## The OLIVER Typewriter

Print type is easy to operate

The abandonment of longhand in favor of clean, legible, beautiful typewriting, is the next great step in human progress.

Business Colleges and High Schools watchful of the trend of public sentiment are training a vast army of young people in the use of the OLIVER TYPEWRITER.

The prompt and generous response of the Oliver Typewriter Company to the world wide demand for universal typewriter gives tremendous impetus to the movement.

The American Oliver, with the largest sale of any typewriter in existence was the logical machine to make the initiative in bringing about the universal use of typewriters. "It always leads!"

- MECHANICAL ADVANTAGES**
- The American Oliver is the most highly perfect typewriter on the market—hence its 100 p. c. efficiency. Among its scores of conveniences are:
    - Visible Writing
    - The Automatic Tabulator
    - The Disappearing Indicator
    - The Adjustable Paper-Fingers
    - The Scientific Condensed Keyboard

**SERVICE POSSIBILITIES**

- The American Oliver Typewriter turns out more work of better quality and greater variety than any other writing machine. Simplicity, strength, ease of operation and visibility are the cornerstones of its towering supremacy in—
  - Correspondence
  - Card Index Work
  - Tabulated Reports
  - Follow-Up Systems
  - Manufacturing Service
  - Addressing Envelopes
  - Working on Ruled Forms
  - Cutting Mimeograph Stencils

I would like to demonstrate to you the easy operation of the Oliver. Write for full Particulars.

# MOLASCUIT MEAL

(Hughes' Patent)

**THIS CATTLE FOOD** is a pure product of the Sugar Cane, the richest grass in the world, only the digestible pith of the cane being used to absorb the molasses, 20 p. c. of this pith will absorb 80 p. c. of concentrated molasses. Molascuit is pure cane molasses, minus the water, which is dried out, and replaced by the digestible pith.

It is the most easy, practicable and economical means of handling molasses, and in the best form for feeding to all stock. When fed to cows, it will increase the quantity and quality of the milk.

When fed to horses it improves their condition and working powers. Give them a handful or so with their other food when they come in tired after a day's work, reducing the oats by the amount of MOLASCUIT added.

MOLASCUIT is extensively used in Demerara, Argentine, Africa, South Mauritius, India, Australia and of course in England.

The Canadian farmer will not be slow to grasp its value. MOLASCUIT is the richest sugar food, containing as it does over 50 p. c. of sugar.

#### SHRINKAGE IN TRANSIT.

Feeder and drover must always figure on their cattle shrinking an appreciable amount as they go forward to the Stock yards. Sometimes, if stock is driven for a considerable distance before it is loaded on the cars, it will gain in transit, or when they take their fill in the yards W. F. Ward and James E. Downing of the United States Department of Animal Husbandry have followed a large number of cattle from feed lot to market, and have ascertained the causes and conditions under which shrinkage is most severe. A difference in seasons and a difference in weather when the stock is being transported or unloaded, all tend to make it difficult to estimate the shrinkage a carload of cattle might undergo. The word "fill" refers to the weight of the food consumed after being unloaded at the yards; shrinkage in transit means loss of weight from shipping points to yards, and net shrinkage or "shrinkage" designates the amount lost even after the "fill" has been consumed.

Of all classes of cattle, generally, the stall-fed steer acquainted with man and his custom of supplying food will have less net shrinkage than any other class. Range steers may not shrink any more in transit, but they are uneasy in the yards. They are not acquainted with man on foot, and will not bring themselves about to eat and drink, and consequently when the market opens they have neither rest nor food, and weigh out with considerable shrinkage. It is recognized by drovers that, all things being equal, bulls will shrink more than any other class of cattle. Cows are the next highest losers, while steers and heifers of the same age show equal losses. Rest is almost as necessary as food in the yards in order to fill up the hollow spaces, and make the stock look fresh and full. Buyers will detect an overfill, and will bid correspondingly low but a haggard, drawn appearance is only removed by a rest after shipment, and where it exists, the buyer is liable to be prejudiced against them. Some influences at work to determine the final condition of the cattle are: character of fodder previous to shipping, distance shipped, nature of treatment in transportation, weight during shipment and when they arrive at the yards, as well as the time of day they arrive. In one trial

#### 'Nerviline' Cures Cramps End Misery Instantly

NO REMEDY SO SPEEDY OR EFFICIENT.

A real cramp cure? Yes, a real one—in a twinkling the cramp is a dead one, and the last squirm is over, once you get a sniff dose of Nerviline on the inside.

This isn't mere talk—it's a solid, truthful fact. No other remedy—not a single one—will cure cramps so quickly and harmlessly as Nerviline. It hits the spot in a jiffy and saves a heap of misery. "Last Saturday night my stomach felt like an infernal machine," writes T. P. Granger from Hartford. "I was awakened from a sound sleep and found myself suffering the worst kind of torture. I was so doubled up I could hardly cross my room. I had used Nerviline before for the same thing and took a real good dose. Once I felt the warm, soothing sensation of Nerviline in my stomach I knew I was all right. It finished the cramps—just one single dose." Sickness at night is rendered a nightmare of the past if Nerviline is handy. It may be carache, toothache or cramps. Nerviline in every case will cure at once and save calling the doctor. Nerviline is a family physician in itself. The large 50c. family size bottle, of course, is most economical. Small trial size costs a quarter. All dealers sell Nerviline.

## 1913

Has been our most successful year and we wish to convey our heartiest thanks to all who contributed to our success.

May 1914 bring Health and Prosperity.

## HEADACHY, COSTIVE, BILIOUS,—"CASCARETS"

LIVER AND BOWELS ARE CLOGGED—CLEAN THEM TONIGHT! FEEL BULLY!

Get a 10-cent box. Sick headache, biliousness, dizziness, coated tongue, foul taste and foul breath—always trace them to torpid liver; delayed, fermenting food in the bowels or sour, gassy stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely straighten you out by morning. They work while you sleep—a 10-cent box for your druggist means your head clear, stomach sweet and your liver and bowels regular for months.

In the Northwest States it was found that cattle shrank on an average 3.3 per cent. of their live weight during the first 36 hours en route, while the Southwest investigation showed, that cows shrank 3.5 per cent. of their live weight, and mixed cattle 3.7 per cent. The heaviest shrinkage occurs during the first 24 hours, which, in one class of mixed silage-fed cattle amounted to .05 per cent. of their live weight, and in transit between 24 and 36 hours it amounted to 3.57 per cent. of their live weight. Interesting, too, is the difference in stock fed on different rations. Beet pulp produces animals and finish which suffer considerably during the marketing operation. This is very pronounced when they are being prepared for shipping, and the pulp is replaced in their feed lots of hay. One lot of 88 shrank 5,995 lbs. in 23 hours, or 68 lbs. apiece, and in transit between two and five days shrank 5.40 per cent. Mixed corn and hay, averaging 1,303 lbs. at origin and less than 24 hours en route, shrank 67 lbs. in transit, consumed a fill of 16 lbs. and showed a net shrinkage of 51 lbs. each, or 3.91 per cent. of their live weight. A bunch averaging 1,167 lbs in transit between 24 and 36 hours showed a net shrinkage of 48 lbs. or 4.11 per cent. It has been noticed that the silage-fed cattle in transit less than 24 hours only shrank 2.05 per cent. of their live weight. The water for 15 hours before shipping, but given dry feed. They shrank so little in transit that the fill at the market over-balanced it, and they showed a gain of seven lbs. each. In most cases with silage-fed cattle they were held of water for 12 hours previous to shipping, and although they shrank considerable in transit, they always took a good fill at the yards and showed a small net shrinkage. The shrinkage in range cattle in transit year in and year out is six per cent. of their live weight, and if en route 36 hours or less the shrinkage will range from three to four per cent. of their live weight.

When cattle are to be shipped long distances they carry better when unloaded for feed and water than when these necessities are supplied them in the cars. When feeding in the yards they usually eat more, and it affords them rest at the same time. This condition tells of an improved appearance at their destination. The accommodation they are tendered on arrival also affects the shrinkage. In sheltered, quiet, well-drained pens they will usually feed and rest far better than in a noisy, uncomfortable spot, and if they arrive the afternoon before they are to be sold they will usually take a good fill and rest. 3.55

DEHORNING CATTLE. The incipient horns of young cattle should be subjected to a chemical process which will prevent them from growing. Prevention is better than after-operations. And the extinction of the horns should be done before the calf is three months old. Some advise that it should be done before it is a fortnight old. The hair must be cut from the top of the coming horn, and a stick of caustic potash, moistened with water, applied to it. Several applications may be needed at short intervals, and they must be very carefully done, as the caustic is poisonous, and would be injurious to the flesh or eyes if it were allowed to touch them. The calf must be especially sheltered and cared-for while the process of dehorning is taking place, but if this is done, no ill effects are likely to be induced. Hornless cattle may one day be general, and it may be possible to produce breeds entirely without them.

The yearlings and two-year-olds require a good place to spend the night and stormy days, but the outdoor paddock and open air are constitution builders for the young stock.

### Falling Hair

Dandruff and Itching Scalp are caused by Microbes.

There is no doubt about it. Doctor Sangerbood proved it when he infected a guinea pig with dandruff germs and all its hair disappeared in a short time. The entire medical world has accepted Dr. Sangerbood's discovery as final. Ask any worthy physician.

Paris leads the world in knowledge of diseases of the hair and remedies for the same. Parisian Sage which can now be obtained at leading druggists all over Canada is the one great remedy that kills the dandruff germs.

That is why Geo. E. Hughes says to every reader of The Guardian if Parisian Sage does not banish dandruff, stop falling hair or itching scalp in two weeks he will refund the purchase price.

Dandruff is a forerunner of baldness. Take care of your hair while you have hair to take care of. Kill the dandruff germs now before the dandruff germs kill your hair.

Use Parisian Sage, the guaranteed dandruff cure and delightful hair dressing. It is used extensively by ladies of refinement because it keeps the scalp absolutely clean and gives a bewitching lustre to the hair. Comes in large 50-cent bottles at Geo. E. Hughes and leading druggists everywhere. Girl with Auburn hair of every package. Made in Canada by The R. T. Booth Co., Ltd., Fort Erie, Ont. Mail orders filled, all charges prepaid.

### Special Notice

Immediately the S. S. "Empress" stops running between Summerside and Pt. Du. Chene, a special mail and passenger train will run between Charlottetown and Summerside to connect with the winter Steamer "Minto". This train will leave Charlottetown at 5.45 a. m. for Summerside, connecting there with S. S. "Minto" at 8 o'clock for Tormentine returning, will leave Summerside for Charlottetown immediately on return of the steamer from Tormentine. 3590-12-29 Mtl.

#### Attention to Horses Teeth

There are many horses of all ages that are not thriving well, although consuming a reasonable amount of food, and their owners are at a loss to account for it, and often spend money in condition powders, stock food, etc., without result. The animals do not show symptoms of illness, but simply do not thrive, and have not the spirits or energy they should have. The cause in the majority of cases, will be found in the mouth, either there is faulty dentition or there are irregularities of the teeth. The subjects do not require medical treatment all that is needed is intelligent attention to the teeth. We say "intelligent attention" as in many cases unskilled or ignorant interference does much more harm than good. It requires a man who thoroughly understands the anatomy of the mouth, and has the necessary instruments and skill to correct whatever is wrong.

J. M. NICHOLSON, D.V.D. VETERINARY DENTIST, 202 Kent St., Charlottetown, P.E.I. 2-26R/Malry.

## ORIGINAL GENUINE Horlicks Malted Milk

Instantaneous Lunch. Invigorating. The Food-Drink for All Ages—Highly Nutritious and Convenient Rich milk, with malted grain extract, in powder form—dissolves in water—more healthful than tea or coffee. Used in training athletes. D. A. McKinnon, Vice-President

Capt. Ernest Kemp, Sec'y-Treasurer

Chas. Lyons, Mayor of Charlottetown

Samuel Craig, Charlottetown

Robt. N. Tomlins, Charlottetown

A. J. MacAdam, Charlottetown

BANKERS—Royal Bank of Canada

### Record Fox Company

The foxes owned by this company are now mated, and comprise fifteen (15) pairs choice dark cross bred animals, procured from litters containing a large percentage of pure blacks. They have been selected by experts thoroughly qualified to judge of fur values and show from 50 to 90 per cent black.

With the phenomenal advance within the past few months in the price of fur from such stock, resulting in active demand for the live animals as breeders; also from the probability of producing some black pups, there is every prospect of a handsome dividend from them by next September.

Only a limited number of shares are being offered, so if interested it would be well to communicate without delay with any of the Provisional Directors, or with the Secretary Treasurer, Capt. Ernest Kemp, 115 Rochford St. Charlottetown, P.E.I. Terms 50 per cent in cash to accompany application. Balance in 30 days. Prospectus will be mailed on application. 3747-1-8Mthsatmontf
