REPORT SHOWS REDUCTION IN GRAIN ACREAGE

Maritime Hay Lands Adversely Affected By Open Winter.

(C.P. By Guardian's Special Wire) OTTAWA, May 11—A reduction of nearly 500,000 acres in the area sown in grain in Canada in 1937 was predicted by the Dominion Bureau of Statistics today on the basis of reports from correspondents the Bureau placed the intended area of spring wheat at 24,367,800 acres compared with 24,779,700 acres sown in 1936.

In the peak year of 1932 26,645,100 acres were sown.

The principal decrease will be in Saskatchewan while increases are expected in Manitoba, Quebec and New Brunswick.

Included in the spring wheat intention is an increase in the Durum wheat area of 80,500 acres to a total of 1,708,000 acres in 1937.

The intended area of oats and barley is practically unchanged from 1936.

Spring rye shows an increase of 3,800 acres or two per cent, while flaxseed will show a decrease of 40,000 acres or nine per cent. If farmers' plans are realized, mixed grains show a slight decrease of 10,100 acres or one per cent, while potatoes will show an increase of 4,000 acres, which is one per cent above the 1936 level.

The seeding of spring grains is considerably advanced over that of 1936. Forty-five per cent of the wheat crop was sown prior to April 30 with eight per cent at the same date in 1936. Eight per cent of the oats and six per cent of the barley were sown by April 30, 1937 compared with three per cent respectively a year ago. The seeding of spring wheat is the earliest since 1931.

Except in Alberta and Saskatchewan where farm operations are definitely ahead of last year, the spring has been backward throughout most of the country up to the end of April. Moisture deficiency presents a serious problem over much of the Prairie area, particularly in Southern Alberta and parts of Saskatchewan where soil drifting is already menacing crop prospects, the report said.

The open winter experienced in Eastern Canada resulted in a higher than usual percentage of winter injury to meadows and fall sown grains.

Maritime Provinces

In the Maritime Provinces and Quebec, little work was done on the land before the end of April. Hay lands show the adverse effects of the open winter when ice covered the fields for long periods. In Ontario the mild winter in weather conditions throughout most of the country, however, fine warm days have enabled farmers to pursue their seasonal work. Seeding operations on the prairies are now general and in the northern districts farm work is well ahead of the same date last year.

For all Canada, the intended acreages for 1937 as reported at May 1 are as follows, with the 1936 acreages within brackets: spring wheat 24,367,800 (24,779,700); oats 12,959,900 (13,118,400); barley 4,450,300 (4,432,500); spring rye 161,500 (177,700); flaxseed 427,250 (467,750); mixed grains 1,162,700 (1,172,800); potatoes 501,000 (496,400).

At the end of April practically no seeding had been done in the Maritime Provinces or Quebec.

During the winter of 1936-37 the following percentages of hay and meadow lands were estimated to have been winter-killed with figures for the previous winter in brackets: Canada 12 (8); Prince Edward

GRIM QUEST FOR VOYAGERS' BODIES BEGINS

The metal framework still hot, members of the U. S. naval base force at Newburgh, N. J., hunt for debris of the destroyed Lincolnton. A short time before many of these men were tugging at the mooring lines in an effort to bring the ship to earth in what had come to be considered a "routine" landing.

17 Cars Derailed In Ontario Mishap

STRATFORD, Ont., May 11 (CP)—Seventeen cars of a London-Stratford Canadian National Railways freight train were derailed today in an accident causing several thousand dollars damage. No one was reported hurt.

The deraiment occurred one mile west of St. Mary's, apparently due to a broken rail or damage track on one of the cars. Several loaded cars were badly smashed as they piled into each other. The engine and two box cars remained on the track and were undamaged.

Baie Verte

Miss Mary Prescott, student at Kings College, Halifax, N. S., has returned to the home of her parents, Mr. and Mrs. W. H. Prescott.

The April meeting of the St. Luke W. A. was held at the home of Mrs. L. M. Connell, Rev. R. S. Moussey gave an inspiring address of real values in life. Following the business period tea was served by the hostess, who was assisted by Mrs. J. R. Maxwell and Mrs. J. G. Scott.

Miss Beatrice Goodwin, Port Elgin, spent the week-end with her aunt, Mrs. Johnson Scott.

Mrs. J. R. Seaman has returned from a visit in Moncton, where she was the guest of her sister, Mrs. Walter Brownell and Mr. Brownell.

On Friday evening, April 30th the Ladies' Aid Society of the United Church presented a very fine entertainment in the Community Hall, when a substantial sum was realized for church purposes. The program included a one-act play, monologues, solos and dramatized songs. Mrs. J. R. Maxwell announced the numbers of the program and Miss Emma Scott was accompanist at the piano. Those taking part included Mrs. M. A. Goodwin, Mrs. B. T. Wells, Mrs. Silas Island six (eight); Nova Scotia six (two); New Brunswick 15 (four); Quebec 14 (nine); Ontario 14 (five); Manitoba five (two); Saskatchewan five (one); Alberta four (one); British Columbia two (five).

The condition of fall wheat, rye and hay and cover meadows at the end of April expressed in percentages of the long-time average yields per acre, is as follows, with last year's figures for the same date in brackets:

Fall wheat—Ontario 94 (90); New Scotia 94 (101); New Brunswick 83 (98); Quebec 94 (102); Ontario 85 (96); Manitoba 92 (96); Saskatchewan 85 (89); Alberta 91 (98); British Columbia 94 (96).

Perfect attendance for the month:
Charlotte, Mary, Grace and Lois Strang; Stanley Mason and Florence MacLean.
Highest percentage 81 per cent, Charlotte Strang.

NO BEFUDDLING IN THE WHITE HOUSE FROM DRINKS SERVED

Mrs. Franklin D. Roosevelt says if there is anything befuddling about the White House, it's not the drinks served there.

Mrs. Roosevelt was told that Capt. Edward Page Gaston, founder of the World Prohibition Foundation had informed a Sunday School class that more alcoholic beverages are being served at the White House than ever before. Gaston said, too, that the gift of cases of potent Virgin Island rum to the President and Cabinet members may cause people to come home from official functions in a more befuddled condition than ever.

"I doubt if anybody could arrive home in a befuddled condition from what they drink in the White House," Mrs. Roosevelt said.

Rarely is anything but wine served in the executive mansion and that in small quantities, she said.

Asked what she would do with the Virgin Islands rum if it arrives, Mrs. Roosevelt said: "I am terribly sorry to tell you that I don't know how to use rum. If it is used, it will be in moderation."

Victoria Missed A Coronation

Princesses of the House of Windsor are more privileged today than was their great-grandmother, Queen Victoria, for when she was a small child one was not allowed to attend the coronation of her predecessor.

Queen Victoria was 12 years old when that great event took place. Princess Elizabeth and her sister, Princess Margaret Rose, will both attend this coronation, though the elder is only 11.

The Duchess of Kent, Queen Victoria's mother, thought her daughter too delicate to attend such an exciting event. Current report, however, had it that Victoria's absence was a sign of royal displeasure with the coronation arrangements. It was also suggested that Earl Grey, the Prime Minister, had refused to allow her to attend as a reply to King William's act in abolishing the royal procession and the banquet. Finally, the King had to let it be known that he had sanctioned the Princess's absence on grounds of health.

TRIAL SUCCESSFUL WITH FLYING FLEA

CAPE TOWN, May 12 (CP)—The first "flying flea" to take the air in South Africa has undergone successful trials at Cape Town. Built by a resident here, the complete machine was produced for less than \$750. Six other flying fleas have been built in the Union, but they have never been flown.

The latest machine was built by J. X. Stevens, a Matieland mechanic. The airplane, which has a 40-horsepower engine, was fairly stable in the air with no apparent tendency to stall.

The "flying flea," claimed to be the world's lightest and cheapest airplane, was invented by M. Henri Mignet, a Frenchman.

GREEN ROAD SCHOOL

Honor Roll for April:—
Grade X—1. Margaret McLaughley; 2. Eileen Toole; 3. Janie Toole.
Grade VI—1. Theodora Toole; 2. Arnold Toole.

Ford Company Issue Souvenir Medals

WINDSOR, Ont., May 12—More than 50,000 Coronation souvenir medals are being struck by Ford Motor Company of Canada Limited as its contribution to the Empire-wide coronation celebrations. It was announced today by Wallace R. Campbell, president.

Made of Canadian copper alloy ordinarily used to manufacture radiator tubes and fins in 1937 models, the medal is approximately the size and weight of a silver half-dollar. It carries the profiles of King-George VI and Queen Elizabeth on the head and an inscription on the reverse which reads: "This medal struck at Windsor, Ontario by Ford Motor Company of Canada Limited of Canadian copper alloy used in the 1937 Ford V-8"

Stamped and finished in the Windsor plant by Ford employees, the medals will be distributed as lucky pocket pieces before Coronation Day, May 12, by Ford dealers throughout Canada. About a ton and a half of metal will be used in making the medals which are stamped in one operation in a huge 250-ton press.
