sackville, N.B.

The name of the range I have been using is..... It was purchased about..... Name..... Address..... P.S.—Please also send me particulars about Enterprise Cabinet Heater [] The Enterprise All-Cast Furnace []. (Mark in [] if interested.)

Epidemic of Birch Leaf Miner

AUGUSTA, Me., Sept. 30.—A serious epidemic of the birch leaf miner in the counties of Somerset, Franklin, and Oxford, has come to the attention of the Maine Forestry Service. The white birch stands in those sections appear as though scorched by fire, the foliage brown and falling. The adult is a small fly which lays eggs in the leaves. These hatch into small, flat, cream colored larvae which mine between the two layers of the leaves, eating all of your dear green matter on the inside. Infected leaves held to the light show the feeding larvae within. As many as fall or ten grubs may be found in one of the same leaf. Such injury at this time is critical to the life of the tree. Connecticut and New Jersey have not previously reported heavy inroads on the birch of those sections by the insect. Its increase during the past three years in Maine has been noted. To counteract the pest, the Maine Forestry Service has started two investigations. One is designed to determine how long various kinds of trees can withstand defoliation at different seasons. The other is an intensive study of the life history of the birch leaf miner with an effort to find a poison spray which will curb it. No parasites which will attack the miner are known.

LETTER OF SYMPATHY.

Letter of Condolence to Mrs. A. D. McLeod: Dear sister:—We the officers and members of the Ladies Aid Society of Peters Road, desire to express to you our deep sympathy with you in the great loss sustained by you in the death of your dear sister, and we feel that words will fail to comfort in such a time of sorrow, but we direct you to the dear Saviour who doth not willing season is critical to the life of the tree. Connecticut and New Jersey have not previously reported heavy inroads on the birch of those sections by the insect. Its increase during the past three years in Maine has been noted. To counteract the pest, the Maine Forestry Service has started two investigations. One is designed to determine how long various kinds of trees can withstand defoliation at different seasons. The other is an intensive study of the life history of the birch leaf miner with an effort to find a poison spray which will curb it. No parasites which will attack the miner are known.

SWAT THE FLY FLY TOX It will kill many times more flies than any other fly-killer for the money. Harmless to everything but deadly to the flies. Try a bottle once and you will use no other. Harold L. Worthy Sole Agent for Dr. Allan's Fox Remedies
