Diamond Rings

Nobody wishes to buy a flawed, imperfect diamond. It may be a pretty stone but the fact that it is flawed, detracts greatly from its value, and it is not appreciated.

And yet, it is not easy for the layman to detect the presence of such defects; he must depend upon his jeweller.

Now my stock of diamond rings has been selected with particular care, and nothing but the best grade of gems has been purchased.

Finally, I know that I have priced these high grade goods at a substantially closer margin of profit, than is usually expected.

It will be to your advantage therefore to see these goods.
