40c AND UP

Newest modern light bulb designed to reduce glare and make seeing easier. Scientists agree that it's the healthy way to better reading for grownups and children of any age . . . We have a complete supply ready for you!

P. E. I. Protestant Orphanage Report

"The work of our Orphanage has been carried on very successfully and a large number of orphaned and destitute children have been given shelter and care and an opportunity through teaching and training to become useful citizens" said Mr. W. A. Stewart, chairman of the trustee board of the P. E. I. Protestant Orphanage, in his review of 1944 activities at the board's annual meeting on Friday night.

The chairman commended the work of the various committees, staff, ladies' auxiliary, medical doctors and others concerned with the work of the institution.

In noting the sound financial position of the Orphanage, he paid warm tribute to the work of the committee under Mrs. H. S. Henderson.

Dr. F. W. Tidmarsh, medical superintendent, in his report stated that the health of all the children has been exceptionally good throughout the year, their complete freedom from the common cold being noteworthy. Two children had diseased tonsils and adenoids removed. One child suffering from coeliac disease was admitted to hospital for observation with resulting improvement.

"The children under our care lack nothing in the way of good food and suitable clothing," he stated. "Careful and competent supervision of every child was given by Miss Beer and her staff. The building and surroundings leave nothing to be desired."

Financial Statements

The following figures are from the financial report for the year ending Dec. 31:

Assets—	
Home and Buildings	$ 75,000.00
Car, Sleigh, Machinery	500.00
Cash in Maintenance Accounts	5,113.18
Bonds in Maintenance Investments	5,000.00
Cash in Endowment Acct. No. 551	3,453.64
	$89,066.82
Liabilities—	
Bills Unpaid December 31, 1944	318.85
Depreciation Reserve	16,500.00
Net Worth December 31st, 1944	72,247.97
	$89,066.82

N.B.—Assets do not include Bonds and Debentures held, with a Face Value of $50,000.00 in Endowment Funds.

Fire Insurance Carried $60,000.00

Bequests Received In 1944

Estate Caroline Amelia Mutch, Earnscliffe	$ 500.00
Estate James McLeod, Whim Road	427.50
Estate George A. Ritchie	200.00
Estate Leith E. Brecken	4,000.00
	$5,127.50
Total Bequests to December 31st, 1944	$58,580.61

Summary Of Receipts

Provincial Auxiliary	8,042.17
Interest on Endowment	2,786.01
P.E.I. Government Grant	1,600.00

POLICE COURT — In the City Police Court Saturday a man charged with breaking and entering was remanded for one week. One drunk and incapable was adjourned until this morning and a case of a man having for sale intoxicating liquor was adjourned until this morning.

IS ACQUITTED — William Vessey, charged with attempting on May 4th last to break into the Queen Street Service Garage, was acquitted before County Court Judge Duffy on Saturday. Vessey was tried under the Speedy Trials Act. G. R. Holmes appeared for the Crown and Lester O'Donnell for the accused.

CAMERAMEN COMING — Messrs. E. R. Wilson and Robert Hausler, cameramen of the National Film Board, will arrive in Prince Edward Island shortly to take shots of the gathering and processing of Irish moss. The garnering of Irish moss now constitutes one of the important sources of revenue for Island fishermen.

CASWELL — WATTS

A quiet but pretty wedding took place on Thursday June 14th at St. Mary Cathedral, Halifax, when Blanche Catherine, daughter of Mr. and Mrs. Alexander Watts, Grand Tracadie, became the bride of Norman Stanley Caswell, Pleasant Grove, P.E.I.

The bride looked charming in a street length dress of pale blue with white accessories and wore a corsage of American Beauty roses. She was attended by her sister Noreen who also wore a pale blue dress with pink accessories and corsage of carnations.

The Groom was attended by Charles E. Gautreau, R.C.N.V.R.

The ceremony was performed by Rev. Father Mills.

After the ceremony a wedding breakfast was served at the Lord Nelson Hotel for immediate relatives and friends of the bride and groom. After the breakfast the bridal party left on a short motor trip through the province and later left for their home in P.E. Island where they will remain for a few weeks after which time the groom will have to take up duties in the Pacific.

Their many relatives and friends join in wishing them many years of happy wedded life.

HONORARY MENTION

Wilmer Blanchard, Vera McKay, and Richard Carroll completed the work of grades V, VI, and VII in 2 years; also Noel McMillan, Anton Curtis and Francis Shepherd did Grade VI and most of Grade VII work during the year.

District Governor of Kinsmen Clubs

Mr. George H. Sinclair

At the eighth annual District Convention of the Kinsmen Clubs held at White Point Beach Lodge, Liverpool, N. S., Mr. George H. Sinclair of Charlottetown, was elected District Governor.

This district comprises the three Maritime Provinces and Newfoundland. Mr. Sinclair has been very active in Kinsmenship since joining the association at Amherst in 1937 and is thoroughly familiar with details to be followed. He has held different offices in the Club and became President in 1942 at which time he was transferred to Charlottetown with the Metropolitan Stores. He was also the popular District Director in 1943 and Deputy District Governor in 1944 and has served most efficiently on National Committees.

Of the 15 clubs in the district Mr. Sinclair was instrumental in forming three, namely, Pictou and New Glasgow, N.S., and Summerside, P.E.I.

In 1943 he was chairman of the Provincial Milk for Britain drive and raised $12,000.00.

Working with Mr. Sinclair for the coming year will be two energetic young business men, Mr. Ernest Lord as District Treasurer and Mr. Stewart Ives as District Secretary, each of whom is prominent in all good causes in Charlottetown.

The Wild Bird

By Elizabeth Vernon

CHAPTER X

For a long time there was silence. Still Ginnie looked down upon the bare trees and the park. It almost gave the effect from here of a country scene—so bare it was and empty. When she spoke, it was to herself rather that Etienne. And it seemed to him strange that he should know so clearly what her next words would be: "Then—I'll never be able to marry anyone," she said.

* * *

In the lounge of the Bellage's Hotel it was the cocktail hour. Most tables were taken. A small orchestra played, not too loud. The waiters, silent and swift, carried cocktails and, more infrequently, sherry. Round the hight walls ran a row of imitation windows. The window boxes were filled with color, with hothouse flowers that trailed their tendrils and seemed here as exquisitely in place as were the exotic clothes of the women, the furs, the jewels, the light perfumes and the lilt of music.

There was a low murmur of talk. A word spoken loudly was overheard. Therefore neither Mr. Richard Fosdyke nor Etienne, seated at a small table drinking, spoke anything like clearly. No one could come up behind them nor hear what they said. No one, in fact, could approach the table at all without being seen.

"I tell you, she's no darned use," Uncle Dick was saying. "And she never will be."

"My friend," replied Etienne. "You go the wrong way to work. Remember she has received a shock. Also, in the past she has been used to quietness, kindness. But now, you and your wife—"

"Truth is, she gets on Lou's nerves, and mine too. She's like a darned little whitefaced cat these days."

"You make her stupid," Etienne said. "And yet, when I give her her lesson, she is not stupid." As he spoke Etienne saw Ginnie as she had been that morning, seated beside him, listening quietly while he taught her how to face all circumstances of her new life; what to say, what not to say, what never to say. "But then, I do not swear at her," he added.

"You swore at Jerry all right."

"Jerry was a different proposition Fosdyke I could make of Virginia something good. One could rely on her. For instance, she would never cry out, scream. And did she not—how you say?—'play up' during that breakfast at Wanderslay? Jerry says that she did. I tell you she has grit that one."

"I don't care what she has." Uncle Dick shot a glance at Etienne. "It seems she refused an invitation, yesterday, to spend a week with the Lowtoppese—Lowtoppe girl was at school with her. And d'you know how much that school cost me. Two thousand pounds, with the trimmings. No. I've made a bad investment. And I don't throw good money after bad. She can't do what's wanted, can't she? All right—then I'm through."

He rose to his feet. Etienne remained seated. "Fosdyke," he said "do not fear for your investment. I gaurantee that from now Ginnie shall do as you wish."

"You gaurantee—"

"Yes. I will manage her. My friend I play the piano. I do not attempt to get music from it by slamming the lid up and down. And I do not press the loud pedal except when necessary.' Etienne moved his head. He looked past Fosdyke, across the tables, to the entrance of the lounge. "And here she comes," he said. "Please send her to me as you go."

He watched Uncle Dick's broad back wend its devious way among the groups. He saw him address Ginnie briefly enough. Then he watched her come toward him. She looked like—a flower that has been uprooted. And it was strange, he thought, how he could see her, too, from the professional point of view, and think it will be difficult to make anything of her. She was listless. And in the past ten days how many words had she spoken? At a guess, perhaps five hundred.

He rose. Ginnie stood by the small table, hesitant.

"Sit down." He smiled, so that it was difficult to know whether it was an order.

"Where is Jerry?" she asked as she seated herself.

"He is out, with friends," Etienne replied. And: "Here waiter! A dry Martini!"

"But, Etienne. I don't drink." Ginnie was astonished.

"You will drink this," he said. And this time there was no doubt as to whether or not he gave a command. He crossed his legs, lit a cigarette and leant back in his chair. "A friend," he said, "has rung you up. He is coming, in a

LANTIGEN LANTIGEN LANTIGEN LANTIGEN LANTIGEN LANTIGEN LANTIGEN LANTIGEN LANTIGEN

IMPORTANT BRITISH MEDICAL DISCOVERY of Dissolving Micro-Organisms

In cases of acute rheumatism, arthritis, catarrh, and sepsis conditions which have become chronic, the poison in the system uses up or destroys the whole or nearly the whole of the hydrotropins in the body system, thus rendering the ordinary type of vaccine when taken orally or by injection, either partially or totally ineffective, due to the fact that there are little or no hydrotropins available to dissolve the vaccine, which results in the antigenic fluid not being released from the body of the organisms, which further results in a complete failure to produce the necessary antibody resistance to destroy the toxic poisons, and either to make the poison germs innocuous, or to actually kill them off.

WHAT IS LANTIGEN?

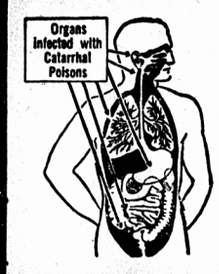
LANTIGEN is made in a Government Licensed Laboratory in Australia and therefore all their stringent regulations have to be adhered to. LANTIGEN is not a patent medicine—and is devoid of drugs. LANTIGEN is an oral vaccine in a DISSOLVED state.

Being a completely Oral Dissolved Vaccine, it is operative immediately it is taken. It is operative in two ways, firstly by absorbing into the open tissue, such as the tongue, throat, and intestinal tract, and secondly it is also operative by means of its distribution through the alimentary—stomach system. The antigens being fully released, begin to immediately incite the system to produce antibodies, which in turn destroy the toxic poisons given off by the poisoned germs and also render the poison germs harmless.

LANTIGEN SUCCEEDS

LANTIGEN is a natural aid. It is produced out of the human body and gives increased antibody resistance to disease. It is not a drug or a chemical aid. You would not develop colds, catarrhal and rheumatic conditions if your antibody resistance was strong enough to combat them. Remove the cause sapping your vitality. It reduces or eliminates the inflammation of the nerves, which results from bacterial toxins.

for CATARRH & BRONCHITIS



Bronchial Asthma, Antrum, Sinus, Catharral and Bronchial Colds.

Lantigen "B"

Usually the first catarrhal infection is due to the neglect of a simple cold. Rapidly the infection may spread, and develop into severe chronic inflammation in the mucous lining and the air passages become blocked. The secretions which are dislodged by blowing the nose may often fall back into the throat, infect the tonsils, and result in acute laryngitis and inflammation of the throat. Maddening head noises frequently make the catarrhal patient's life a misery. LANTIGEN "B" Oral Dissolved Vaccine will quickly improve these conditions and create a feeling of well-being.

for RHEUMATIC & ARTHRITIC PAINS

In acute arthritic cases where sufferers have been bed-ridden for several years, and in many cases being over 70 years of age, have been so completely relieved of the toxic poisoning given off by the streptococci germs as to be completely relieved of pain and a great deal of freedom of their joints restored. When this immunity is obtained to this extent it can be regarded as permanent, if periodic doses are maintained such as six drops of Lantigen "C" in water say once weekly, and on the signs of the complaint returning the doses should be maintained daily, which would almost invariably disappear again in less than five or six days.

Neuritis, Sciatica, and Lumbago

Lantigen "C"

The early effects of using Lantigen "C" are: (1) relief from pain, (2) the recedence of swollen joints and limbs, (3) improvement in general health. In the case of Rheumatic pains; in most cases the following bacterial organisms are present—Streptococci polyvalent.

READ THE PERSONAL WRITTEN TESTIMONY OF USERS OF LANTIGEN

R.R. No. 2, Pictou Rd., TRURO, Nova Scotia, April 13th, 1945.

Dear Sirs:
I have taken a course of Lantigen for arthritis and found it of great benefit. Before taking, my joints were very badly swollen and I had great difficulty in walking, but now I am quite normal and can walk with ease. I am 70 years of age.

Thanking you, Yours sincerely,
Wm J. Richardson

Lantigen Laboratories, 12 Richmond St. East, Toronto, Ont.

P. O. Box 689, WALLACEBURG, Ont., April 15, 1945.

Gentlemen:
I am so pleased with what your Lantigen "C" has done for me that I just have to tell you about it.

I had a very severe attack of Lumbago about 9 weeks ago, doctored with two doctors and a chiropractor. Took needles in arms, heat treatments, Violet Ray treatments, medicine, all kinds of tablets, different kinds of liniments, Lumbago Belt, etc. It would take too much space to tell of all the things I tried.

Doctor finally told me it had settled in the sciatic nerve. Then I noticed your ad. in the paper. I was just about discouraged and thinking what I could do next. I was all out of shape, couldn't put on my shoes without my wife's help. I finally had to get tablets to ease the pain so I could get some rest.

I got a bottle of Lantigen "C" the day it came in, and after taking the third dose thought I could see a little difference. I have now taken about one-half of the bottle and can truthfully say it has done wonders. I think the one bottle will clear it all up as I can now lay any position I please in bed, get my own shoes on and some days I forget all about the pain and it used to be there every minute day and night.

I recommended it to three of my friends that knew what shape I was in and what it has done for me and they have each purchased a bottle. I guess seeing is believing.

I am sending this letter to you on my own accord in appreciation of what your Lantigen "C" has done for me, and I think any one that has done so much good for humanity deserves all the praise and encouragement that is coming to them.

My Mother has suffered with Asthma for years. She has just had a very bad attack and is very weak but just as soon as she gets a little stronger I am going to see that she gets a bottle of Lantigen "B".

Very truly Yours, W. R. HEWER

Saint John, N. B., Jan. 27, 1945.

Lantigen "B" has relieved my eight and one-half year old son from a distressing sinus-bronchial condition which he has had for about four years, every winter.

This fall (1944) the same condition prevailed with the change of season, and on November 8th, I started him on the Lantigen treatment. The fact that he is now able to be out to play in all kinds of stormy and cold weather (with the usual wet clothes, damp feet, that so often occur at the end of an active boy's day of play), with no ill effects speaks for itself.

One bottle of Lantigen "B" has done this for him, and no words of praise are high enough in my opinion. His own words are probably more expressive—"Gosh, mother, I'm having fun this winter. I don't have to stay in with any 'old' colds!"

Sincerely, E. A. R.
