Clover Silage As A Feed For Dairy Cattle

(Experimental Farms News)

The general advantage of silage or roots over the use of an all dry roughage ration for dairy cattle is its value as a succulent feed. During the past three years the feeding value for milk production of ensiled clover as a succulent feed was compared by practical feeding tests with corn silage at the Dominion Experimental Farm, Nappan, N. S. Sixty cows in various stages of lactation from the Jersey and Guernsey herds were used in these tests.

The clover was ensiled just before the full bloom stage when its feeding value is highest and when hay curing conditions frequently result in loss as high as 50 per cent of its feeding value. Feed molasses at the rate of 60 pounds per ton of clover silage, diluted with warm water and evenly sprinkled over the cut clover as placed in the Silo proved to be a satisfactory preservative.

The combined results from these feeding tests to date show an average daily milk yield per cow of 20.4 pounds on the clover silage ration as compared with 20.5 pounds from the cows on the corn silage ration. The fat content of the milk remained about the same on both rations and no appreciable difference in gain or loss of body weight was recorded. The cost of producing one unit of clover silage however was considerably less than corn silage so that the final feed cost of milk production was $1.24 per 100 pounds on the clover silage ration as compared with $1.35 on the corn ration.

Feeding tests demonstrated that at least half of the hay fed in a daily ration could economically be replaced by clover silage.

SPECIALS — MRS. JOHNSTON'S Beauty Salon. Permanents $1.75 up. Fingerwaves 25c up. L-448 2 21 21.

In Memoriam

MRS. SAMUEL DAVIDSON

At 7 p. m. January 22nd, 1942, as a beautiful day was ebbing to its close, a faithful soul had taken its flight heavenward. After several months of declining health at home and at the Montague hospital, and despite all that medical skill could devise and tender nursing achieve death had removed one of Peter's Road residents, in the person of Mrs. Samuel Davidson.

The late Mrs. Davidson was born at Peter's Road, King's Co., P. E. I., in the year 1869, the daughter of Mr. and Mrs. Alfred Isaac Bears.

The deceased was a devout Christian, and for many years she had the glorious privilege of acting in the capacity of Sunday School teacher, an opportunity which she treasured, during those fruitful years. She had hopes realized of seeing results of the faithful inculcation of holy ideals on youthful minds, cultivating the "things of good report and lovely", which things are never destitute of influence on the lives and characters of others. Besides serving so loyally in the sphere of Sunday School teacher, she was a staunch attendant of the public worship of God, and seldom had the writer observed the family pew vacant. Concerning domestic affairs it may be said like in the words of Proverbs: "In her tongue is the law of kindness, she looketh well to the ways of her household." Furthermore, a sense of great loss has been felt by the community where a trustworthy citizen and amiable companion had been called to the Celestial Home.

The late Mrs. Davidson had been twice married. In the year 1893, she was united in wedlock to Mr. Fulford Griffith, of Montague, P. E. I. Of this union there were three sons and one daughter, namely: Ivan, Arthur, Alfred and Mae. Alfred predeceased her in 1939.

The second marriage occurred in 1924, when she became the wife of Mr. Samuel Davidson of Peter's Road.

The funeral services were conducted on Sunday, January 25th, at 2.30 p. m., both at the home and church by her pastor, Rev. A. C. MacPhail. Notwithstanding the severe temperature a very large audience assembled to pay their tribute to one who was verily esteemed as a neighbor and friend. The minister based his remarks on the "talents" as implied in St. Matthew 25:21: "Well done, thou good and faithful servant: enter thou into the joy of thy Lord." Favourite hymns of the deceased were sung, viz., "The Lord's My Shepherd", "Rock of Ages" and "Asleep in Jesus". Interment took place in the Murray Harbour North Presbyterian cemetery at 4.45 p. m.

To mourn their loss besides an affectionate husband are two sons and one daughter, Ivan, of Dartmouth, N. S.; Arthur, of Dartmouth, N. S.; and Mae, nurse, of Halifax, N. S.

Also three sisters and one brother, Mrs. George Reynolds, Cambridge, P. E. I.; Mrs. William MacDonald, Peter's Road; Mrs. Wm. L. MacLean, Peter's Road, and Arthur Bears of Sydney, C. B.

There were many and beautiful floral tributes.

The pall-bearers were: David Sencabaugh, John Angus MacSwain, Artemas MacSwain, Oatis Jackson, Lemuel Butler and Harry Johnson.

The sympathy of the community is tendered to the bereaved in their hour of sorrow.

Grain

WINNIPEG, Feb. 22—(CP)—Sale of a cargo of No. 2 northern wheat to Portugal featured trade on Winnipeg grain exchange Saturday with an estimated 350,000 bushels being taken for shipment from a United States port to Lisbon. This business was reflected in the pit with export interests making fairly heavy purchases. Other purchases were attributed to mills. Winnipeg wheat closed 3-8 cent higher with May at 79 3-4 cents a bushel and July at 80 7-8B. Chicago futures finished unchanged to 1-4 lower.

No important trade was noted in the cash wheat market.

Trading in coarse grains was at a minimum.

Oats closed 1-4 to 1-8 higher; barley 1-8 lower to 3-8 higher; flax unchanged; rye unchanged.

VISITS SAINT JOHN—Lt Cmdr. Nelson Rattenbury, formerly of Charlottetown, was honor guest at luncheon Thursday at the Union Club. Covers were laid for 20. Guests included members of local shipping interests with other friends. Lt. Cmdr. Rattenbury was presented with an engraved silver cigarette box.—Saint John Telegraph-Journal.

FIRE YESTERDAY —Fire, which broke out shortly after five o'clock last evening, badly damaged a shack on the old Connolly Wharf. The firemen were on the scene a few minutes after receiving the alarm and were able to extinguish the blaze before it had destroyed the small building. Chief Angus McEachern said last night that the origin of the fire had not been determined but it is believed to have been caused by some children playing with matches.

R.C.A.F. RECRUITING —Over 75 inquiries were received during the visit of the Royal Canadian Air Force mobile recruiting unit to this province Thursday, Friday and Saturday. In addition to this there were many inquiries for admittance to the Air Force from "R" recruits of No. 62 C.A.B.T. at Beach Grove. In this group many were found suitable for training as aero engine and airframe mechanics and wireless operators, ground. Sixteen applications for admittance to the Women's Division of the R.C.A.F. were received from 25 inquiries. About 40 men were interviewed, most of whom submitted applications. Flying Officer T.A.K. Fletcher, Moncton, says there is still a great need for men with Grade nine education to undergo pre-enlistment training in science and mathematics to fit them for aircrew enlistment.

Japanese Grip on Dutch East Indies Seen Squeezing Allies Completely Out of Far Eastern Oil Areas

BY PETER EDSON

NEA Service Correspondent

WASHINGTON, — Japan's war against the ABDA area of the southwest Pacific—the area of the American, British Dutch and Australian interests—is rapidly approaching a showdown as a battle for oil.

This war is being fought with oil, just as much as it is being fought with explosives, for the explosives can be delivered only in trucks and tanks and planes and ships. Japan is relying entirely on what she has stored.

All the Pacific oil-producing areas belonged to the United Nations. But a Japan in possession of all of the Dutch East Indies and able to bring the destroyed Indies oil fields back into production, would make the problem of ultimately whipping the Japs one of developing new lines of supply from three places; the Persian Gulf, Southern California, or Venezuela and Colombia via the Panama Canal.

Australia would of necessity, become the center from which the operations against the Japs would have to be based.

The complete subjugation of the Indies is not yet conceded, but complete subjugation isn't necessary to gain control of the oil fields.

ACUTE PROBLEMS OF TRANSPORTATION

From Australia, which has no oil at all, to either the refineries on Bahrein Island in the Persian Gulf to the west or the American refineries to the east is a 7000 to 9000-mile, a three-to-four-week's trip by tankers in convoy. Setting up and maintaining those supply lines will mean the diversion of many tankers now on other runs.

Oil men and shipping men say the tankers are available and the job can be done. The possibilities of keeping planes in the sky and tanks on the ground of Australia is therefore not hopeless, and the war is not lost even though the Japs hold the Indies.

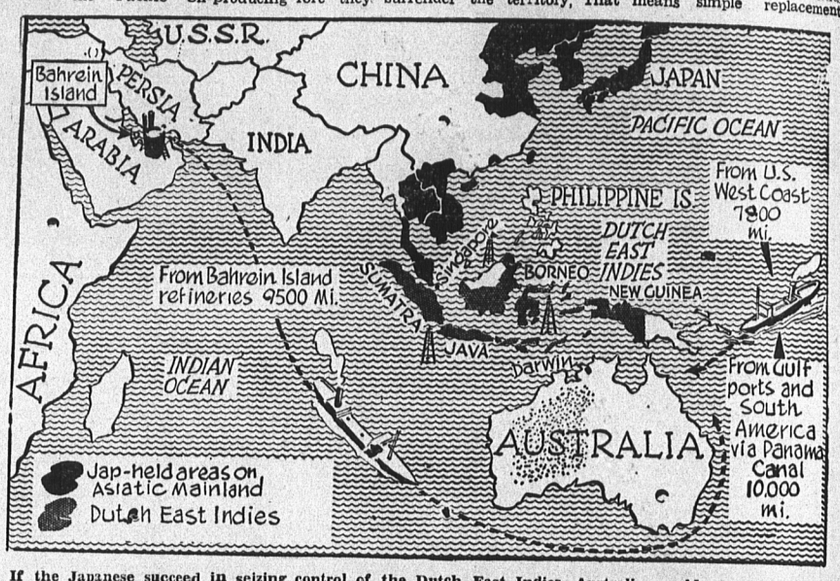
But to keep Australia in gasoline may mean sacrificing tankers now in U. S. coastal services. It might mean gas rationing in some sections of the United States, too.

The Dutch are, of course, destroying wells and refineries before they surrender the territory, but on the effectiveness of this strategy, U. S. oilmen fear that the country has been oversold. It is hard to destroy a well or refinery. The wells can be filled with concrete and the derricks dynamited. The worst they can do is force the Japs to drill new wells, but the Dutch producing wells, are not deep, and at the most there will be a delay of only a few months.

The Japanese, with no oil fields on their own islands, are not skilled producing operators. They will get some help from the Germans, but even the Germans have not had too much experience in field work. Where both excel is in refining technique, and here their knowledge will come in handy.

An oil refinery is a tough thing to destroy, the petroleum engineers point out. Refineries are built to withstand tremendous heat and high pressures. Fires and explosions are normal industrial and they are quickly brought under control. When the Italians conducted their much advertised bombing of Bahrein Island, they dropped 68 bombs on the refinery and didn't stop its operation for a minute. Perhaps that's just bad Italian markmanship but consistent British bombings of German refineries have never seriously interfered with the production.

That being the case, when the Dutch have "scorched" their refineries at Trakan and Balik Papan on Borneo, they have had to work fast. There are conflicting reports as to just how much damage they did, but as they had only a day or so for their destruction, the refineries could not have been razed leaving the site as empty as a baseball field. All they could do is damage weakest points. That means simple replacement and repair jobs for the Japanese refinery experts and resumed production in a matter of months.



If the Japanese succeed in seizing control of the Dutch East Indies, Australia would have to be the main base of Allied operations against the foe. The map above graphically shows the long, perilous routes over which oil would have to be transported to Australia, which has none of its own.

NEEDN'T WORRY ABOUT "QUALITY" WORK

When the Japs do get the captured refineries in operation, they will not be forced to do the highest type of refinery work. Their demands during military operation will be for fuel oil for ships, Disel oil for tanks, and ordinary low grade gas for their trucks. The aviation gas they can continue to produce in Jap refineries and transport to the fields in drums.

Just how much of an oil reserve the Japs have on hand is a disputed point. Estimates have run from six months to two years. Make it a year. There is little doubt but that the Jap armies will have their captured oil fields and refineries in operation long before that time, and if it works out that way, the hope that Japan will be 'starved' out of the war by a petroleum products shortage is not only forlorn, it's lost.

Sorrow Widespread In Unexpected Death of Rev. D. M. MacLeod

(Glengarry News, Feb. 13)

The Presbytery of Glengarry lost one of its outstanding members and the citizens of Alexandria an esteemed and popular friend, with the unexpected death Wednesday morning of Rev. Dr. Donald M. Macleod, minister of Alexandria United Church for the past 18 years. Dr. Macleod died at the Manse, as he was about to be removed to hospital in Cornwall at 9 a. m. His death came after but two days' illness, he having conducted services in his Church on Sunday when he apparently was in his usual good health.

The annual meeting of his congregation was to have been held Monday evening, but was postponed when Dr. Macleod became ill. The unexpectedness of his passing made, even more profound the grief felt on all sides in the removal of a revered minister and warm friend.

A native of Springton, P. E. I., Rev. Dr. Macleod came of a family whose sons embraced the church as a profession. Three sons of the late John K. Macleod and his wife, Effie McKenzie, became Presbyterian Ministers, and Glengarry Presbytery was fortunate to have two of the brothers serving in its bounds for many years. Rev. Dr. Macleod was born on January 17th, 1870 and had but recently passed his 72nd milestone.

Following his education in the local schools, deceased attended McGill University from which he graduated in 1897. He completed his studies at the Presbyterian Theological College, Montreal, in 1900, and was ordained to the Ministry that year at Florenceville, N. B.

Succeeding charges brought him to Ottawa South, Blakeney, Ont., Lyn, Ont.; Moose Creek and Alexandria, and encompassed forty-two years of fruitful service, the last eighteen of which were spent here. Recognition of his long and active service was paid by the United Theological College in 1937, when Rev. Mr. Macleod had conferred upon him the honorary degree, Doctor of Divinity. He had served a term as Moderator of Glengarry Presbytery of the United Church and had rendered untiring service to Presbytery for the past fifteen years, during which time he filled the office of Secretary-treasurer.

To his ministry the deceased clergyman brought a sympathetic understanding of humanity, a kindly bearing and an active solicitude for the members of his congregation which embraced as well the welfare of our citizens generally.

As a citizen Dr. Macleod played a prominent part in the social activities of the town of his adoption. Possessed of a rugged constitution, he was an active member of the Bowling Club for many years and had curled right up to within a few days of his death. A ready wit made him a polished after-dinner speaker and Dr. Macleod was often called upon in that capacity. He was for many years a member of the Highland Society of Glengarry and was a regular attendant at Scottish gatherings.

Since coming to Alexandria, Dr. Macleod had been an active member of Alexandria Lodge A. F. & A. M., and was a Past Master of that Lodge.

He was twice married, in 1909 to Elizabeth Irving of Vernon, P. E. I. who passed away in 1910. Of this union one son, Irving Macleod, M. A., principal of the High School at Dresden, Ont., survives. In 1918 Rev. Mr. Macleod married Olive Usher of Athens, Ont., who together with two sons and two daughters, is left to mourn his loss. They are Donald, Gordon and Margaret at home and Mary, a student at Queen's University. Two brothers also survive: Rev. Dr. A. B. Macleod of Escondido, Cal.; and Hugh Chalmers Macleod of Springton, P. E. I. Another brother Rev. J. B. Macleod, who served at Martintown and Winchester, predeceased him in 1931, as did a sister.

The remains lay in state in Alexandria United Church from ten o'clock, Friday morning, until 2 p. m. when the funeral service was held. Members of the Glengarry Presbytery of the United Church had charge of the funeral service, the chairman Rev. C. J. Beckley of Glen Sandfield, presiding while Rev. G. W. Irvine of Williamstown preached the sermon.
