

REASON NO 10 WHY YOU SHOULD USE Red Rose Tea

Because It is Reliable.

Some one has said: "A single fact is worth a ship-load of argument."

A few facts: I introduced this tea to the public about ten years ago. In that short time the business has grown to such proportions that we now occupy the largest Tea warehouse in Canada.

This enormous business has been built up without extensive advertising.

The merchants who commenced handling Red Rose Tea ten years ago are the most enthusiastic in its praises to-day.

The merchants who sell it, the people who drink it, have found that it could be relied on.

The brand, "Red Rose Tea," is accepted everywhere as a guarantee of the highest quality, and those who drink it are its best advertisers.

Ask some of your friends about it.

T. H. ESTABROOKS, St. John, N. B.

GENERAL KUROKI LISTENING TO DESPATCHES ON THE FIELD.

General Kuroki still remains the most interesting character developed on the Japanese side of the war. It was Kuroki who led the first Jap army, who overran Korea, and by crossing the Yalu river won the first Japanese victory and actually invaded what Russia termed her own territory. He is described as small, but wiry, able to withstand any fatigue and to eat and live like the men in the ranks of his army. His face is bronzed like a piece of well-dried mahogany wood. His moustache is cut close and is very grey. He is somewhat bald, speaks little and never gives an order twice to the same man—a second time he calls in some one whom he trusts better. His eyes are a dark brown, and when amused his eyes twinkle, but no man has heard him laugh since this war began. He smokes imported Havana cigars incessantly—it is his one luxury.

HINTS ON PREVENTION OF CONSUMPTION.

Consumption (with other forms of tuberculosis) causes one death in every eight in this country. Of all deaths in the Dominion, between the ages of twenty-five and thirty-five, nearly one half are due to consumption.

It gives rise to a vast amount of suffering and permanent ill-health. It is calculated that in Canada, at the present moment, between 30,000 and 40,000 persons are suffering from it. The disease is preventable.

Consumption is contracted by taking into the system, chiefly by inhalation, the germ or microbe of the disease. The invasion of the system by the tubercle bacillus or germ may be induced by a great variety of conditions, such as living in over-crowded, ill-ventilated, dark, dirty rooms; insufficient or bad food; alcoholism and other forms of dissipation; infectious fevers, or other illness; by anything that enfeebles the constitution and thus impairs its power of resistance. The germ is contained in the dust particles of the dried spit of the consumptive and in the minute droplets sprayed into the atmosphere by the consumptive in coughing.

These germs are only derived from persons suffering from consumption, or some other form of tuberculosis. They are found in vast numbers in the phlegm, spit, or expectoration of a consumptive person.

In a moist state this expectoration does not infect the air, excepting by the sprayed droplets in coughing, but if allowed to dry and become dust it is exceedingly dangerous, and is then a means by which the disease is spread from person to person.

The best place for a consumptive is a sanatorium. If this be impracticable, he must sleep in a separate bedroom.

PRECAUTIONS.—It is essential for the protection of their own families, and to prevent the spread of the disease among the general public, that the following simple precautions be taken by consumptive persons:

The consumptive person must not expectorate about the house, nor on the floor of any cab, omnibus, street-car, railway carriage or other conveyance. Spitting about the streets, or in any public building (churches, schools, theatres, railway stations, &c.) is a dangerous as well as a filthy habit.

The consumptive person must not expectorate anywhere except into a spittoon kept for the purpose, and containing a little water.

When out of doors, a small, wide-mouthed bottle with a well-fitting cork, or a pocket spittoon, which may be obtained from any chemist, should be used.

The expectoration must be washed into a drain, buried in the earth, or thrown into the fire.

The cup or spittoon must then be kept in boiling water for ten minutes before being thoroughly cleaned.

When not provided with a proper spittoon, a consumptive person must not spit into a handkerchief, but into a piece of rag or paper, which must be burnt.

Handkerchiefs which may have been used of necessity should be boiled half an hour before washing.

Consumptive persons must not swallow their phlegm, as, by so doing, the disease may be conveyed to parts of the body not already affected.

A consumptive person must not kiss, or be kissed, on the mouth.

A consumptive person, when coughing, should always hold a handkerchief in front of his mouth, and avoid coughing in the direction of another person.

CURE WAS QUICK AND PERMANENT

Dodd's Kidney Pills Soon Drove Away Rheumatism and Dropsy.

Case of a Windsor Man Who Suffered Two Years Before He Discovered the Right Remedy.

WINDSOR, Ont., Feb. 17.—(Special).—How quickly Rheumatism and Dropsy can be cured when the right medicine is used is shown in the case of Mr. Jno. McDonald, a retired farmer living at 130 Langlois Avenue here. Mr. McDonald says: "For two years I was troubled with Rheumatism and Dropsy. My legs were swollen, and though I tried many medicines nothing gave me any relief till I tried Dodd's Kidney Pills. Two boxes of them cured me so completely that I have had no return of the diseases in years."

Rheumatism and Dropsy are caused by the poisons disordered Kidneys fail to strain out of the blood. Cure the Kidneys with Dodd's Kidney Pills, and the cured Kidneys will remove the cause of the Rheumatism or Dropsy. Without cause there can be no disease.

THEY WERE SURPRISED.

EBENSBURG, Pa., Feb. 12.—While looking through the effects of the late John Troxwell, who prior to his death conducted a small tobacco and stationery store the administrators of his estate came upon a tin box in a small safe, which contained \$27,000 in gold. Further search revealed \$18,000 in bills of large denominations in an old belt he wore, making a total of \$45,000. Troxwell died in January and was 76 years old.

GOES TO VIRGINIA.

St. John, February 12.—It seems to be settled that Dr. Jack, dean of the engineering faculty of the University of New Brunswick, will accept the offer of a position as city engineer in a Virginia town.

Children Are Underfed.

THE RESULT IS WEAKNESS, RICKETS, ST. VITUS' DANCE AND MANY ILLS OF CHILDHOOD—THE CURE IS

Dr. Chase's Nerve Food.

"Nine-tenths of children are under-fed," writes a great English scientist who made an exhaustive study of the subject. Children require double nourishment—to enable them to grow as well as to repair the wear and tear consequent on living.

Active exercise of mind and body, together with growth and physiological changes, consume nerve force at a tremendous rate, exhaust the supply of rich blood and leave the body weak and liable to disease.

Pallor and weakness, weak eyes, nervousness, skin diseases, rickets, St. Vitus' dance and constant liability to catch cold and to contract the disease of childhood are the result.

As a means of restoring the vitality of weak, puny children there is no preparation so effective as Dr. Chase's Nerve Food.

Being mild and gentle in action and powerful as a creator of new, rich blood and nerve force, this great food cure is admirably suited to the needs of childhood; soon adds new, firm flesh and tissue to the weak and emaciated body and restores the vigor of robust childhood.

There is no means by which nourishment is so directly supplied to the blood and nerves as by the use of Dr. Chase's Nerve Food, because this preparation is composed entirely of the elements of nature which are required to build up and restore strength to the system.

Mrs. John Boutlier, 163 Morris St., Halifax, N. S., states: "One of my children was all run down in health. She was going to school and I suppose the close confinement was responsible for her trouble. At times she had a very severe headache and she became very weak and nervous. I got her a box of Dr. Chase's Nerve Food and I now wish to state that the results of this treatment have been all that we could wish. Her nerves were steadied, the headaches have gone and her general health is excellent. I have used Dr. Chase's Kidney-Liver Pills myself and consider them a splendid medicine."

Dr. Chase's Nerve Food, 50 cents a box, at all dealers or Edmanston, Bates & Co., Toronto. The portrait and signature of Dr. A. W. Chase, the famous receipt book author are on every box.

HE WANTED TO BE PRESIDENT OF A BIG RAILROAD.

Once there was a school teacher who had her pupils tell the class what they desired to make them contented for life. One little fellow said:

"I want all the tapasin pudding I can eat."

Another said: "I want to be President of a big railroad."

Twenty years later this same teacher on visiting the jail met the "tapasin pudding boy," who was serving a term for vagrancy, while in a mansion surrounded by a happy family lived her other "pupil," his ambition realized.

Nearly a quarter of a century ago Paton & Co was organized. Its ambition was to become the finest store in Charlottetown, and today this magnificent shopping headquarters stands without a peer—a tribute to ambition and energy, the foundation stones of success.

A multitude of discriminating people are now reaping the benefits of our success, which centres around "knowing how to buy" and "giving values that other stores are unable to equal."

We want you to enjoy the manifold advantages of our furniture department. Specials in our carpet department this week.—Jas. Paton & Co. 184wt.
