ATTRACTIONS FOR EXHIBITION

Arrangements Made Whereby All The Attractions Will be Got Together At Night and Exhibited In The Arena Rink.

The Exhibition management have for years past brought special attractions in connection with the Exhibition and races. These attractions cost big money and have to be procured some time before hand, and before the management know how the races are going to fill. They are obtained solely for the purpose of filling up the gaps which sometimes unavoidably occur between heats, and, in case the races should not fill well, to let the people have something extra in addition.

For some time they used to have these attractions on at night, but owing to the distance from the City—no streetcars or other means of conveyance, and owing to the evenings at this time of year being rather cool for people to sit out of doors, these night attractions were never well patronized.

Last year in getting the attractions the management cut out the night part altogether. This year in securing attractions they made arrangements for afternoon and evening performances—the latter to take place in the Arena Rink which has been secured for the purpose. In the afternoon the spectators at the races will be afforded attractions of the very best kind, and in the evenings at the Arena Rink these same people, with all others, who owing to work at their employment in the City during the day have not been able to attend the races in the afternoon will be enabled to see these attractions on an extended scale in the Arena Rink.

The performance of these attractions will commence in the Arena Rink. On Tuesday evening the eighth October, and will be on the race grounds on Wednesday and Thursday afternoons also; all the attractions so far secured, except one will be performed in the evenings at the Arena, and this one cannot be performed there for want of space. When it is stated that it is the attractions of a lady sliding holding on to a wire by her teeth, one thousand feet in height, it will readily be seen that this performance could not take place in any building, but must be performed where there is space out of doors. This act is called the slide for life and well deserves the name.

The attractions so far secured are: 1. Delmore and Onilda in their great La Perche Equipole, and Miss Onilda is the only lady in the world doing this difficult feat.

2. The five Bonizettes, three gentlemen and three ladies in an A 1 aerobatic act.

3. Lunette, in her slide for life, one thousand feet, hanging on by her teeth to a wire.

In connection with this act, although it has been stated above that owing to the distance it would not be performed in the Rink; yet the management will endeavor, if the rink is of sufficient height, and this feat be performed in a 300 feet space so have it performed there also.

4. Berzac's Comedy Circus, consisting of three ponies and a kicking mule. The best comedy act in the business, introducing the ponies and the clown on a revolving table and a great kicking mule with riding clowns. A side-splitter from start to finish.

Another very fine act is now also being negotiated for, and the management feel confident will be secured.

POTATO Digger Reaping Time. Now is the proper time to have that digger of yours overhauled. I sent now to J. H. McKee, e. McKee's Corner, Lot 38, he will give it prompt and personal attention. Can repair all kinds of diggers. Also new City digger for sale. 9-211w.

With the Exhibition, the Races, and the Special Attractions, in the Arena at night where the Fourth Regiment Band will give a concert, program each evening every moment of the time spent by visitors in this city will be fully provided for.

LABOUR TROUBLES IN GREAT BRITAIN

Lock-out in the Shipbuilding Trade Affects 20,000 Men.

LONDON, Eng., Sept. 19.—Notices were recently posted in the yards belonging to the Shipbuilders' Federation of the North East coast warning all Boilermakers' Society that their employment would terminate on the following Saturday. This action has been taken by the Employers' Federation in support of Messrs Armstrong, Whitworth, and Co., Newcastle-on-Tyne, where work has ceased for some time without having first had the question in dispute dealt with in the recognized way, and having failed to resume work despite the offer of the Tyne Shipbuilders' Association and Federation to discuss grievance after resumption. The notices will affect 20,000 men.

HON. S. N. PARENT GIVES \$50,000

President of the Quebec Bridge Co., Subscribes to the Relief Fund.

QUEBEC, September 18.—The government commission investigating the Quebec bridge disaster resumed its sitting here this morning. Jess Nanco, engineer on the electric hoisting engine, who went down with the wreck, and whose thrilling escape has been told, was the first witness. He had worked on the bridge for two years, all this time on the engine. On the day before the accident, when walking on the bridge the men that were with him, Cook and Haley went down to examine the hoist, of which there had been so much talk. He did not go down to look at it, therefore from his own knowledge he could say nothing as to defects. The witness said that all were a little scared and he was too but did not want to be the first to walk off the work. During the time he had worked on the bridge he had never seen anything out of order as he was not in a position to note anything wrong.

3. Lunette, in her slide for life, one thousand feet, hanging on by her teeth to a wire.

In connection with this act, although it has been stated above that owing to the distance it would not be performed in the Rink; yet the management will endeavor, if the rink is of sufficient height, and this feat be performed in a 300 feet space so have it performed there also.

Another very fine act is now also being negotiated for, and the management feel confident will be secured.

A SENSATIONAL STRIKE OF GOLD

Silver Prospectors at Cobalt Stumble on Gold Ore Without Knowing They Had the Richest Bonanza of The Present Day—The Find a Most Remarkable One

COBALT, Sept. 20.—(Special)—What will likely be the greatest bonanza discovery in the wilds of New Ontario was made about thirty miles south of this camp and about five miles from Temagami station. The prospectors who discovered it are Messrs. Boyle and Turner, and they have been developing the property for the last six weeks.

The shaft is down six feet, a point where two veins meet. When operations were started with the expectation of getting silver ore there was thrown on dump about \$500 worth of gold before the prospectors were aware that they had struck it.

So rich was the vein that an assay of some pieces showed an existing value of 2700 ounces, or 300,000 to the ton.

MONTEREAL, September 18.—Students who in addition to the ordinary curriculum take a course in certain military subjects and distinguish themselves therein, will be eligible for commissions in the Canadian permanent forces or in the British army. Such was the gist of a statement made by Principal Peterson, of McGill university, in his address today to students at the formal opening of the session in arts and applied science.

The ground of this possibility, the realization of which is strongly favored by Principal Peterson, is to be found in the fact that the militia department at Ottawa has made up its mind to follow the example of the old country, as it is felt that in the universities there are students of intelligence who are capable of becoming leaders of men, and also because it is believed there is an opening for Canadian officers other than those graduated from Kingston Military college. The British War office is ready to give a certain number of commissions for which McGill students would be eligible.

CHICAGO MARKETS

Table with 2 columns: Commodity and Price. Includes Sept. Corn, Wheat, Pork, Dec Corn, and Fork.

THE TUNNEL.

The Guardian would like to know if the residents of Prince Edward Island really desire a tunnel to connect with the mainland, and with this end in view each person is requested to cut out the below coupon after writing in their name and address, and enclose to "The Guardian, Charlottetown," marking "Tunnel" on corner of envelope. Everybody should send at once.

TUNNEL COUPON form with fields for Name, Address, and Date.

DROWNED IN B. COLUMBIA

Deaths Occurred Through An Accident to the Occupants of Conoes

VANCOUVER, B. C., Sept. 20.—(Special)—Five persons were drowned yesterday morning from a canoe in Skeena River. Three canoes left Hazelton for the mouth of the river and one was capsized. The names of the persons drowned have not yet been obtainable.

PATCHEN WINS THE 217 TROT

FREDERICTON, September 19.—Pointer Patchen, a favorite, won the 217 class in the exhibition races here today in straight heats, and the 235 class was taken by Fleetfoot, after a hard, a favorite had captured two heats. Both races were well contested, and were pronounced by many horsemen as the best of the meeting. The weather was fine. The track was in good condition, and fast time was made. There were fully 1,000 spectators. The 235 class had six starters and three of the field, Little Don, Belladonna and Quincy A., were distanced, the last named remaining until the fifth heat.

HARRIMAN PLANS GREATEST SYSTEM

Intends Spending One Hundred Millions in Improving Transcontinental Line.

CHICAGO, Sept. 18.—As a result of his trip throughout the west and his faith in the continued prosperity of the country, E. H. Harriman, it is reported here, has approved plans for spending between \$75,000,000 and \$100,000,000 to complete what he believes will be the best double-track transcontinental railway system in the country.

Mr. Harriman's plan contemplates the construction of a low grade, double-track railway from Chicago to the Pacific Coast at San Francisco, Portland and Seattle, and its operation over the mountain sections by electricity, generated by water power from the Rockies and the Sierras.

50,000,000 FOR ADVERTISING

James B. Duke, the tobacco king of Long Branch, New Jersey, recently claimed in an interview that he had spent more money in advertising than any other living man. He said that the figures would reach fifty million dollars.—Newspaper dom.

Yet James B. Duke is to-day one of the wealthiest men in the world. When you see a liberal advertiser you see a rich man. The business man who in this age of advertising is afraid to invest his money in publicity will never accumulate a fortune record.

CONCLUSION OF P. R. A. MEETING

Yesterday the P. R. A. annual meeting was concluded at Kensington Range. Following is the score for The Ladies Trophy. The other scores will appear on Monday.

DIED

MOONEY—At her home, Kent Street, Charlottetown, Sept 21st, 1907, Annie Mooney. Funeral notice later.

Any Guardian reader who receives a dimly printed, badly printed, badly folded, badly cut, badly addressed, badly wrapped, torn, soiled or incomplete paper of whatever issue will kindly notify the Subscription Department at once

FINDS CANADA A GREAT COUNTRY

London Times Representative's Conclusions After Tour of Dominion—British Ignorance—Thunderer Editoria.

MONTEREAL, Sept. 18.—A Canadian A cable from London says: The Times publishes the first article of its representative who had returned to England after a tour through the Dominion of Canada with the journalists' party who traveled under the auspices of the Canadian Pacific railway. The article deals with immigration.

Commenting editorially, the Times refers to the ignorance of Canada still prevalent here, and adds that there is probably no country in the world wherein conditions or prosperity are so completely within the reach of any man or woman who will grasp them.

The Times also refers to the labor question, and says, in new as well as old countries, men who work with their hands seem sometimes in need of being reminded of their essential dependence upon men who also work with their brains. After dwelling on this point, the paper concludes:

"If the Canadian ship of state is to make a prosperous voyage officers are fully as essential as the crew. If they were not forthcoming the goal would be far more difficult of attainment. Canada is fortunate, at least in having among her leaders on both sides of politics and representing both races, statesmen tried in experience and of approved patriotism and sane imperialism.

The Cape Colony parliament will be dissolved tomorrow. The continuance of the council's blocking of supplies is creating a constitutional crisis, and it is probable that the regained votes of the rebels disfranchised after the war will be sufficient to defeat Dr. Jameson's party, and South Africa will be politically Dutch from Rhodesia to Table Bay. The election to the legislative council occurs in November, and to the house of assembly in February.

CANADA AND THE WEST INDIES

We Must Advertise and Send a Roving Trade Commissioner to West Indies.

TORONTO, Sept. 19.—Sir Daniel Morris, Imperial commissioner of agriculture in the West Indies, addressed the Board of Trade this afternoon on the trade relation which exists, and which it is hoped will hereafter exist between Canada and the sister colony. R. C. Steele, president of the board, introduced the speaker.

"Canada's trade relations with the West Indies," declared Sir Daniel, "are unequal. Thanks to the preferential tariff policy and the surtax placed upon the importation of German sugar growers of the West Indies are able to sell the Dominion directly 78 per cent of the sugar she yearly consumes, and indirectly, through the English refineries, 10 per cent more. In return the Indies take what from Canada? Three million dollars yearly. Canada must advertise. In all my travelling through the country I represent, I seldom or never met a Canadian commercial traveller. I meet American 'drummers' in plenty. Of all the literature which I am informed Canada circulates about the Empire only a meagre few pamphlets ever stray into Jamaica or Barbados."

BIG GALE OFF NEWFOUNDLAND

Vessels Wrecked and Lives Lost--Worst Storm in 40 Years

ST. JOHN, September 19.—The worst equinoctial gale recorded here in 40 years swept the Newfoundland coast today. Tonight's report from fishing towns and settlements showed that five lives have been lost. The storm struck many fishing vessels and eleven schooners and sloops were driven ashore at various points, or foundered at their moorings. A large number of vessels are on their way to Newfoundland from Labrador, where the season closed a few days ago, and it is feared more disasters will be reported. The eleven vessels wrecked put into a dozen harbors for shelter, but were driven ashore or sunk. Most of these lost had full cargoes of fish.

H. R. EMMERSON'S CONSTITUENTS

Say He is Willing Enough to Represent Them Without Portfolio

MONCTON, Sept. 19.—At the re-opening of Hall's Creek bridge near here today, an interesting part of the proceedings was a statement made by Hon. H. R. Emmerson to the effect that he would continue to represent Westmoreland as long as the people of the county wanted him. He said:

"The idea seems to have got abroad that because I have resigned my position of minister of railways in the government I intend to retire from the representation of the county of Westmoreland. Let me say this—There is honor enough for daily mail in the county of Westmoreland to represent the county in the federal house without being enhanced by any portfolio, and so long as the people of the country want my services just so long shall my services be at their command."

THE WEATHER. TORONTO, Sept 20.—(Special)—south to west winds, partly cloudy with some showers.

Commenting editorially, the Times refers to the ignorance of Canada still prevalent here, and adds that there is probably no country in the world wherein conditions or prosperity are so completely within the reach of any man or woman who will grasp them.
