THE ALMANAC CHURCH.
One of the oldest churches in England is St. Botolph's at Boston. It has aptly been called the Almanac church. In the tower are 365 steps, corresponding to the days in

the year. The church has twelve pillars, fifty-two windows and seven doors, representing the months, weeks and days in the week. In the west porch are twenty-four steps ascending to the library, representing the hours of the day. Again, on each side of the choir are sixty steps leading to the roof, denoting on the one side the minutes of the hour and on the other the seconds of the minute.—Boston Post.

—SUCCESSFUL TEST.—The Souris Fire Chief Dr. A. H. Smallwood, Tuesday evening had the gasoline driven fire engine out for test and demonstration purposes. A large number of citizens showed their interest in our fire department and everyone present praised the work of the boys in the newly organized fire company and the efficiency of the fire engine. The engine was placed at the tank at Dr. A. McDonald's Corner and several lengths of hose laid along Main St. to the Canadian Bank of Commerce building. A splendid stream of water was coming through the nozzle immediately and after this demonstration, the pump and suction hose were drained and a smaller nozzle coupled to the same length of hose under a second test, which gave equally satisfying results, producing a much stronger stream at the nozzle and sending water well over the roof of the highest building. Fire Marshall for Prince Edward Island, Mr. E. H. Beer, was present and judging by the interest and energy he is taking in his duties any future fire losses throughout P. E. I. will be due to inefficient fire apparatus or unorganized fire brigades.
