

### F-M. Factory and Warehouse Trucks

For practically every trucking purpose you can obtain a Fairbanks-Morse Truck, of steel or wood, with iron, fibre or rubber tired wheels, either from our large stocks, or built to order for special service. They are sturdy to stand rough work, and yet are easy to handle and easy on floors. Hospital equipment, casters and replacement parts carried in stock.

### F-M. Stationary Diesel Engines

For isolated power plants where electric power is not available, and for standby service, Fairbanks-Morse Diesel Engines have proven thoroughly dependable and remarkably low in power, operation and maintenance costs. In mine, mill, grain elevator, railway yard, town and city light, power and pumping plants, in countless instances they are giving entire satisfaction using cheap low grade fuel oils. They are made on the 2 cycle principle in a wide range of sizes from 25 to 840 H.P.

### Yale Hoists and Trucks

For practically every job of lifting and moving material—raw, in process or completed—there's a Yale Unit that will do the work quickly, easily and safely. There are many Yale Hoists both hand and electric powered, Yale overhead trolleys carry big loads quietly and easily, and Yale Electric Trucks and Trailers are quick to transfer material. Yale margins of safety are unusual, and Yale controls are simple, safe and easy to operate. Let us study your material moving problems—in many cases our engineers have made real savings with Yale equipment.

### Automotive Supplies

In our Automotive Departments we carry large and varied stocks of supplies, replacement parts and garage equipment. Garages, Repair Shops and owners of Bus and Truck fleets are assured of an excellent service in parts and supplies, such as Spark Plugs, Chains, Fire Extinguishers, Wrench Sets, Brake Linings, Pistons, Rings, Pins and Bearings, Ignition and Battery Cable, Gaskets, Carburetors, Alemite Fittings, etc., as well as complete equipment for repairs and maintenance, including Cranes, Tire Changers, Presses, Spraying Outfits, Hoists, Test Stands, Air Compressors, etc.

### F-M. Marine Diesel Engines

On the Atlantic and Pacific, in freighter, fishing vessel, and coaster, on lake and river, in ferry and tug, Fairbanks-Morse Marine Diesel Engines have proved their sterling dependability. They start quickly and easily, run smoothly even at slow speeds, need a minimum of attention, permit a far wider cruising radius than with steam, and have made enviable records for low costs in fuel and maintenance. Their lubrication system is simple and economical, and they run on low cost fuel oils. They are built in varying sizes from 25 to 840 H.P.

In our thirteen Branches you will find stocks of mechanical equipment and shop supplies that for variety and quantity are unequalled in Canada. Aside from the many lines made by us, we have been selected to represent many of the world's outstanding makers of machine tools, machinery, equipment and supplies. Our general catalogue shows clearly how wide a service we provide for Canadian industry. A copy will be mailed without charge.

## NEWSY FARM NOTES

By Agricola

### TRADE WITH BRITAIN

The Canadian Trade Commissioner in Britain, Mr. Harrison Watson, has just given out a resume of the foreign trade of the United Kingdom for the first six months of the year. The figures for Canada unfortunately show considerable shrinkage. Of wheat Canada sent 2,250,000 cwt. while supplies from the Argentine rose by 3,757,000 cwt. and from Australia by 2,250,000 cwt. Canada still supplies about half of the flour, there being little change in that commodity. The bacon market, which takes—1 recently stated—about a billion pounds in the year continues to be unattractive to Canadian shippers, and the amount for the half year, viz., 94,684 cwt. is the lowest for some time past. The newsprint trade is the most encouraging item being more than double that of the corresponding period of 1928. The amount supplied to Great Britain was 1,295,845 cwt. valued at £891,592.

Australia is a large and steady purchaser of Canadian canned fish, textile gloves, pipes and tubes, motor cars and parts and paper all of which receive preferential treatment, but agricultural implements, timber, paper pulp, rubber tires, and a few other commodities show a decline.

The Netherlands, the largest per capita, tobacco consumers in the world, using 7 1/2 lbs as compared with Canada's 3 lbs per head, has been purchasing limited quantities of Canadian-grown tobacco but it is in general not well known. Most of it is purchased through the United States. Consumers who have bought Canadian tobacco say that while the Burley is not so bright and attractive as that from the U. S. A. the quality is somewhat better, though the stem of the Canadian leaf is considered too large and heavy.

### ARGENTINE DROUGHT

We are not the only sufferers from drought. Down in the Southern Hemisphere the lack of water is as great as in Canada, and the Argentine is profoundly affected. The two great industries, the grain and cattle trades are suffering, the pasturage is short,

Mr. Chester Acorn, Brighton, Mass. is spending a few weeks the guest of his parents Mr. and Mrs. Matthias Acorn, Village Green.

Mr. Daniel Myers, Mt. Albion was a recent visitor to the city.

Mr. and Mrs. Garfield Shaw, Vernon River, were recent visitors to Hazelbrook.

Mr. W. L. Jenkins, Millview, had the misfortune of cutting his foot.

The dance and ice cream which was held in the C. M. B. A. Hall, Vernon River, on Wednesday was largely attended.

Congratulations on the arrival of a young son at Mr. and Mrs. Hermon Ings' Millview.

Mr. and Mrs. J. F. Jenkins, Millview, were visitors to Murray Harbor on Monday.

Mr. and Mrs. Waldo Hawkins, Murray Harbor, and Mr. and Mrs. Edward Maxwell, Dorchester, Mass. were recent visitors to Millview.

Miss Olive Smith, Cambridge, Mass. arrived on the Island recently and is spending the summer at the home of by her father, Mr. Wm. Smith.

Mrs. A. Delorey, city, has been spending a few days the guest of Mrs. Edward Curran, Millview.

Mrs. George Lane, Hermitage, left on a visit for Montreal recently.

Mrs. John Seely, Balboa, Panama, Mr. and Mrs. Fred Jenkins, Edmonton and three children, and Mr. and Mrs. Christie Jenkins, Calgary, are spending a few weeks at their old home in Mt. Albion.

Mrs. McIntyre has been spending a few days the guest of her parents Mr. and Mrs. Wm. Coady, Millview.

Mr. James Mellish, New York, and Mr. George Mellish, Union Road, paid a visit to Millview recently.

Mrs. Bessie Vickerson, Boston, is spending the summer the guest of Mr. and Mrs. Emerson, Shelbow.

Miss Evelyn Shelbow and Mrs. Roy Van Iderstine, U. S. A., are spending a few months the guest of Mr. and Mrs. Norman Shelbow.

Mrs. Frank Bandreau, Vernon, was in the city Thursday.

Mr. and Mrs. Mortimer and daughter

and by reason of the hardness of the ground, the plowing and sowing for next year's crop is held up. This is causing great anxiety, more particularly as the past crop of wheat has not sold at a profit to the farmer, and he is not in a good position to face another lean year. The rain must be coming down somewhere, but where?

The Argentine has, from a strictly ranching country, where the estancia usually ate dried beef instead of bread, become a mixed farming country growing wheat, maize, alfalfa, rice, tobacco, potatoes and many temperate climate fruits. In 1928 the area planted to wheat was 21,145,000 acres which produced 7,500,000 metric tons, and 2,100,000 tons of linseed (flax seed) were harvested from 7,380,000 acres. This and its neighbour, Chile, are two of the most progressive countries in Spanish America.

### THE ONION MAGGOT

On examining some potato onions in the garden last week, I found them severely infested with the Onion Maggot, the offspring of a fly, *Hylemyia antiqua* Mz., a sort of first cousin of the house fly. These maggots may appear at any time during the growing season, but among young onions they may be very destructive in June.

From the time the female flies emerge until they are ready to lay their eggs upon the plants, there is a period of 10 to 14 days. As the maggot, once hatched, feeds underground, and therefore in a protected position, it has been found advisable to concentrate upon the adult flies and by poisoning them to prevent the deposition of eggs. A poisoned bait is therefore prepared by dissolving 5 grams of sodium arsenite in a gallon of boiling water, with one pint of cheap molasses added. This is applied as a coarse spray, across the onion bed in strips, once a week during the summer. Most insects especially the Diptera (two-winged flies) and Lepidoptera (moths in part) are fond of sweet juices and this poisoned bait is an easy way of exterminating such insects if they become pests.

Mr. Amy U. S. A. formerly of Powall, are visiting relatives here.

Miss Emma Bell, city, was a recent visitor to Millview.

Miss Louise McQueen, Boston, is spending her vacation with her aunt, Mrs. Milton Furness.

Mr. David Ross is visiting his old home in Vernon.

The many friends of Miss Edna Fraser Vernon, are glad to see her out again after her recent illness.

Mr. J. J. McDonald, Glencoe, is able to be about again after a severe cold.

Mr. John Grimes who has spent the last three years in Vernon River has returned to his home in Water- vale. We are sorry to lose such a talented violinist, but we know that our loss is someone else's gain.

The Misses Irene and Clara McKinnon, St. Georges, spent the week-end the guest of Miss Eunice McDonald, Vernon.

Mr. and Mrs. E. C. Burhoe, city, spent Thursday evening the guest of M. B. Jenkins.

Heartly congratulations to Mr. and Mrs. Smith Lea, Vernon River on

## Insidious Eye Strain

We use this adjective advisedly. Sufferers from eyestrain may have perfect vision and therefore do not suspect the presence of any evil defect. The motive power of the entire human organism is Nerve Energy. Normal eyes, it is computed, utilize about 20% of this Nerve Energy, but when eyestrain is present, a much larger proportion is required. Hence defective eyes through their consumption of an excessive amount of Nerve Energy may seriously affect the functioning of other organs of the body and produce ill health.

HAVE YOUR EYES EXAMINED

G. F. Hutcheson OPTOMETRIST

# FLY-TOX

THE SCIENTIFIC INSECTICIDE DEVELOPED AT MELLON INSTITUTE OF INDUSTRIAL RESEARCH BY REX RESEARCH FELLOWSHIP

FLY-TOX kills flies, mosquitoes, moths, roaches, and other insects quickly. Tests in the FLY-TOX "Chamber of Death" prove it. Photo shows a FLY-TOX manufacturer reading report which states less than a teaspoonful of FLY-TOX killed hundreds of insects in less than five minutes.

In the FLY-TOX laboratories a vast army of insects is bred to the highest state of health and vigor. These insects are released in the FLY-TOX "Chamber of Death" to prove with absolute certainty the killing qualities of FLY-TOX before it is sold to you.

Death to insects, but absolutely harmless to people

Made by Canada Rex Spray Co. Ltd., Brighton, Ontario

the arrival of a young son.

Mr. and Mrs. H. A. Jenkins, Hazelbrook, were recent visitors to Millview.

Mr. Colin McNeill and his mother motored to the city on Wednesday.

Miss Prudence Drake, U. S. A. arrived on the Island recently.

Among those attending the ice cream and dance at the C. M. B. A. Hall on Wednesday evening were: Dr. Dugan, Misses Mary and Margaret Kelly, city, Miss Pearl McGillivray and Mrs. Sullivan Mass.

Mrs. Munn has been spending a few weeks the guest of Mrs. D. Matheson, Vernon River.

Mr. and Mrs. W. B. McNeil, and daughter Eveline motored to Tignish recently.

Miss Mary McDonald who has been in the city for the past few months is visiting her home.

Miss Mamie McNeil, Boston, is spending her vacation at her old home in Vernon River.

Mr. John George McDonald and two sons Joseph and Francis spent a few days in St. Georges, the guest

of Mr. McKinnon.

Miss Mildred McDonald, Baltimore M. D. is visiting her old home in Vernon River.

Mr. John Green was a recent visitor to the city.

Miss Reta McMillan is spending a few weeks the guest of her brother Mr. E. McMillan.

Mrs. J. McDonald and two children, Montreal, are visiting their brother-in-law Mr. Breton McDonald, Vernon River.

Miss Helen Solomon, Georgetown, spent the week-end in Vernon River.

Mr. George Furness Vernon, is spending a few weeks the guest of Mr. Wilfred Furness, Vernon.

Miss Margaret Huntley, Vernon, motored to the city Wednesday.

Mr. and Mrs. N. B. McNeil and Eveline and Mr. Frank Vessey spent the week-end in St. Peter's Bay the guest of Mrs. Hugh McMillan.

One of the strangest incidents occurred in Millview last week. While a motorist was out sightseeing he overtook a dog on the road, seeing the dog with his tongue hanging out

and breathing pantingly he jumped at the conclusion that the animal had the rabies, ran to one of the nearby houses shouting "Get me a gun, quick there's a mad dog on the road." The lady of the house became very nervous and finally collapsed. By the time the man got back to where the dog was the poor animal had lain down to rest. I presume that the motorist has found out since that panting in such a manner is the way nature provides for a dog to keep comfortable in hot weather.

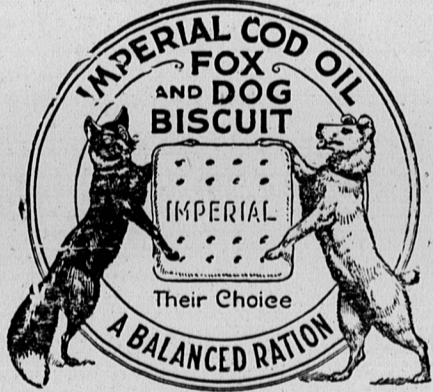

Mr. and Mrs. J. E. McEachern, Cherry Valley, were recent visitors to Murray Harbor.

Mr. and Mrs. Ray Mutch, Earnscliffe, were visitors to Pt. Prim Sunday.

Mr. and Mrs. W. L. Jenkins and family were guests of Mr. and Mrs. Harry Jenkins, Hazelbrook, on Sunday.

Miss Stewart, Charlottetown, has been spending a few days the guest of Miss Jean Mutch, Earnscliffe.

Mr. and Mrs. Albert McLeod, Chloago, are spending a few weeks the guest of Mr. and Mrs. Geo. McEachern, Millview.

## Successful Fox Feeding

Is the problem of our Fox Ranchers today. How to grow strong, vigorous foxes, that will produce pelts of fine texture and lustrous sheen, is uppermost in all minds. THE IMPERIAL BISCUIT COMPANY, LIMITED, have found the solution in their increasingly popular.

### Imperial Cod Liver Oil Fox Biscuits and Imperial Puppy Food

Regular feeding of these is giving the desired results in our Prince Edward Island ranches. "Imperial-fed Foxes" are in a class by themselves. They "produce the goods." Ensure success by liberal feeding of "IMPERIALS."

For sale by leading Island dealers or direct from factory.
